Ferit Güven illuminates the historically constitutive roles of madness and death in philosophy by examining them in the light of contemporary discussions of the intersection of power and knowledge and ethical relations with the other. Historically, as Güven shows, philosophical treatments of madness and death have limited or subdued their disruptive quality. Madness and death are linked to the question of how to conceptualize the unthinkable, but Güven illustrates how this conceptualization results in a reduction to positivity of the very radical negativity these moments represent. Tracing this problematic through Plato, Hegel, Heidegger, and, finally, in the debate on madness between Foucault and Derrida, Güven gestures toward a nonreducible, disruptive form of negativity, articulated in Heidegger's critique of Hegel and Foucault's engagement with Derrida, that might allow for the preservation of real otherness and open the possibility of a true ethics of difference.

The Strange Death of Europe is the internationally bestselling account of a continent and a culture caught in the act of suicide, now updated with new material taking in developments since it was first published to huge acclaim. These include rapid changes in the dynamics of global politics, world leadership and terror attacks across Europe. Douglas Murray travels across Europe to examine first-hand how mass immigration, cultivated self-distrust and delusion have contributed to a continent in the grips of its own demise. From the shores of Lampedusa to migrant camps in Greece, from Cologne to London, he looks critically at the factors that have come together to make Europeans unable to argue for themselves and incapable of resisting their alteration as a society. Murray's "tremendous and shattering" book (The Times) addresses the disappointing failures of multiculturalism, Angela Merkel's U-turn on migration, the lack of repatriation and the Western fixation on guilt, uncovering the malaise at the very heart of the European culture. His conclusion is bleak, but the predictions not irrevocable. As Murray argues, this may be our last chance to change the outcome, before it's too late.

Tales of love, madness and death is the result of that tormented life and it is where he displays all his gifts. In these stories, the mystery is master and lord, although always immersed in everyday situations, which increases the impact. Madness and love are constantly intertwined, to inevitably lead to death. His stories, charged with implicit violence, produce an asphyxiating tension that is only released with the most unexpected of endings. The jungle and wild setting of the Missions that he knew, frame his stories.

THE SUNDAY TIMES BESTSELLER 'Immensely moving and disarmingly witty' Nigella Lawson 'Such a moving, tough, funny, raw, honest read' Matt Haig 'Beautifully written, moving and gut-wrenching, but also at times very funny' Ian Rankin 'Captures brilliantly, beautifully, bravely the comedy as well as the tragedy of bereavement' The Times 'Will strike a chord with anyone who has grieved' Independent Whether it is pastoral care for the bereaved, discussions about the afterlife, or being called out to perform the last rites, death is part of the Reverend Richard Coles's life and work. But when his partner the Reverend David Coles died, shortly before Christmas in 2019, much about death took Coles by surprise. For one thing, David's death at the early age of forty-three was unexpected. The man that so often assists others to examine life's moral questions now found himself in need of help. He began to look to others for guidance to steer him through his grief. The flock was leading the shepherd. Much about grief surprised him: the volume of 'sadmin' you have to

do when someone dies, how much harder it is travelling for work alone, even the pain of typing a text message to your partner - then realising you are alone. The Reverend Richard Coles's deeply personal account of life after grief will resonate, unforgettably, with anyone who has lost a loved one.

The insanity defense is one of the oldest fixtures of the Anglo-American legal tradition. Though it is available to people charged with virtually any crime, and is often employed without controversy, homicide defendants who raise the insanity defense are often viewed by the public and even the legal system as trying to get away with murder. Often it seems that legal result of an insanity defense is unpredictable, and is determined not by the defendants mental state, but by their lawyers and psychologists influence. From the thousands of murder cases in which defendants have claimed insanity, Doctor Ewing has chosen ten of the most influential and widely varied. Some were successful in their insanity plea, while others were rejected. Some of the defendants remain household names years after the fact, like Jack Ruby, while others were never nationally publicized. Regardless of the circumstances, each case considered here was extremely controversial, hotly contested, and relied heavily on lengthy testimony by expert psychologists and psychiatrists. Several of them played a major role in shaping the criminal justice system as we know it today. In this book, Ewing skillfully conveys the psychological and legal drama of each case, while providing important and fresh professional insights. For the legal or psychological professional, as well as the interested reader, Insanity will take you into the minds of some of the most incomprehensible murderers of our age.

