From texting and social networking sites to after-school activities, young people have many opportunities to interact with one another, and yet loneliness and isolation trouble today's youth in increasing numbers. Many children and teens report feeling lonely even in the midst of family and friends, and childhood loneliness is a prime risk factor for adult alienation. *Lonely Children and Adolescents: Self-Perceptions, Social Exclusion, and Hope* illuminates seldom-explored experiences of social isolation among young people as well as the frustrations of the

parents and teachers who wish to help. This groundbreaking book conceptualizes loneliness not simply as the absence of social connections, but as a continuum of developmental experience, often growing out of the conflict between opposite needs: to be like one's peers yet be one's unique self. The author draws clear distinctions between loneliness and solitude and identifies genetic and environmental characteristics (i.e., social, psychological, familial, and educational) that can be reinforced to help children become more resilient and less isolated. In addition, therapeutic approaches are described that challenge loneliness by

encouraging empowerment, resilience, and hope, from proven strategies to promising tech-based interventions. Highlights include: • Developmental perspectives on loneliness. • Schools and the role of teachers, from preschool to high school. • Peer relations (e.g., cliques, bullies, exclusion, and popularity). • Lonely children, lonely parents: models of coping. • Loneliness in the virtual world. • Prevention and intervention strategies at home, at school, in therapy. Asking its readers to rethink many of their assumptions about social competence and isolation, this volume is essential reading for researchers and

professionals in clinical child, school, developmental, and educational psychology; allied education disciplines; social work; and social and personality psychology.

Exceptional Children:

Integrating Research and Teaching provides a comprehensive introduction to the constantly changing area of special education. The book is research-based, and its title reflects our opinion regarding the important link between research and classroom practice. There is one feature of *Exceptional Children: Integrating Research and Teaching* that warrants attention and perhaps justification; it was written specifically to address the graduate student or sophisticated undergraduate student market. As such, the book is written at a higher level and with a greater concept density than typical introductory special education texts. We feel that this type of

book is very much needed and will be received favorably by the special education community. There are also several unique features of *Exceptional Children: Integrating Research and Teaching* that we feel will be quite valuable. First, we have emphasized the area of teaching practices and not simply included basic facts about definitions, characteristics, and causes. Although some introductory texts include information about teaching considerations, that area is not discussed as in depth as it is in our text. We feel that it is important that readers not only understand the educational needs of exceptional children, but also can identify the best educational

practices to meet those needs.

Brown  
The Alternative Educator's Handbook, by Dr. Paul J. Pattavina, is a comprehensive, practical collection of strategies and researched practices to be implemented with students who present social, emotional and behavioral challenges in school. It is a handbook intended to serve as a practical resource for teachers and staff who work

with students whose progress in school is interrupted by social and emotional issues – kids who tend to, either intentionally or unintentionally, 'pluck your last nerve'. It reviews student characteristics and intervention procedures, as well as specific forms and procedures created or adapted over time and experience. The ideas in this book will serve as a guide for educators and mental health professionals who are responsible for these kinds of difficult students, in whatever educational setting they might be placed - alternative schools or programs, private clinical or therapeutic schools, intensive behavior support classrooms or flexible resource room

classrooms in public schools. This is a book that should be read by special and regular education teachers, school social workers, counselors, clinicians and school psychologists; paraprofessionals and child care workers; principals and assistant principals; school superintendents and board of education members; juvenile probation officers; parents and concerned community members; and college instructors who train special education teachers. The need for effective, alternative programs for students with challenging emotional and behavior patterns continues to be a pressing issue for public schools nationwide. The concern has been

exacerbated in the past several years by continued school shootings and violence, creating a grave sense of fear among students, parents and staff, by the actions of kids with guns and other weapons in school. Legislators and public officials have been called to take actions that will keep kids safer in school, focusing particularly on gun control, limiting access and adding guards. And although such measures will be essential towards preventing some school violence, the kinds of programming and resources available for our public schools must also be closely examined. In effect, schools will need to find ways to identify and provide programming options

for students who may be disgruntled, alienated, unconnected, impulsive, and who may be looking to be recognized, seek revenge or put an end to bullying, perceived harassment, injustice or a life of ignominy -- kids who feel they have nothing left to lose. Readers will initially learn about important issues within our public schools that require school staff to be trained to manage a range of social and emotional issues that kids bring to school. In the next section, readers are provided snapshots of related background research about students' social-emotional learning needs and effective intervention practices-- including PBIS, restorative practices,

behavioral programming, social problem solving and affective teaching. Finally, the book outlines a number of specific recommended practices for managing students' social and emotional learning needs. These practices are presented as a cognitive-behavioral model of programming that includes a range of specific competencies, all clustered into a teacher's 4 "bags of tools" -- structure, climate, instruction and discipline. Being an "alternative educator" is not viewed in this text as an official job title. Alternative educator in the context of this document includes anyone who is always searching for different ways to work with difficult kids --

because that's the only way to help such students learn.

curriculum. In Part I, the authors introduce multicultural education as a concept and document the increasing cultural diversity of the United States. The text describes, in Part II, various cultural groups--including African, American Indian, and Hispanic cultures--to help pre-service teachers better understand the backgrounds of diverse learners. Part III focuses on topics that educators should consider when planning and implementing programs that teach acceptance and respect for cultural diversity. Through this series of applied chapters, teacher candidates will learn to use the most effective instructional practices

with diverse learners, and to work successfully with families, school personnel, and administrators to implement a multicultural program. Content and features new to the sixth edition include the following: Every chapter opens with a real-life story that introduces the subject matter by showing the ideas in action. Points to Ponder boxes urge readers to reflect more deeply on information they have just read. Additional Case Studies with accompanying Questions for Discussion in all chapters enable nuanced consideration of the crucial differences between culturally specific learning styles. Increased emphasis on

Social Justice and White Privilege, including its effects on all people. Chapter 13 has been significantly revised to include increased and updated information on sexual orientation, including transgender students. Chapters in Part II now feature further expanded sections on socioeconomic status and conditions of each ethnic group.
