Fundamentals of Molecular Spectroscopy Butterworth-Heinemann

This is the ninth in the 300 series of circuit design books, again contains a wide range of circuits, tips and design ideas. The book has been divided into sections, making it easy to find related subjects in a single category. The book not only details DIY electronic circuits for home construction but also inspiring ideas for projects you may want to design from the ground up. Because software in general and microcontroller programming techniques in particular have become key aspects of modern electronics, a number of items in this book deal with these subjects only. Like its predecessors in the 300 series, "308 Circuits" covers the following disciplines and interest fields of modern electronics: test and measurement, radio and television, power supplies and battery chargers, general interest, computers and microprocessors, circuit ideas and audio and hi-fi.

Satellite Signal Propagation, Impairments and Mitigation covers issues related to satellite link design. The book develops every concept from elementary physics, covering the basics of signal propagation from Maxwell's equations and then gradually developing the physical reasons for impairments. It emphasizes the unique concepts for each involved process, based on their physics, and explains how they form the determining factors for the related suitable engineering technique for mitigation. Every basic principle is followed by mathematical substantiation with an explanation of the physics behind the equations. Covers the basics of signal propagation, starting from Maxwell's equations and then gradually developing the physical reasons for the impairments Includes different important propagation experiments conducted and detailed in the Appendix Employs the power of MATLAB® as both a visualization and problem-solving tool Provides MATLAB scripts for simulation exercises

SHADOWLANDS Her car disabled during a tropical storm, Jessica Randall discovers the isolated house where she's sheltering is a private bondage club. At first shocked, she soon becomes aroused watching the interactions between the Doms and their subs. But she's a professional woman--an accountant--and surely isn't a submissive . . . is she? Master Z hasn't been so attracted to a woman in years. But the little sub who has wandered into his club intrigues him. She's intelligent. Reserved. Conservative. After he discovers her interest in BDSM, he can't resist tying her up and unleashing the passion she hides within. DARK CITADEL After Kari breaks up with her date during Beginner's Night at Club Shadowlands, she's given the option to continue with an experienced dominant. Yet under the unyielding hands of Master Dan, she not only participates, but gives him everything he asks for. There is nothing she can hide from him. Not her passion...or her love. Still mourning the death of his wife, Master Dan avoids getting involved with women and he never takes a sub twice. But this modest little beginner is such a sweetie, one night is far from enough. As he plumbs her responses, taking her ever deeper into the world of BDSM, the gentle submissive begins to show him how barren his life has become and what a dark citadel he's made of his heart. In 2009, BlackBerry controlled half of the smartphone market. Today that number is one percent. What went so wrong? *Losing the Signal* is a riveting story of a company that toppled global giants before succumbing to the ruthlessly competitive forces of Silicon Valley. This is not a conventional tale of modern business failure by fraud and greed. The rise and fall of BlackBerry reveals the dangerous speed at which innovators race along the information superhighway. With unprecedented access to key players, senior executives, directors and competitors, *Losing the Signal* unveils the remarkable rise of a company that started above a bagel store in Ontario. At the heart of the story is an unlikely partnership between a visionary engineer, Mike Lazaridis, and an abrasive Harvard Business school grad, Jim Balsillie. Together, they engineered a pioneering pocket email device that became the tool of choice for presidents and CEOs. The partnership enjoyed only a brief moment on top of the world, however. At the very moment BlackBerry was ranked the world's fastest growing company internal feuds and chaotic growth crippled the company as it faced its gravest test: Apple and Google's entry in to mobile phones. Expertly told by acclaimed journalists, Jacquie McNish and Sean Silcoff, this is an entertaining, whirlwind narrative that goes behind the scenes to reveal one of the most compelling business stories of the new century.
