The thoroughly updated 2nd edition gives you access to over 2,500 practice questions, ten interactive review modules with HESI Live Review videos, 50 content lessons, realistic practice exams, a personalized study calendar, insightful test-taking strategies, and much more. Using an interactive online format, this solution is the most effective way to help you pass the NCLEX-PN exam the first time around! *Canadian Maternity and Pediatric Nursing* Elsevier Publishing Company About: To prepare you for real world practice, this book will highlight content areas most relevant to the bedside and why they must be mastered and understood. To help visualize the professional development that is needed as you transition to the responsibilities of the professional nurse, I use the metaphor of building a house; not a static structure, but a unique, vibrant "living" house that is a reflection of how you choose to build and add to it over time. Nursing is a living

and vibrant practice that requires your personal involvement and engagement to promote the well-being of those you care for. The components of this "living" home include:

Foundation: A house must have a firm and stable foundation. The ethical comportment or the art of nursing is this foundation for every nurse. Caring behaviors, nurse engagement, and professionalism in practice must be present or your nursing practice could be on shaky ground before it even begins!

Walls: The applied sciences of nursing: pharmacology, fluid and electrolytes, and anatomy and physiology. I contextualize these sciences to the bedside so the relevance of mastering this content becomes apparent.

Roof: Critical thinking and clinical reasoning, which is the thinking that is required by the nurse that completes the house and ties everything together.

Skeletons in the closet: Every house has closets and some have a few skeletons in them!

Incivility and men in nursing will be explored in detail!

Partnering with Children & Families promotes excellence in nursing care for infants, children, and adolescents--in hospitals and in the community.