In *Black Madness* :: Mad Blackness Theri Alyce Pickens rethinks the relationship between Blackness and disability, unsettling the common theorization that they are mutually constitutive. Pickens shows how Black speculative and science fiction authors such as Octavia Butler, Nalo Hopkinson, and Tananarive Due craft new worlds that reimagine the intersection of Blackness and madness. These creative writer-theorists formulate new parameters for thinking through Blackness and madness. Pickens considers Butler's *Fledgling* as an archive of Black madness that demonstrates how race and ability shape subjectivity while constructing the building blocks for anti-racist and anti-ableist futures. She examines how Hopkinson's *Midnight Robber* theorizes mad Blackness and how Due's *African Immortals* series contests dominant definitions of the human. The theorizations of race and disability that emerge from these works, Pickens demonstrates, challenge the paradigms of subjectivity that white supremacy and ableism enforce, thereby pointing to the potential for new forms of radical politics.

Death Grip chronicles a top climber's near-fatal struggle with anxiety and depression, and his nightmarish journey through the dangerous world of prescription drugs. Matt Samet lived to climb, and craved the challenge, risk, and exhilaration of conquering sheer rock faces around the United States and internationally. But Samet's depression, compounded by the extreme diet and fitness practices of climbers, led him to seek professional help. He entered the murky, inescapable world of psychiatric medicine, where he developed a dangerous addiction to prescribed medications—primarily "benzos," or benzodiazepines—that landed him in institutions and nearly killed him. With dramatic storytelling, persuasive research data, and searing honesty, Matt Samet reveals the hidden epidemic of benzo addiction, which some have suggested can be harder to quit than heroin. Millions of adults and teenagers are prescribed these drugs, but few understand how addictive they are—and how dangerous long-term usage can be, even when prescribed by doctors. After a difficult struggle with addiction, Samet slowly makes his way to a life in recovery through perseverance and a deep love of rock climbing. Conveying both the exhilaration of climbing in the

wilderness and the utter madness of addiction, *Death Grip* is a powerful and revelatory memoir.

Madness Is Better Than Defeat State University of New York Press

"Riveting. . . a testament to a misconceived war, and to the ease with which ordinary men, under certain conditions, can transform into monsters."—New York Times Book Review This is the story of a small group of soldiers from the 101st Airborne Division's fabled 502nd Infantry Regiment—a unit known as "the Black Heart Brigade." Deployed in late 2005 to Iraq's so-called Triangle of Death, a veritable meat grinder just south of Baghdad, the Black Hearts found themselves in arguably the country's most dangerous location at its most dangerous time. Hit by near-daily mortars, gunfire, and roadside bomb attacks, suffering from a particularly heavy death toll, and enduring a chronic breakdown in leadership, members of one Black Heart platoon—1st Platoon, Bravo Company, 1st Battalion—descended, over their year-long tour of duty, into a tailspin of poor discipline, substance abuse, and brutality. Four 1st Platoon soldiers would perpetrate one of the most heinous war crimes U.S. forces have committed during the Iraq War—the rape of a fourteen-year-old Iraqi girl and the cold-blooded execution of her and her family. Three other 1st Platoon soldiers would be overrun at a remote outpost—one killed immediately and two taken from the scene, their mutilated corpses found days later booby-trapped with explosives. *Black Hearts* is an unflinching account of the epic, tragic deployment of 1st Platoon. Drawing on hundreds of hours of in-depth interviews with Black Heart soldiers and first-hand reporting from the Triangle of Death, *Black Hearts* is a timeless story about men in combat and the fragility of character in the savage crucible of warfare. But it is also a timely warning of new dangers emerging in the way American soldiers are led on the battlefields of the twenty-first century.

