 principles of

the world's major religions. The textbook includes a chapter on each of eleven major world religions, including Christianity, Islam, Hinduism, Buddhism, Judaism, and others. The text offers the Catholic perspective on interreligious dialogue, an overview of basic questions that religions address, and Ninian Smart's seven dimensions of religion. A glossary and word

pronunciations in each chapter help students learn unfamiliar terms. In addition, the second edition of this text incorporates the following new features: a new chapter on modern trends in religion; new, more detailed maps; a new section on the Aztec religion of Mesoamerica; a sidebar in each chapter offering examples of the seven dimensions of religion; and review questions at the end of

each chapter. *A Historical Introduction* Orbis Books The updated guide to differences - and similarities - of faiths around the world. In this revised and updated edition of the popular guide to the many faiths followed around the world, modern and ancient religions are extensively covered as well as New Thought religions. This edition also now features a chapter on Sikhism, more coverage of religious

extremism in the 21st century, a new chapter on the afterlife, and additional online resources making it the most up-to-date volume available. ? Outdoes the competition with more chapters on current and ancient religions ? Appeals to students, theologians, and those generally interesting in religions around the world.
The Varieties of Religious Experience

A&C Black
 The case for a bigger, more complete picture of reality in which a fifth, spiritual dimension plays a central role Many of us today are all too willing to accept a humanist and scientific account of the universe which considers human existence as a fleeting accident. The triumph of John Hick's gripping work is his exposure of the radical insufficiency of this view.

Drawing on mystical and religious traditions ancient and modern, and spiritual thinkers as diverse as Julian of Norwich and Mahatma Ghandi, he has produced a tightly argued and thoroughly readable case for a bigger, more complete, picture of reality in which a fifth, spiritual dimension, plays a central role. 'Essential reading for anyone concerned with

spirituality in the modern world' Professor Keith Ward, University of Oxford Erudite, provocative and deeply moving, Hick's persuasive narrative will prompt all curious readers to re-examine their own spiritual horizons. 'This stimulating book opens up many fundamental issues that must concern everyone. It deserves to be widely read. ' Expository Times 'Learned, lucid and engaging,

easy to read and easy to applaud for its sheer clarity of style and its breadth of interest, even when one disagrees with it!' Anvil Our Great Wisdom Traditions Routledge A religion is a system of stories, and there is no better way to engage with the world's religions than through the stories that animate their beliefs and practices. Through the exploration of these ancient stories and contemporary

practices, Stephen Prothero, a New York Times best-selling author and gifted storyteller, helps students better grasp the role of religion in our fractured world and to develop greater religious literacy. Videos and an award-winning adaptive learning tool, InQuizitive, further engage students and help them master core objectives and develop their own religious literacy.

A Comparative Introduction Penguin Ideal for courses in Western religions, Religions of the West Today, Fourth Edition will cover the same material as the Western chapters of the authors' longer textbook, *World Religions Today*, Sixth Edition. Revealing the significance of religion in contemporary life, it explores major Western religious traditions - Judaism,

Christianity, Islam - as well as indigenous religions, and new religions as dynamic, ongoing forces in the lives of individuals and in the collective experience of modern societies. This unique volume accomplishes two goals: it connects today's religions to their classical beliefs and practices and focuses on how these religions have both radically changed the modern world and been changed by it.

Thoroughly revised, the fourth edition features streamlined content for greater accessibility; updated material on recent world events; and updated timelines.

An Exploration of the Spiritual Realm Abacus

This compendium of introductory essays invites scholars and clinicians to better understand people of various faiths from around the world. It is intended to correct the tendency among scientists to study religious behavior without

accounting for its human dimension. For example: a psychologist describes a religious ceremony in a certain community as a "sociological phenomenon." Such a technical description is likely to strike members of that community as an attempt by science to explain away their beliefs. This is counterproductive. In order to work effectively and empathetically with people of faith, psychologists

should seek an intimate knowledge of how religion operates in the hearts and minds of living, breathing human beings. With this goal in mind, editors Timothy Sisemore and Joshua Knabb have made one of the world's major religions the subject of a separate chapter. In addition, they have arranged for each chapter to be written by a psychologist who practices—or is culturally

connected with—that religion. This marks the book’s unique contribution to the field: it is the product of people who have lived the world’s religions, not merely studied them. By taking such a respectful approach, the book promotes an appreciation for the ways that religious belief animates, inspires, and instructs its adherents. Moreover, the indigenous point-of-view of these essays will

help scholars identify their own biases when researching religious groups, allowing them to produce more accurate and holistic analyses. Psychologists understand that religion and spirituality provide meaning and purpose to billions of people around the globe. But the actual experience of these beliefs eludes the grasp of the reductionistic methods of science. With this resource

at their side, psychologists in academic and clinical settings will be equipped to understand religious experience from the bottom-up, and honor the beliefs and practices of the people they are trying to help. *The World's Religions* Baker Academic World Religions: Engaging With Transformational Concepts is a supplemental workbook that analyzes nine phases of human

transformation through identity formation and includes an amalgamation of science with transformative elements found in sacred texts.

