This will help you save time and avoid creating any secondary problems. In our experiences most problems initially thought to be carburetor problems are those caused by other engine components. Weber Troubleshooting Guice Making the Weber Progressive (32/36 DFEV) Work on the Aircooled VW Engine. Here at ACN we have gotten enough tech questions asking about the Weber Progressive Carburetor that we felt it was time to get a good article up on the subject. These are our OPINIONS on this subject. Hopefully this article will help some folks, who really have no idea ... Making the Weber Progressive (32/36 DFEV) Work on the ... Posted By RichC on October 29, 2011 . As I continue to diagnose and tinker with my MGB and the Weber 32/36 DGV carburetor and manifold kit that replace the Zenith carb, I'm still having problems figuring out why it will not idle off of choke. So as long as I have the choke on, the car will idle hot or cold at near 900 RPM, but as soon as the choke is opened up, the engine will die. The continuing MGB Weber 32/36 DGV carburetor problem | My ... UPDATE 2018: Fuel pressure was 100% the cause of my Carb problems. Cheap Autozone gauges were giving bad readings. Mr Gasket Fuel Pressure Regulator is the best budget option from O'Reilly's Auto ... Causes of Weber DGEV Hesitation 32/36 Volvo 122s Amazon To start off I will just say i searched the sh!t out of the web and vortex before making this thread. I recently rebuilt my Weber 32/36 DFEV and have been having some problems. When I took it apart, i removed the main jets it had in it (a 137 and a 140) and installed a 130 in the primary main port and the 137 it had in the primary into the secondary port.
