REA's MAXnotes for Alex Haley's *The Autobiography of Malcolm X* MAXnotes offer a fresh look at masterpieces of literature, presented in a lively and interesting fashion. Written by literary experts who currently teach the subject, MAXnotes will enhance your understanding and enjoyment of the work. MAXnotes are designed to stimulate independent thought about the literary work by raising various issues and thought-provoking ideas and questions. MAXnotes cover the essentials of what one should know about each work, including an overall summary, character lists, an explanation and discussion of the plot, the work's historical context, illustrations to convey the mood of the work, and a biography of the author. Each chapter is individually summarized and analyzed, and has study questions and answers. Amazon.com Review Malcolm X's searing memoir belongs on the small shelf of great autobiographies. The reasons are many: the blistering honesty with which he

recounts his transformation from a bitter, self-destructive petty criminal into an articulate political activist, the continued relevance of his militant analysis of white racism, and his emphasis on self-respect and self-help for African Americans. And there's the vividness with which he depicts black popular culture--try as he might to criticize those lindy hops at Boston's Roseland dance hall from the perspective of his Muslim faith, he can't help but make them sound pretty wonderful. These are but a few examples. The Autobiography of Malcolm X limns an archetypal journey from ignorance and despair to knowledge and spiritual awakening. When Malcolm tells coauthor Alex Haley, "People don't realize how a man's whole life can be changed by one book," he voices the central belief underpinning every attempt to set down a personal story as an example for others. Although many believe his ethic was directly opposed to Martin Luther King Jr.'s during the civil rights struggle of the '60s, the two were not so different. Malcolm may have displayed a most un-Christian distaste for loving his enemies, but he understood with King that love of God and love of self are the necessary first steps on the road to freedom. --Wendy Smith Review Biography, published in 1965, of the American black militant religious leader and activist who was born

Malcolm Little. Written by Alex Haley, who had conducted extensive audiotaped interviews with Malcolm X just before his assassination in 1965, the book gained renown as a classic work on black American experience. The Autobiography recounts the life of Malcolm X from his traumatic childhood plagued by racism to his years as a drug dealer and pimp, his conversion to the Black Muslim sect (Nation of Islam) while in prison for burglary, his subsequent years of militant activism, and the turn late in his life to more orthodox Islam. --The Merriam-Webster Encyclopedia of Literature

After top school officials decide that it's more important to protect the institution they work for than to look out for the best interests of teens who have been sexually abused by a teacher, a parent plans to find justice for the girls by killing three officials with prescription medicine. Reporter Nick Steele gets a call to write an obituary for one of the dead men. Steele, considered washed up by his newsroom colleagues, overcomes his own demons and unravels the murder plot as this question looms: Who dies next?

"Hell hath no fury like a mathematician whose child has been scorned by an education system that refuses to know better," Barry Garelick wrote in his first published article on math education in 2005. He has been at it ever since, and his focus has remained the same: why many of today's practices for teaching math are ineffective and often destructive. This collection brings together some of his best articles on math education over the past ten years. Garelick states: "In writing these articles, I often feel that I am explaining in detail why jumping out of an airplane without a parachute will result in death. And while I am heartened that my readers have found these articles useful, I am also disheartened when I hear the education establishment react with arguments that are tantamount to 'Oh but if you jump out of an airplane the right way, you can survive.'" Nevertheless there is a growing momentum in the U.S. against the well-intentioned but highly injurious nonsense that passes for math education. This collection of articles will assure those people who are convinced that it is being taught poorly that they are right. Reviews: "Barry Garelick is an invaluable source of clear-eyed analysis in a world of math education that is so often given over to fads, agendas, and assorted foolishness. Garelick approaches math instruction, curriculum, and reform with a studious expertise and a wry skepticism that is all too rare. His book will be a welcome resource for parents and teachers frustrated with math education and seeking hard-headed advice on what ought to be done differently." Frederick Hess, Director of Education Policy Studies at American Enterprise Institute "A teacher, a parent and a mathematics major, Garelick's first-hand accounts of his experiences navigating the world of math education are all too familiar to those of us who have experienced the negative impact of educational fads in mathematics classrooms. This book is a must read for parents, teachers and anyone who cares about the way math is taught in North American schools." Dr. Anna Stokke, associate professor of mathematics at the University of Winnipeg. "Barry Garelick's highly readable volume of essays uses a diverse set of critical lenses to trace the stories of--and convincingly impugn--math-instructional ideals and methods that have not yet come close to fulfilling their proponents' promises. Required reading for anyone growing weary of all the lagging results, faddish terminology, and upside-down approaches they see across American K-12 mathematics instruction." Eric Kalenze, author of "Education is Upside-Down" "Those who criticize traditional methods of teaching math are prone to spout wise-sounding homilies about the need to "teach children to think like mathematicians. Barry Garelick understands that if you want kids to think like a mathematician you need to teach them some math, not wait for them to discover basic procedures on their own. For those stubbornly committed to learning math through discovery, here's hoping they discover Garelick's book." Robert Pondiscio, Senior Fellow and Vice President for External Affairs, Thomas B. Fordham Institute

In an afterword to this new edition, Roediger discusses recent studies of whiteness and the changing face of labor itself. He surveys criticism of his work, accepting many objections whilst challenging others, especially the view that the study of working class racism implies a rejection of

Marxism and radical politics.

