Leading Corporate Change Springer

Management Challenges in the 21st Century looks afresh at the future of management thinking and practice. The content revolves around two fundamental issues that are occurring simultaneously: changes in the world economy, and shifts in the practice of management. These developments, especially in developed countries are crucial in exploring and understanding the challenges of the future. This volume focuses on the key questions for all business: What are the new realities? What new policies are required of companies and executives in order to deal with these changes. Facing a whole swathe of issues head-

on in his usual clear-sighted style, Drucker offers up a prescient and informed analysis that will help every executive to build a proactive strategy for the future.

How to Lead R&D When You're Not the Expert Global Professional Pub

This book examines the impact of CEOs on firm performance and focuses on their role in science-based innovation to answer the question, is it possible to lead highly complex R&D projects and innovation that you do not understand? Today, science and

technology move so fast that even managers of R&D teams can become quickly disconnected from new developments. Similarly, business leaders may be required to lead organisations with technical knowledge beyond their own expertise. How to manage teams and retain respect and influence is a recognised challenge. Filled with insight from managers and CEOs in science and technology organisations, the book unlocks the skills required to balance the leadership and managerial needs of the organisation, motivate the technical teams and drive successful innovation in new product development environments. Due to the vital role played by experts in a chosen field of technical and scientific expertise, the book also describes what these specialists need and expect from their leaders. The book is required reading for managers in high tech and scientific environments – the CEO, CSO and the R&D manager. It can also be used as a classroom reference book on the management skills required for leading high-tech projects.

Discovering Value and Creating Growth in a Disrupted World Harvard Business Press

No CEO can find a point of balance and then stand still—that's not even possible on a tightrope. The expectation is that the business must always move forward. The American CEO walks a tightrope daily . . . many times blindfolded and without a net below. The job of balancing the often-competing interests of a company's constituents is so challenging that the average lifespan of a newly minted CEO is around five years. Why is it that our most successful businesspeople, individuals who have been wildly successful at every other position in their career, often fail when they get to the CEO chair? The job of the CEO is unlike any leadership position, yet many CEOs are unprepared for its challenges. Yes, you must have business acumen and people-management skills, but you'll also need to own the company vision, provide the proper resources, build the culture consistently and in alignment with company goals, make key decisions, and deliver performance that satisfies boards, shareholders, and investors. And, to complicate matters, you must work in an ambiguous environment in which you have absolute responsibility but questionable control. Your biggest challenge will be the balancing act required to be successful—to grow your company in the short term and create a long-term advantage that makes your efforts sustainable. Joel Trammell, successful entrepreneur, CEO, and investor, explores the various points of balance that challenge every CEO. He identifies what it looks like when a CEO is off balance and offers modern techniques and approaches to regain balance, drawn from almost thirty years of study and experience. You'll learn about the 50+ daily struggles that might pull you off balance, such as how to build credibility while avoiding the cheerleader vs. Eeyore trap; how to identify the right growth opportunities while avoiding the budget blower vs. budget tyrant trap; and how to create strong alignment while avoiding the CIA vs. amateur trap. Trammell has created this resource for aspiring, new, and more experienced CEOs. He shares stories that allow you to identify your own strengths and weaknesses and provides questions that promote self-analysis. Filling a void in the market for a clear, compelling guide for CEOs, *The CEO Tightrope* is certain to become your go-to valued resource.

How Successful Leaders Make It to the Top Harvard Business

Review Press

From the world's most influential management consulting firm, McKinsey & Company, an insight-packed, revelatory look at how the best CEOs do their jobs based on extensive interviews with today's most successful corporate leaders—including chiefs at Netflix, JPMorgan Chase, General Motors, and Sony. Being a CEO at any of the world's largest companies is among the most challenging roles in business. Billions, and even trillions, are at stake—and the fates of tens of thousands of employees often hang in the balance. Yet, even when "can't miss" high-achievers win the top job, very few excel. Thirty percent of Fortune 500 CEOs last fewer than three years, and two out of five new CEOs are perceived to be failing within eighteen months. For those who shoulder the burden of being the one on whom everyone counts, a manual for excellence is sorely needed. To identify the 21st century's best CEOs, the authors of *CEO Excellence* started with a pool of over 2400 public company CEOs. Extensive screening distilled that group into an elite corps, sixty-seven of whom agreed to in-depth, multi-hour interviews. Among those sharing their views: Jamie Dimon (JPMorgan Chase), Satya Nadella (Microsoft), Reed Hastings (Netflix), Kazuo Hirai (Sony), Ken Chenault (American Express), Mary Barra (GM), and Peter Brabeck-Letmathe (Nestlé). What came out of those frank, no-holds-barred conversations is a rich array of mindsets and actions that deliver outsized performance. Compelling, practical, and unprecedented in scope, *CEO Excellence* is a treasure trove of wisdom from today's most elite business leaders.

