Macroeconomics : Student Activities Routledge

Updated to reflect the most recent Advanced Placement exams, this new edition presents a diagnostic test and two full-length Physics C practice tests with questions answered and explained. Physics C problems, as designed by the Educational Testing Service, are those that require use of calculus for their solutions. In addition to practice exams, this manual presents a detailed review of AP physics topics, which include Newtonian mechanics, electricity and magnetism, and all other related AP test topics. Additional aids for test takers include a general overview of the AP exam, study advice, test-taking tips, and an Appendix of Physics C equations.

This special edition of Greg Mankiw's intermediate macroeconomics textbook takes the same approach that made the parent text a bestseller, but with coverage shaped to address fiscal policy, monetary/exchange-rate policy, deficit reduction, and other critical economic issues from the uniquely Canadian perspective. Like Mankiw's *Macroeconomics*, the Canadian edition teaches fundamentals by relating theoretical concepts to big issues and policy debates, but illustrates those ideas and discussions with examples and cases from Canada, as well as research by Canadian economists.
