The first book in the Sword-Dancer saga introduces the legendary adventures of Tiger and Del, magic wielders and skilled warriors. He was Tiger, born of the desert winds, raised as a slave and winning his freedom by weaving a special kind of magic with a warrior's skill. Now he was an almost legendary sword-dancer, ready to take on any challenge—if the price was right. She was Del, born of ice and storm, trained by the greatest of Northern sword masters. Now, her ritual training completed, and steeped in the special magic of her own runesword, she had come South in search of the young brother stolen five years before. But even Del could not master all the dangers of the deadly Punja alone.

And meeting Del, Tiger could not turn back from the most intriguing challenge he'd ever faced—the challenge of a magical, mysterious sword-dancer of the North....

Widely respected yoga teacher and author Richard Rosen draws on ancient yoga encyclopedias to explain how yoga was practiced before it became popular in the West. He compares the three main existing sources known to yoga scholars to describe how complex and rich the practice of yoga once was. It included systematic teachings on personal hygiene, good health, and good relationships, and other practices of yoga that went far beyond just the physical postures. Each section of the book offers a guided practice session of ancient poses and breathing techniques to enable readers to connect to the roots of their yoga and to offer a framework from which to understand the sequences they use in their regular sessions.

Man has always been curious about himself, a curiosity that began centuries ago with an examination of the soul, and that extended in the period of the Renaissance to his anatomy and certain functions such as the circulation of the blood. Chemical science entered the scene in the 18th century, and burst into prominence in the 19th century. As the various chemical elements were discovered, many were found to be present in body fluids and tissues. Organic compounds were recognized; it became known that body heat was produced by the combustion of food; chemical transformations such as the production of fat from carbohydrate were recognized; and in the 1850s it was determined that young animals differed from adults in certain aspects of body composition. As methods for chemical analysis evolved, they were applied to samples of body fluids and tissues, and it became apparent that life depended on chemical normality; and most importantly it was realized that given the necessary amount of food and water the body had the ability to maintain a degree of constancy of what Claude Bernard called the milieu interieur, in other words its interior chemical environment.

Painful Yarns Penguin

Part of a new six-volume series of the best in classic horror, selected by Academy Award-winning director of *The Shape of Water* Guillermo del Toro *American Supernatural Tales* is the ultimate collection of weird and frightening American short fiction. As Stephen King will attest, the popularity of the occult in American literature has only grown since the days of Edgar Allan Poe. The book celebrates the richness of this tradition with chilling contributions from some of the nation's brightest literary lights, including Poe himself, H. P. Lovecraft, Shirley Jackson, Ray Bradbury, Nathaniel Hawthorne, and—of course—Stephen King. This volumes also includes "The Yellow Sign," the most horrific story from *The King in Yellow*, the classic horror collection by Robert W. Chambers featured on HBO's hit TV series *True Detective*. By turns phantasmagoric, spectral, and demonic, this is a frighteningly good collection of stories. Filmmaker and longtime horror literature fan Guillermo del Toro serves as the curator for the Penguin Horror series, a new collection of classic tales and poems by masters of the genre. Included here are some of del Toro's favorites, from Mary Shelley's *Frankenstein* and Ray

Russell's short story "Sardonicus," considered by Stephen King to be "perhaps the finest example of the modern Gothic ever written," to Shirley Jackson's *The Haunting of Hill House* and stories by Ray Bradbury, Joyce Carol Oates, Ted Klein, and Robert E. Howard. Featuring original cover art by Penguin Art Director Paul Buckley, these stunningly creepy deluxe hardcovers will be perfect additions to the shelves of horror, sci-fi, fantasy, and paranormal aficionados everywhere.

This much anticipated collection of stories, written by Oxford University Fellow and Pain Scientist, Dr GL Moseley, provides an entertaining and informative way to understand modern pain biology. Described by critics as 'a gem' and by clinicians as 'entertaining and educative', *Painful Yarns* is a unique book. The stories, some of his travels in outback Australia, some of experiences growing up, are great yarns. The level of the pain education is appropriate for patients and health professionals. The entertainment is good for everyone. You don't have to be interested in pain to get something from this book and a laugh or two!

One hundred of the most evocative modern poems on joy, selected by an award-winning contemporary poet "Bursting with energy and surprising locutions. . . . Even the most familiar poets seem somehow new within the context of Joy."--David Skeel, *Wall Street Journal* "Wiman takes readers through the ostensible ordinariness of life and reveals the extraordinary."--Adrianna

Smith, The Atlantic Christian Wiman, a poet known for his meditations on mortality, has long been fascinated by joy and by its relative absence in modern literature. Why is joy so resistant to language? How has it become so suspect in our times? Manipulated by advertisers, religious leaders, and politicians, joy can seem disquieting, even offensive. How does one speak of joy amid such ubiquitous injustice and suffering in the world? In this revelatory anthology, Wiman takes readers on a profound and surprising journey through some of the most underexplored terrain in contemporary life. Rather than define joy for readers, he wants them to experience it. Ranging from Emily Dickinson to Mahmoud Darwish and from Sylvia Plath to Wendell Berry, he brings together diverse and provocative works as a kind of counter to the old, modernist maxim "light writes white"--no agony, no art. His rich selections awaken us to the essential role joy plays in human life.
