Billy Mason thought his dream came true when he was offered a promotion, but it came with a catch; he had to move. When he and his wife find their dream house, they think their life is complete, but what they don't know is that the house holds a deep dark secret. A spirit hides in the home, waiting to find its next victim to do his dark deedsto kill. When Billy reads from a mysterious notebook he finds in the attic, he invites

the spirit into his body, changing him from Billy the family man to killer Billy Mason.

[Topics On Chaotic Systems: Selected Papers From Chaos 2008 International Conference](#) BecomeShakespeare.com

The automobile is one of the inventions that has made a decisive contribution to human mobility, and consequently it has become an inseparable part of modern human society. However, it is through this widespread use that its negative impacts on the environment have become so highly visible. Achievements in improving the ecological characteristics of the automobile are

highly impressive: a modern car emits only a fraction of the amounts of noise and exhaust pollutants produced by its predecessors 30 years ago. The contributions to this book were written by experts, most of whom have been actively involved in the development of modern automobiles and their combustion engines for more than 30 years. They have participated in all phases of the ecological development of the automobile and summarize their experience and know-how in this book .

Zero Carbon Car Woodhead Publishing Genetic Algorithms and Genetic Programming: Modern Concepts and Practical Applications discusses algorithmic developments in the context of genetic algorithms (GAs) and genetic programming (GP). It applies the

algorithms to significant combinatorial optimization problems and describes structure identification using HeuristicLab as a platform for algorithm development. The book focuses on both theoretical and empirical aspects. The theoretical sections explore the important and characteristic properties of the basic GA as well as main characteristics of the selected algorithmic extensions developed by the authors. In the empirical parts of the text, the authors apply GAs to two combinatorial optimization problems: the traveling salesman and capacitated vehicle routing problems. To highlight the properties of the algorithmic measures in the field of GP, they analyze GP-based nonlinear structure identification applied to time series and

classification problems. Written by core members of the HeuristicLab team, this book provides a better understanding of the basic workflow of GAs and GP, encouraging readers to establish new bionic, problem-independent theoretical concepts. By comparing the results of standard GA and GP implementation with several algorithmic extensions, it also shows how to substantially increase achievable solution quality.

Delhi Press Magazine

Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly, misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years?

Auto e fisco. Con CD-ROM Springer
The Zero Carbon Car examines the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint, and the adaptation of the automotive industry to changing technology in a world where environmental issues are becoming ever more prevalent. The book's in-depth research into green car technology shows that manufacturers make concerted efforts, but sometimes also defeat the gains of their innovation. Topics covered include: What is meant by the terms 'global warming' and 'green', and how these can be defined; An account of the long history of green automotive technology; Alternative fuels, including diesel and hydrogen; Developments in

environmentally friendly engine technology; Electric cars; Environmental issues in material usage and car body manufacture. A wide-ranging survey of the hundreds of ways in which car manufacturers are trying to reduce our carbon footprint. Written in an easy-to-understand manner, the book enables the reader to fully understand what is meant by 'global warming'. Examines alternative fuels, material usage and the motive power options available to us. Superbly illustrated with 350 colour photographs. Brian Long is a professional writer and motoring historian with over sixty books to his credit.

Do you believe in destiny? Can you ever imagine a girl who comes in your dream

could come in real? "Ishana" is a love story in Prajwal's life which changed his life forever. You will get to know about, how all Prajwal traveled in his life to find his Dreamgirl and How all destiny played in his life. "Ishana" is a story that will teach you, how much you need to believe in a dream to make it real. Prajwal is not just a person, he could be anyone of you! Who dreams to achieve something bigger, which is always too far to reach. If you succeed in your dreams or not! but it's your decision that makes you happy in the end and ever after.

Genetic Algorithms and Genetic Programming Delhi Press

Within all large consumer facing organizations, most decisions about how to deal with people are made automatically by computerized decision making systems. Information about people, their lifestyle and past behavior are used to predict how they are expected to behave in the future. It can be determined if someone applying for a bank loan will make their repayments, who will respond to a marketing communication and the likelihood that someone will claim on their insurance policy. This book provides a step-by-step guide to how predictive analytics is used by some of the world's most influential organizations. This includes international

banks, leading insurance providers, credit reference agencies and national governments. It covers all stages of the predictive analytics process, including project management, data collection, sampling, data transformation and pre-processing, model construction, validation, implementation and post-implementation monitoring of the model's performance.