Edgar Allan Poe's Tales of Mystery and Madness iUniverse

"This remarkable volume brings together texts that reveal a unique perspective on Foucault's work on the interrelated topics of madness, language, and literature in the second half of the 1960s. Not only do these texts develop analyses and concepts that cannot be found anywhere else in Foucault's oeuvre, but they also show that Foucault's relation to structuralism in those years was far more complex and rich than he himself was ready to acknowledge. They show, more precisely, that between *The Order of Things* and *The Archaeology of Knowledge*, and specifically in relation to madness, literature, and literary criticism, Foucault turned to structuralism not only to challenge the central role attributed to the human subject, but also to analyze language and human experience as in a way detached from the historical conditions of their emergence and production. *Madness, Language, Literature* is organized around three main issues: the status and place of the madman in our societies; the relationship between madness, language, and literature in Baroque theater, the theater of cruelty by Antonin Artaud, and the work of Raymond Roussel; and the evolution of literary criticism in the 1960s. A study of the "absence of a work" in Balzac and of the relationship between desire and knowledge in Flaubert completes this ensemble, presenting a side of Foucault somewhat different from the one we know from the texts he published during this time"--

THE SUNDAY TIMES BESTSELLER Updated with a new afterword "An excellent take on the lunacy affecting much of the world today. Douglas is one of the bright lights that could lead us out of the

darkness." - Joe Rogan "Douglas Murray fights the good fight for freedom of speech ... A truthful look at today's most divisive issues" - Jordan B. Peterson Are we living through the great derangement of our times? In *The Madness of Crowds* Douglas Murray investigates the dangers of 'woke' culture and the rise of identity politics. In lively, razor-sharp prose he examines the most controversial issues of our moment: sexuality, gender, technology and race, with interludes on the Marxist foundations of 'wokeness', the impact of tech and how, in an increasingly online culture, we must relearn the ability to forgive. One of the few writers who dares to counter the prevailing view and question the dramatic changes in our society - from gender reassignment for children to the impact of transgender rights on women - Murray's penetrating book, now published with a new afterword taking account of the book's reception and responding to the worldwide Black Lives Matter protests, clears a path of sanity through the fog of our modern predicament.

SPIDER EBOOK #23 Weidenfeld & Nicolson

An investigative reporter explores an infamous case where an obsessive and unorthodox search for enlightenment went terribly wrong. When thirty-eight-year-old Ian Thorson died from dehydration and dysentery on a remote Arizona mountaintop in 2012, *The New York Times* reported the story under the headline: "Mysterious Buddhist Retreat in the Desert Ends in a Grisly Death." Scott Carney, a journalist and anthropologist who lived in India for six years, was struck by how Thorson's death echoed other incidents that reflected the little-talked-about connection between intensive meditation and mental instability. Using these tragedies as a springboard, Carney explores how those who go to extremes to achieve divine revelations—and undertake it in illusory ways—can tangle with madness. He also delves into the unorthodox interpretation of Tibetan Buddhism that attracted Thorson and the bizarre teachings of its chief evangelists: Thorson's wife, Lama Christie McNally, and her previous husband, Geshe Michael Roach, the supreme spiritual leader of Diamond Mountain University, where Thorson died. Carney unravels how the cultlike practices of McNally and Roach and the questionable circumstances surrounding Thorson's death illuminate a uniquely American tendency to mix and match eastern religious traditions like LEGO pieces in a quest to reach an enlightened, perfected state, no matter the cost. Aided by Thorson's private papers, along with cutting-edge neurological research that reveals the profound impact of intensive meditation on the brain and stories of miracles and black magic, sexualized rituals, and tantric rites from former Diamond Mountain acolytes, *A Death on Diamond Mountain* is a gripping work of investigative journalism that reveals how the path to enlightenment can be riddled with danger.
