Introduction to the Literature of Europe in the 15th, 16th, and 17th Centuries
London : C. Bingley ; Hamden, Conn. : Linnet Books
As cultural studies has grown from its origins on the margins of literary studies, it has tended to discard both literature and sociology in favour of the semiotics of popular culture.

Literature, Culture and Society makes a determined attempt to re-establish the connections between literary studies, cultural studies and sociology. Arguing against both literary humanism and sociological relativism, it provides a critical overview of theoretical approaches to textual analysis, from hermeneutics to postmodernism, and presents a substantive account of the capitalist literary mode of production. This second edition has been fully revised and rewritten, with

new sections including the impact of psychoanalysis and post-structuralism, and the recent work of academics such as Franco Moretti. New case studies have been added in order to examine the intertextual connections between Genesis, Milton's Paradise Lost, Frankenstein (in Mary Shelley's original and also in several film versions), Karel Capek's R.U.R., Fritz Lang's

Metropolis, Ridley Scott's Blade Runner, The X-Files and Buffy the Vampire Slayer. *Introduction to the Literature of Europe in the Fifteenth, Sixteenth, and Seventeenth Centuries* Cambridge University Press Introduction to Contemporary Print Culture examines the role of the book in the modern world. It considers the book's deeply intertwined relationships with other media through ownership

structures, copyright and adaptation, the constantly shifting roles of authors, publishers and readers in the digital ecosystem and the merging of print and digital technologies in contemporary understanding of the book object. Divided into three parts, the book first introduces students to various theories and methods for understanding print culture, demonstrating how the study

of the book has grown out of longstanding academic disciplines. The second part surveys key sectors of the contemporary book world - from independent and alternative publishers to editors, booksellers, readers and libraries - focusing on topical debates. In the final part, digital technologies take centre stage as eBook regimes and mass-

digitisation projects are examined for what they reveal about information power and access in the twenty-first century. This book provides a fascinating and informative introduction for students of all levels in publishing studies, book history, literature and English, media, communication and cultural studies, cultural sociology, librarianship and archival studies and digital

humanities. Introduction to the Literature of Europe, etc University of Illinois Press Modern Arabic literature remains little known and poorly understood despite growing curiosity among European readers. This brief introduction offers a unique overview, focusing on developments over the last fifty years. It provides a guide to the literary landscape, indicating the

major landmarks in the shape of authors, ideas and debates. The picture that emerges shows that the literature of the modern Arab world, Europe's closest neighbour, is not so far from us as we are sometimes encouraged to think. A timely contribution to the dialogue between East and West, bringing modern Arabic literature into the mainstream for English-speaking readers. 'Tresilian's

book is not only informative about its subject but also provides thought-provoking messages to the general reader.' Denys Johnson Davies Banipal *A Room of One's Own* Penguin UK This four-volume historical resource provides new opportunities for investigating the relationship between religion, literature and society in Britain and its imperial

territories by making accessible a diverse selection of harder-to-find primary sources. These include religious fiction, poetry, essays, memoirs, sermons, travel writing, religious ephemera, unpublished notebooks and pamphlet literature. Spanning the long nineteenth century (c.1789–1914), the resource departs from older models of 'the Victorian crisis of faith' in

order to open up new ways of conceptualising religion. This second volume is called 'Mission and Reform' and it considers the social and political importance of religious faith and practice as expressed through foreign and domestic mission and philanthropic and political movements at home and abroad.

Literature and Society

Columbia University Press
The Liberal

Imagination is one of the most admired and influential works of criticism of the last century, a work that is not only a masterpiece of literary criticism but an important statement about politics and society. Published in 1950, one of the chillier moments of the Cold War, Trilling's essays examine the promise—and limits—of liberalism, challenging the complacency of a naïve

liberal belief in rationality, progress, and the panaceas of economics and other social sciences, and asserting in their stead the irreducible complexity of human motivation and the tragic inevitability of tragedy. Only the imagination, Trilling argues, can give us access and insight into these realms and only the imagination can ground a reflective and considered, rather than programmatic

and dogmatic, liberal-
ism. Writing with
acute intelligence
about classics like
Huckleberry Finn
and the novels of
Henry James and
F. Scott Fitzgerald,
but also on such
varied matters as

and money in the

Trilling presents a

of the reflective
life that, in our
ever more rational-
ized world, seems
ever more necessary—
and ever more remote.