Springer Nature

Brenda Phiri is dying of AIDS. She will soon leave her sixteen-year-old daughter, Beauty, alone in the world with her younger brother. Before she succumbs, Brenda asks young Beauty for a promise. She requests that her daughter remain a virgin until marriage and hopes Beauty will keep a journal of her experiences. Beauty is no ordinary

girl, however; she's a traffic-stopping beauty. With her mother gone, Beauty finds herself under the guardianship of the very handsome Thabo Gumede. Thabo believes it is only a matter of time before he seduces young Beauty. She deftly avoids his advances, though, determined to keep her promise to her mother. She even founds the Diary Girls, a group intended to promote chastity among young people. Unfortunately, the patron of this group is Pastor Mandla Khumalo, who also wants to have his wicked way with Beauty. Plagued by her own raging hormones and surrounded by amorous schoolboys and lustful older men, Beauty must fight to stay pure and keep her promise. She must remain chaste in a society awash with sex. Will she be able to resist the power of

temptation, or will she give in and become a man's plaything?

The Encyclopaedia of Brands & Branding in South Africa Graphic Communications Group

Aerodynamics has never been more central to the development of cars, commercial vehicles, motorbikes, trains and human powered vehicles, driven by the need for efficiency: reducing carbon dioxide emissions, reducing fuel

consumption, increasing range and alleviating problems associated with traffic congestion. Reducing vehicle weight makes it more challenging to ensure that they are stable and handle well over a wide range of environmental conditions. Lighter structures are also more vulnerable to aerodynamically induced vibration. Alongside this, customers demand an environment that is quiet, comfortable and maintains their vision of the world around them in all weathers. These aims must be met by designing vehicles that engage customers emotionally, promoting the brand values of manufacturers and operators. This can only be done by collaboration between designers and aerodynamicists. Examine the latest developments in vehicle aerodynamic

development Explore opportunities to network and share experiences around different areas Focus on future challenges and the engineering knowledge and technology required to resolve them Discuss other areas of development including handling and stability, tyre aerodynamics and modelling, aeroacoustics and fluid structure interaction

Credit Scoring, Response Modeling, and Insurance Rating Kogan Page Publishers This volume includes the best papers presented at the CHAOS 2008 International Conference on Chaotic Modeling, Simulation and Applications. It provides a valuable collection of new ideas, methods, and techniques in the field of nonlinear dynamics, chaos, fractals and their applications in general

science and in engineering sciences. It touches on many fields such as chaos, dynamical systems, nonlinear systems, fractals and chaotic attractors. It also covers mechanics, hydrofluid dynamics, chaos in meteorology and cosmology, Hamiltonian and quantum chaos, chaos in biology and genetics, chaotic control, and chaos in economy and markets, and chaotic simulations; thus, containing cutting-edge interdisciplinary research with high-interest applications. These contributions present new solutions by analyzing the relevant data and through the use of recent advances in different fields, especially in chaotic simulation methods and techniques.

Autocar Hirmer Verlag

Every year, financial services organizations make billions of dollars

worth of decisions using automated systems. For example, who to give a credit card to and the premium someone should pay for their home insurance. This book explains how the forecasting models, that lie at the heart of these systems, are developed and deployed.

Daily Graphic Xlibris Corporation

From the author of Thirteen Hours - A Sunday Times '100 best crime novels and thrillers since 1945' pick The former freedom fighter known as 'Tiny' has finally achieved his dream of a peaceful life. But then his beloved son is taken away from him. In that moment, he unleashes himself upon a corrupt South Africa. His victims are those guilty of crimes against children. He goes by the name of Artemis. Benny Griessel, a fading policeman on the brink of losing

his job, family and self-respect, is assigned the case. Benny knows that this is his last chance - both his career and the safety of Cape Town are on the line. But then Benny meets Christine, a young mother working as a prostitute, and something happens that is so terrifying that the world will never be the same again for Benny, for Christine, or for Tiny.

Killer Billy Mason iUniverse

This book examines the challenges faced by seven multinational companies - Intel, Lenovo, Samsung Electronics, ZTE, BMW Hyundai Motor Company, Mahindra and Mahindra - in their endeavour to contribute to the economic, environmental and social development of Asia. The lessons learned from the examination of these business practices

may directly contribute to an increase in the practice of sustainable management and may as such contribute to positive economic, environmental and social impact of companies in this region. The cases are highly relevant for management theoreticians seeking to deepen our understanding of corporate sustainability in an area where scholars, practitioners and policy-makers can expect new questions, problems and challenges in the years ahead. The book is also of high interest to policy review agencies, policy makers and welfare economists seeking to support the development of a comprehensive sustainability framework for managing social and environmental issues in the context of Asia.

