With Sierra, Apple brings never-before-seen features to macOS—like Siri voice control, file sharing across all your iOS devices, picture-in-picture mode for iTunes and Safari, and AI photo search. Once again, David Pogue brings his humor and expertise to the #1 bestselling Mac book. Whether you're a developer or a home-user, this guide offers a wealth of detail on Apple's OS X 10.12 operating system, this new edition covers

everything Sierra has to offer. Perfect for newcomers. Get crystal-clear, jargon-free introduction to the Dock, the macOS folder structure, Safari, Mail, and iCloud. Go in-depth. Learn how to use key new features such as Optimized Storage, the Universal Clipboard, Siri for Mac, and iCloud Drive Sync. Get the full story. David Pogue doesn't stop at telling you how to use macOS features. He wants you to know why to use them—and how to avoid common pitfalls.

Why throw away that broken PC? You can fix it - really! Fixing it will save you much needed cash - and keeping your hardware out of the trash is good for the environment, too. Best of all, you don't need to be a technical expert to do most typical computer repairs - and this book proves it. If you've found other computer repair books too complicated (or too cute), you're in the right place. McFedries covers everything you need to know, get, and do, in plain English, with plenty of crystal-clear pictures.

From the Editors of PCWorld, learn to Master Windows 7 with our curated list of tips, tricks, and secret utilities. Learn how to save time closing your apps, stream media to other PCs, download more themes, take control of Windows Update, and many more useful tasks. The 50 essential tips you'll find in this Superguide will help you work faster and eliminate little daily annoyances. Frustrated by Windows tendency to resize Windows without asking? The guide tells you how to disable that arrangement. Having trouble with your Internet connection? Find out about little-known utilities that keep tabs on your connection. PCWorlds Superguide will also tell you how to add fly-out menus to the Start Menu, remove shovelware, stream media to other PCs, or whip up a system repair disc.

[Fixing Your Computer Absolute Beginner's Guide](#) Pearson IT Certification

The study guide helps you master all the topics on the MCSA

70-687 exam, including the following: Installation and upgrades, including VHDs Migrating users, profiles, and applications Installing, configuring, and securing applications Configuring Hyper-V virtualization Configuring TCP/IP, network settings, and network security Configuring and securing access to files and folders, including OneDrive and NFC Configuring local security, authentication, and authorization Configuring remote connections and management Configuring and securing mobile devices Managing disks, backups, and system/file recovery MCSA 70-687 Cert Guide: Configuring Microsoft(R) Windows 8.1 is a best-of-breed exam study guide. Best-selling authors and expert instructors Don Poulton, Randy Bellet, and Harry Holt share preparation hints and test-taking tips, helping you identify areas of weakness and improve both your conceptual knowledge and hands-on skills. Material is presented in a concise manner, focusing on increasing your understanding and retention of exam topics. The book presents you with an organized test preparation routine through the use of proven series elements and techniques. Exam topic lists make referencing easy. Chapter-ending Exam Preparation Tasks help you drill on key concepts you must know thoroughly. Review questions help you assess your knowledge, and a final preparation chapter guides you through tools and resources to help you craft your final study plan. The companion CD contains the powerful Pearson IT Certification Practice Test engine, complete with hundreds of exam-realistic questions. The assessment engine offers you a wealth of customization options and reporting features, laying out a complete assessment of your knowledge to help you focus your study where it is needed most. Well-regarded for its level of

detail, assessment features, and challenging review questions and exercises, this study guide helps you master the concepts and techniques that will enable you to succeed on the exam the first time. Don Poulton (A+, Network+, Security+, MCSA, MCSE) is an independent consultant who has worked with computers since the days of 80-column punch cards. He has consulted extensively with training providers, preparing study materials for Windows technologies. He has written or contributed to several Que titles, including Security+ Lab Manual, MCSA/MCSE 70-299 Exam Cram 2, and MCTS 70-620 Exam Prep. Randy Bellet (Network+, MCSE, MCSA, MCDBA) has worked in IT since 1981, and has written multiple applications for the banking, insurance, and food industries. Now on the faculty of ECPI University, he has developed courses in network security and programming. Harry Holt has worked as a computer operator, programmer, LAN administrator, network engineer, DBA, and project manager. He has used his skills to improve efficiency in organizations including Fortune(R) 500 companies, financial institutions, government agencies, small partnerships, and sole proprietorships. Master MCSA 70-687 exam topics for Windows 8.1 configuration Assess your knowledge with chapter-opening quizzes Review key concepts with exam preparation tasks Practice with realistic exam questions on the CD

Complete A+ Guide to IT Hardware and Software IDG Consumer and SMB Inc

Industrial Product-Service Systems (IPS2), which is defined as “an integrated industrial product and service offering that delivers value in use,” has expanded rapidly over the last decade. IPS2 has allowed us to achieve both high added value and high productivity and has enriched our QOL by improving the performance of products and services. We are now struggling with many awkward issues related to sustainability, but IPS2 is expected to be the “philosopher’s stone” for solving these issues. Following the pattern of conferences held in Cranfield in 2009, Linköping in 2010, and Braunschweig in 2011, the fourth International CIRP Conference on Industrial Product-Service Systems, held on November 8-9, 2012, in Tokyo, will cover various aspects of IPS2. Topics planned for this year’s conference reflect the latest IPS2 information in both the natural sciences and humanities and include case studies from various industries. IPS2 is still a relatively new field, so it is important to keep track of the entire context in order to promote more cross-sectional cooperation between multimodal fields and disciplines. The fourth International CIRP Conference on Industrial Product-Service Systems will serve as a vital platform for such collaborations and the discussion of new scientific ideas.

The Computer Supported Collaborative Learning (CSCL) conference has become an internationally-recognized forum for the exchange of research findings related to learning in the context of collaborative activity and the exploration of how such learning might be augmented through technology. This text is the proceedings from CSCL 2005 held in Taipei, Taiwan. This conference marked the 10th anniversary of the first CSCL Conference held at Indiana University in 1995. Subsequent meetings have been held at the University of Toronto, Stanford University, University of Maastricht (Netherlands), University of Colorado at Boulder, and the University of Bergen (Norway). Just as the first CSCL conference was instrumental in shaping the trajectory of the field in its first decade, the conference in Taipei will play an important role in consolidating an increasingly

international and interdisciplinary community and defining the direction of the field for the next 10 years. This volume, and the papers from which it is comprised, will be an important resource for those active in this area of research and for others interested in fostering learning in settings of collaboration.