Radical Advice for Reinventing Talent--and HR Most executives today recognize the competitive advantage of human capital, and yet the talent practices their organizations use are stuck in the twentieth century. Typical talent-planning and HR processes are designed for predictable environments, traditional ways of getting work done, and organizations where "lines and boxes" still define how people are managed. As work and organizations have become more fluid--and business strategy is no longer about planning years ahead but about sensing and seizing new opportunities and adapting to a constantly changing environment--companies must deploy talent in new ways to remain competitive. Turning conventional views on their heads, talent and leadership experts Ram Charan, Dominic Barton, and Dennis Carey provide leaders with a new and different playbook for acquiring, managing, and deploying talent--for today's agile, digital, analytical, technologically driven strategic environment--and for creating the HR function that business needs. Filled with examples of forward-thinking companies that have adopted radical new approaches to talent (such as ADP, Amgen, BlackRock, Blackstone, Haier, ING, Marsh, Tata Communications, Telenor, and Volvo), as well as the juggernauts and the startups of Silicon Valley, this book shows leaders how to bring the rigor that they apply to financial capital to their human capital--elevating HR to the same level as finance in their organizations. Providing deep, expert insight and advice for what needs to change and how to change it, this is the definitive book for reimagining and creating a talent-driven organization that wins. *Understanding the CEO's Agenda for Driving Growth and Innovation* Harvard Business Press

Discover the vital relationship that will take your company from "What's next?" to "We have liftoff!" Visionaries have groundbreaking ideas. Integrators make those ideas a reality. This explosive combination is the key to getting everything you want out of your business. It worked for Disney. It worked for McDonald's. It worked for Ford. It can work for you. From the author of the bestselling *Traction*, *Rocket Fuel* details the integral roles of the Visionary and Integrator and explains how an

effective relationship between the two can help your business thrive. Offering advice to help Visionary-minded and Integrator-minded individuals find one another, Rocket Fuel also features assessments so you're able to determine whether you're a Visionary or an Integrator. Without an Integrator, a Visionary is far less likely to succeed long-term, and realize the company's ultimate goals—likewise, with no Visionary, an Integrator can't rise to his or her full potential. When these two people come together to share their natural talents and innate skill sets, it's like rocket fuel—they have the power to reach new heights for virtually any company or organization.

The proven, effective strategy for reinventing your business in the age of ever-present disruption Disruption by digital technologies? That's not a new story. But what is new is the "wise pivot," a replicable strategy for harnessing disruption to survive, grow, and be relevant to the future. Rapid recent advances in technology are forcing leaders in every business to rethink long-held beliefs about how to adapt to emerging technologies and new markets. CEO as Spokesperson Harvard Business Review Press

Managing Your Scarcest Resources Business leaders know that the key to competitive success is smart management of scarce resources. That's why companies allocate their financial capital so carefully. But capital today is cheap and abundant, no longer a source of advantage. The truly scarce resources now are the time, the talent, and the energy of the people in your organization--resources that are too often squandered. There's plenty of advice about how to manage them, but most of it focuses on individual actions. What's really needed are organizational solutions that can unleash a company's full productive power and enable it to outpace competitors. Building off of the popular Harvard Business Review article "Your Scarcest Resource," Michael Mankins and Eric Garton, Bain & Company experts in organizational design and effectiveness, present new research into how you can liberate people's time, talent, and energy and unleash your organization's productive power. They identify the specific causes of organizational drag--the collection of institutional factors that slow things down, decrease output, and drain people's energy--and then offer a pragmatic framework for how managers can overcome it. With practical advice for using the framework and in-depth examples of how the best

companies manage their people's time, talent, and energy with as much discipline as they do their financial capital, this book shows managers how to create a virtuous circle of high performance.

Across all of these break-out companies, a set of common patterns has evolved into a repeatable playbook that Gil has codified in High Growth Handbook. Covering key topics including the role of the CEO, managing your board, recruiting and managing an executive team, M&A, IPOs and late stage funding rounds, and interspersed with over a dozen interviews with some of the biggest names in Silicon Valley including Reid Hoffman (LinkedIn), Marc Andreessen (Andreessen Horowitz), and Aaron Levie (Box), High Growth Handbook presents crystal clear guidance for navigating the most complex challenges that confront leaders and operators in high-growth startups. In what Reid Hoffman, cofounder of LinkedIn and co-author of the #1 NYT bestsellers *The Alliance* and *The Startup of You* calls "a trenchant guide," High Growth Handbook is the playbook for turning a startup into a unicorn.

CIO and Corporate Strategic Management: Changing Role of CIO to CEO John Wiley & Sons

This is a story of reinvention. Jim Whitehurst, celebrated president and CEO of one of the world's most revolutionary software companies, tells first-hand his journey from traditional manager (Delta Air Lines, Boston Consulting Group) and "chief" problem solver to CEO of one of the most open organizational environments he'd ever encountered. This challenging transition, and what Whitehurst learned in the interim, has paved the way for a new way of managing—one this modern leader sees as the only way companies will successfully function in the future. Whitehurst says beyond embracing the technology that has so far disrupted entire industries, companies must now adapt their management and organizational design to better fit the Information Age. His mantra? "Adapt or die." Indeed, the successful company Whitehurst leads—the open source giant Red Hat—has become the organizational poster child for how to reboot, redesign, and reinvent an organization for a decentralized, digital age. Based on open source principles of transparency, participation, and collaboration, "open management" challenges conventional business ideas about what companies are, how they run, and how they make money. This book provides the blueprint for putting it into practice in your own firm. He covers challenges that have been missing from the conversation to date, among them: how to scale engagement; how to have healthy debates that net progress; and how to attract and keep the "Social Generation" of workers. Through a mix of vibrant stories, candid lessons, and tested processes, Whitehurst shows how Red Hat has blown the traditional

operating model to pieces by emerging out of a pure bottom up culture and learning how to execute it at scale. And he explains what other companies are, and need to be doing to bring this open style into all facets of the organization. By showing how to apply open source methods to everything from structure, management, and strategy to a firm's customer and partner relationships, leaders and teams will now have the tools needed to reach a new level of work. And with that new level of work comes unparalleled success. The Open Organization is your new resource for doing business differently. Get ready to make traditional management thinking obsolete.
