Outrageous Cherry Voice Yen Press LLC

From the editor-in-chief and co-owner of the highly respected

self-improvement site Pick the Brain comes an inspirational guide for overscheduled, overwhelmed women on how to do less so that they can achieve more. Women live in a state of constant guilt: that we're not doing enough, that we're not good enough, that we can't keep up. If we're not climbing the corporate ladder, building our side hustle, preparing home-cooked meals, tucking the kids in at night, meditating daily, and scheduling playdates, date nights, and girls' nights every week, we feel like we're not living our best lives. Yet traditional productivity books—written by men—barely touch on the tangle of cultural pressures that women feel when facing down a to-do list. Now, Erin Falconer will show you how to do less—a lot less. In fact, *How to Get Sh*t Done* will teach you how to zero in on the three areas of your life where you want to excel, and then it will show you how to off-load, outsource, or just stop giving a damn about the rest. As the

founder of two technology start-ups and one of Refinery29's Top 10 Women Changing the Digital Landscape for Good, Erin has seen what happens when women chase an outdated, patriarchal model of productivity, and now she shows you how even the most intense perfectionist among us can tap into our inner free spirit and learn to feel like badasses. Packed with real-life advice, honest stories from Erin's successful career, and dozens of actionable resources, *How to Get Sh*t Done* will forever reframe productivity so that you can stop doing everything for everyone and start doing what matters to you.

Metamorphosis New York : Macmillan Company

"There is something in this book to interest every literate person and, says one critic who read the manuscript, "something to offend everybody--the rugged individualists, the liberals, the collectivists"--which means that it is an intensely vital book. Professor Bridgman begins by admitting that he says "out loud all sorts of things that are perfectly obvious to anyone, but which anyone with a ghost of sense or of social instinct knows enough to keep to himself." His great desire is to lead an intelligently ordered life, and it seems to him that this longing is one of the fundamental drives of human beings. He writes: "The intelligently ordered life is for me first of all a life in which the relations, consequences and implications of the drives that make me go are apprehended with complete vividness--a life in which the fundamental drives are served with all possible intelligence, in which the bearing of every action on my fundamental purposes is apprehended with the greatest vividness, and every action is deliberately so chosen as to further this end with the greatest possible efficiency." But he says he falls far short of this ideal. "I am not able to answer any question with regard to my life, whether concerning fact or motive or chance of success, with even an approach to that clearness and completeness which I demand with regard to my scientific activities." He sees the greatest need for the application of intelligence in the solution of social problems. He is convinced that the situations in physics and society today are practically identical, that in the social sciences, as in physics, the old ways of thinking are inadequate, and that social concepts must be revised in the face of altered

circumstances as the physicists have learned to revise their concepts. Detailed application of methods similar to those successfully employed by physics shows the utter inadequacy of the conventional understanding of our mental machinery, as involved in our relations to the external world, the verbalizing in terms of which we do most of our thinking, and the relation of the individual to his fellows. In the light of an analysis of mental possibilities and limitations, he takes up and presents in a new aspect such ideas as those of duty, freedom, "rights," morality, justice, race survival, service, idealism; and discusses from a fresh viewpoint such questions as the use of physical force, the way to social reform, the future of education"--Jacket. Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be

considered art.