and artifacts, are self-referential systems. The book explores the workings of self-reference (and the related performativity) in linguistic utterances and assorted texts, through examples of the more open social-discursive systems of post-structuralism and cultural studies, and into the sciences, where complex systems organized by recursive self-reference are now being

embraced as an emergent paradigm. This paradigmatic convergence between the humanities and sciences is autopoetics (adapting biologist Hubert Maturana's term for "self-making" systems), and it signals a long-term epistemological shift across the nature/culture divide so definitive for modernity. If cultural theory has taught us that language, because of its self-referential nature, cannot

bear simple witness to the world, the new paradigmatic status of self-referential systems in the natural sciences points toward a revived kinship of language and culture with the world: language bears "witness" to the world. The main movement of the book is through a series of model explications and analyses, operational definitions of concepts and terms, more extended case

studies, vignettes and thought experiments designed to give the reader a feel for the concepts and how to use them, while working to expand the autopoetic internee by putting cultural self-reference in dialogue with the self-organizing systems of the sciences. Along the way the reader is introduced to self-reference in epistemology (Foucault), sociology (Luhmann),

biology (Maturana/Var-
ela/Kauffman),
and physics
and
cosmology
(Smolin).

that exist between humans and other animals. She considers interactions between animals and humans in social organizations, such as the family, the legal system, and political and religious institutions. A major focus is the social construction of animals in world cultures and the way in which these social meanings are used to reinforce and perpetuate hierarchical human relationships

such as racism, sexism, and class privilege. The book also examines how different human groups construct a range of identities for themselves and for others through animals. This second edition of *Animals and Society* is fully updated and expanded throughout, enhancing the book's relevance for student and activist readers alike. It includes many new international examples, all-

new case studies, and updated supplementary readings. [In the Fifteenth, Sixteenth and Seventeenth Centuries](#) Routledge The essays in this collection examine halakhic and rule texts found at Qumran, focusing on legal issues, the role of halakhah in relations with other Second Temple groups, and the literary development and intertextual relationships of the

This book tells the story of Chinese literature,

from prehistory to the present, in terms of literary culture's key role in supporting social and political concerns. A welcome guide for teachers, students, and lay readers, Chinese Literature: A Very Short Introduction honors traditional Chinese understanding s of literature as encompassing history and philosophy, as well as the evolution of poetry and

poetics, storytelling, drama, and the novel.

Prolegomena

The purpose of this book is to examine anew and from a number of different perspectives the highly complex and controversial relation between literature and society. This is not meant to be a study in sociology or

political science; the analysis of literature - its structure, content, function, and effect - is our primary concern. What we shall try to find out is how the imaginative work is rooted in and grows out of the parent social body, to what extent it is influenced in subject matter as well as form and technique by the dominant climate of ideas in a given historical period, and to what degree

and in what manner literature "influences" the society to which it is addressed. The stream of literary influence is of course difficult to trace to its putative source, for here we are not dealing, as in science, with isolated physical phenomena which can be fitted precisely within some cause-and-effect pattern. The relationship between literature and society is far more subtle

and complex than social scientists or cultural critics commonly assume. Literature, Culture and Society OUP USA Children's literature takes many forms - works adapted for children in antiquity, picture books and pop-ups - and now includes the latest online games and eBooks. This vast and amorphous subject is both intimately related to other areas of literary and cultural

investigation but also has its own set of concerns, issues and challenges. From familiar authors including Beatrix Potter and Roald Dahl, classic books such as Pooh, Alice in Wonderland, and The Secret Garden, to modern works including Harry Potter and the Twilight series, this Very Short Introduction provides an overview of the history of children's literature as it has developed

in English, whilst at the same time introducing key debates, developments, and figures in the field. Raising questions about what shape the future of literature for children should take, and exploring the crossover with adult fiction, Reynolds shows that writing for children - whether on page or screen - has participated in shaping and directing ideas about culture, society and

childhood.