Building Successful Car Brands for the

Future Springer

Many aspects of Nature, Biology or even from Society have become part of the techniques and algorithms used in computer science or they have been used to enhance or hybridize several techniques through the inclusion of advanced evolution, cooperation or biologically based additions. The previous NICSO workshops were held in Granada, Spain, 2006, Acireale, Italy, 2007, and in Tenerife, Spain, 2008. As in the previous editions, NICSO 2010, held in Granada, Spain, was conceived as a forum for the latest ideas and the state of the art research related to nature inspired cooperative strategies. The contributions collected in this book cover topics including nature-inspired techniques like Genetic Algorithms,

Evolutionary Algorithms, Ant and Bee Colonies, Swarm Intelligence approaches, Neural Networks, several Cooperation Models, Structures and Strategies, Agents Models, Social Interactions, as well as new algorithms based on the behaviour of fireflies or bats.

Collection Editions present "Top Gear"...
The world's most watched factual

television program. With over 360 pages, 160+ car reviews and manufacturer information, presenter biographies from the original 1977 series through to today's modern masterpiece. History of the UK, Russian, Korean, US & Australian series, Track reviews, Power laps, all the present 'Star' timings, and so much more. This huge book is the ultimate authoritative and comprehensive guide to the world's most loved television series for the most dedicated of fans.

Svend Robinson 2006 and Newer BMW 320d Turbocharger Rebuild and Repair Guide 741785-0013, 741785-5013, 741785-9013, 741785-13, 7792412
La contabilizzazione dei costi del personale rappresenta, anche per gli addetti ai lavori, un'operazione non

sempre facile e spesso fonte di dubbi: la presente guida ha l'obiettivo di illustrare, in maniera semplice e mediante l'ausilio di esempi pratici, come contabilizzare il costo del personale, evitando problematiche legate al non corretto appostamento delle voci nel bilancio di esercizio - soprattutto in presenza di eventi particolari, come la malattia, gli infortuni e così via - e alle conseguenti ripercussioni, in termini di imposizione fiscale. In virtù di questa considerazione, al fine di appostare correttamente tutte quelle voci di bilancio utili al calcolo delle imposte, è necessario valutare gli aspetti relativi agli oneri contributivi ed assicurativi, al fine dell'eventuale deduzione dalla base imponibile IRAP. La disamina, alle cui fondamenta soggiacciono i principi contabili, si

caratterizza per il gran numero di esempi – che, di fatto, rappresentano una sintesi delle casistiche più comuni che possono incontrarsi in azienda – volti a consentire un rapido approccio al lettore, soprattutto in quelle situazioni di particolare urgenza, come nel caso di dover calcolare il costo per esigenze di budget. Viene, infine, proposto un caso concreto di contabilizzazione del costo, partendo dal cosiddetto “cedolone”, vale a dire il riassunto avvenuto nel periodo di lavoro considerato. Andrea Sergiacomo Dottore commercialista, Revisore legale dei conti, Mediatore civile, componente della Commissione cooperative O.D.C.E.C. di Roma e componente della Commissione diritto societario O.D.C.E.C. di Tivoli. April 2017 New Star Books

Detective Storm van der Merwe is walking her dog on the beach when she makes a gruesome discovery: the body of a young journalist – missing a limb. For the residents of Grootbaai, corpses are bad for business: thousands of tourists from all over the world flock to this coastal town to shark-cage dive with its famous great whites. Storm is desperate to investigate the matter, but she’s been banished from the field to a dreary back office. She’s also careless after a tow-truck driver – an attractive one at that – crashed his truck into her Beetle. Meanwhile, in Cape Town, Storm’s former colleague Andreas Moerdyk is having problems of his own

while investigating the death of a famous Springbok rugby player whose car was also hit by a tow truck. Is Storm's car accident in some way related to the sports star's fatal collision? And is there a link between the

journalist's death and stories of abalone poaching in Grootbaai? As Storm searches for answers, she realises that everyone's a suspect and the stakes are deadly.