the world's major religions. It not only explains to students why it is imperative to study religions, but does this through the support of primary source documents, coverage of religions as they exist today, and integrated media resources. experience - to thousands of undergraduates over the last decade - and his living / working experiences in Asian Christian, Buddhist, Confucian and Muslim societies for extended periods. Littlefield Publishers Standing at the crossroads of psychology and religion, this catalyzing work applied the scientific method to a field abounding in abstract theory. William James believed that individual religious experiences, rather than the precepts of organized religions, were the backbone of the world's religious life. His discussions of conversion, repentance, mysticism and saintliness,

and his observations on actual, personal religious experiences - all support this thesis. In his introduction, Martin E. Marty discusses how James's pluralistic view of religion led to his remarkable tolerance of extreme forms of religious behaviour, his challenging, highly original theories, and his welcome lack of pretension in all of his observations on the

individual and the divine. *The World's Religions* Oxford University Press, USA This masterful survey of world religions presents a clear and concise portrait of the history, beliefs, and practices of Eastern and Western religions. The new edition contains added material and has been revised throughout. The authors, both respected scholars of world

religions, have over fifty years of combined teaching experience. Their book is accessibly written for introductory classes, can be easily adapted for one- or two-semester courses, and presents a neutral approach for broad classroom use. Pedagogical aids include further reading suggestions, photographs, sidebars, and pronunciation guides. An 800-question

bank of multiple-choice test questions is available to professors through Baker Academic's Textbook eSources. **Contested Histories and Contemporary Realities** W.W. Norton & Company Retaining all the beloved qualities of Huston Smith's classic *The Religions of Man* and the current fully revised and updated *The World's Religions*, this stunning pictorial presentation

refines the text to its wonderful essentials. In detailed, absorbing, richly illustrated, and highly readable chapters on Hinduism, Buddhism, Confucianism, Taoism, Islam, Judaism, Christianity and primal religions, we find refreshing and fascinating presentations of both the differences and the similarities among the worldwide religious traditions. The approach is at

once classic and contemporary, retaining all the empathy, eloquence and erudition that millions of readers love about the earlier editions, while being edited and designed for a contemporary general readership. This delightful marriage of winsome text and remarkable pictures vividly brings to life the scope and vision of Huston Smith's expertise and insight.

religion. The book begins at Oxford, in the late nineteenth century, when Friedrich Max Müller and James Legge classified Confucianism as a world religion in the new discourse of "world religions" and the emerging discipline of comparative religion. Anna Sun shows how that decisive moment continues to influence the understanding of Confucianism in the contemporary world, not

only in the West but also in China, where the politics of Confucianism has become important to the present regime in a time of transition. Contested histories of Confucianism are vital signs of social and political change. Sun also examines the revival of Confucianism in contemporary China and the social significance of the ritual practice of Confucian temples. While the

Chinese government turns to Confucianism to justify its political agenda, Confucian activists have started a movement to turn Confucianism into a religion. Confucianism as a world religion might have begun as a scholarly construction, but are we witnessing its transformation into a social and political reality? With historical analysis, extensive research, and thoughtful reflection,

Confucianism as a World Religion will engage all those interested in religion and global politics at the beginning of the Chinese century. *A Guide to Our Wisdom Traditions* Princeton University Press Examines religious practices from an anthropological perspective Religions in Practice, 6/e, offers an issues-oriented perspective on everyday religious

behaviors – prayer, sacrifice, initiation, healing, etc. – by focusing on such topics as transnationalism, gender, and religious laws. The text examines a full spectrum of religions, from small-scale societies to major, established religions. The in-depth treatment of Islam, Hinduism, and Christianity is particularly noteworthy and easily supplemented with field projects directly related to the

text.

**Volume 1:
Religious

and
Philosophical Analysis**

Cambridge University Press
"Religions speak in symbols-fire, cloud, hills and high places, darkness and light, incense, candles, colors. Religions, though, perhaps love water best. Buddhists use water for blessing. Hindus purify themselves in rivers. Christians undergo

baptism in water as a rite of initiation. Followers of Islam and Shinto cleanse themselves with water before prayer. Water means change, purification, and new beginnings. Because water can signify so much to us, it is the major symbol of this book. By studying many religions, we also hope to be cleansed and brought to new life. This book was written for my students. Keeping their needs in mind,

I have tried to provide what is essential and to present it in clear language. I want to talk about doctrine and practice. Yet I also hope to show some of those things that have captivated me: religious music, art, and architecture. I want to show my respect for all religious traditions, both in a scholarly and an approachable way. Finally, I hope to invite students not only to read about

religions, but also to experience them firsthand. It is like the difference between reading maps of a country and then actually traveling on its roads and seeing its sights. Experience brings the prize"--