One of the U.S. government's leading China experts reveals the hidden strategy fueling that country's rise – and how Americans have been seduced into helping China overtake us as the world's leading superpower. For more than forty years, the United States has played an indispensable role helping the Chinese government build a booming economy, develop its scientific and military capabilities, and take its place on the world stage, in the belief that China's rise will bring us cooperation, diplomacy, and free trade. But what if the "China Dream" is to replace us, just as America replaced the British Empire, without firing a shot? Based on interviews with Chinese defectors and newly declassified, previously undisclosed national security documents, *The Hundred-Year Marathon* reveals China's secret strategy to supplant the United States as the world's dominant power, and to do so by 2049, the one-hundredth anniversary of the founding of the People's Republic. Michael Pillsbury, a fluent Mandarin speaker who has served in senior national security positions in the U.S. government since the days of Richard Nixon and Henry Kissinger, draws on his decades of contact with the "hawks" in China's military and intelligence agencies and translates their documents, speeches, and books to show how the teachings of traditional Chinese statecraft underpin their actions. He offers an inside look at how the Chinese really view America and its leaders – as barbarians who will be the architects of their own demise. Pillsbury also explains how the U.S. government has helped – sometimes unwittingly and sometimes deliberately – to make this "China Dream" come true, and he calls for the United States to implement a new, more competitive strategy toward China as it really is, and not as we might wish it to be. *The Hundred-Year Marathon* is a wake-up call as we face the greatest national security challenge of the twenty-first century.

INSTANT NEW YORK TIMES BESTSELLER An urgent primer on race and racism, from the host of the viral hit video series "Uncomfortable Conversations with a Black Man" "You cannot fix a problem you do not know you have." So begins Emmanuel Acho in his essential guide to the truths Americans need to know to address the systemic racism that has recently electrified protests in all fifty states. "There is a fix," Acho says. "But in order to access it, we're going to have to have some uncomfortable conversations." In *Uncomfortable Conversations With a Black Man*, Acho takes on all the questions, large and small, insensitive and taboo, many white Americans are afraid to ask—yet which all Americans need the answers to, now more than ever. With the same open-hearted generosity that has made his video series a phenomenon, Acho explains the vital core of such fraught concepts as white privilege, cultural appropriation, and "reverse racism." In his own words, he provides a space of compassion and understanding in a discussion that can lack both. He asks only for the reader's curiosity—but along the way, he will galvanize all of us to join the antiracist fight.

A child reflects on the meaning of being Black in this moving and powerful anthem about a people, a culture, a history, and a legacy that lives on. Red is a rainbow color. Green sits next to blue. Yellow, orange, violet, indigo, They are rainbow colors, too, but My color is black . . . And there's no

BLACK in rainbows. From the wheels of a bicycle to the robe on Thurgood Marshall's back, Black surrounds our lives. It is a color to simply describe some of our favorite things, but it also evokes a deeper sentiment about the incredible people who helped change the world and a community that continues to grow and thrive. Stunningly illustrated by Caldecott Honoree and Coretta Scott King Award winner Ekua Holmes, *Black Is a Rainbow Color* is a sweeping celebration told through debut author Angela Joy's rhythmically captivating and unforgettable words.

A dramatic shift is taking place in Israel and America. In Israel, the deepening occupation of the West Bank is putting Israeli democracy at risk. In the United States, the refusal of major Jewish organisations to defend democracy in the Jewish state is alienating many young liberal Jews from Zionism itself. In the next generation, the liberal Zionist dream, the dream of a state that safeguards the Jewish people and cherishes democratic ideals, may die. In *The Crisis of Zionism*, Peter Beinart lays out in chilling detail the looming danger to Israeli democracy and the American Jewish establishment's refusal to confront it. And he offers a fascinating, groundbreaking portrait of the two leaders at the centre of the crisis: Barack Obama, America's first 'Jewish president', a man steeped in the liberalism he learned from his many Jewish friends and mentors in Chicago; and Benjamin Netanyahu, the Israeli prime minister who considers liberalism the Jewish people's special curse. These two men embody fundamentally different visions, not just of American and Israeli national interests, but of the mission of the Jewish people itself. Beinart concludes with provocative proposals for how the relationship between American Jews and Israel must change, and with an eloquent and moving appeal for American Jews to defend the dream of a democratic Jewish state before it is too late.

The war cost her everything, a mother, a father, and a country. Four-year-old Bang Sun found tied to a tree, is riddled with disease, malnutrition, and bears the scars of a tragic life. Facing a future of nothing but pain, loss, and hopelessness, we follow the story of a mixed-race African-American child of the Korean War. When Korea begins purging itself of its unwanted casualties, babies of war, her abandonment leads to two orphanages and eventually to adoption in America – where Bang Sun must now become an American – a Black American. Fiercely resilient and embodying her birth country's hope as expressed in the song Arirang, Bang Sun, who becomes Sandra Henderson must learn to navigate a new language, a new culture, and a new family. Through it all, she holds resolutely to the imperfect memory from her five years in her homeland and tenaciously to that of the 'Boy' who saved her life. A powerful memoir of strength, grace, resilience, courage, and kindness, you'll find yourself immersed in this beautiful and inspiring recollection of the child called Bang Sun.

A supplemental textbook for middle and high school students, Hoosiers and the American Story provides intimate views of individuals and places in Indiana set within themes from American history. During the frontier days when Americans battled with and exiled native peoples from the East, Indiana was on the leading edge of America's westward expansion. As waves of immigrants swept across the Appalachians and eastern waterways, Indiana became established as both a crossroads and as a vital part of Middle America. Indiana's stories illuminate the history of

American agriculture, wars, industrialization, ethnic conflicts, technological improvements, political battles, transportation networks, economic shifts, social welfare initiatives, and more. In so doing, they elucidate large national issues so that students can relate personally to the ideas and events that comprise American history. At the same time, the stories shed light on what it means to be a Hoosier, today and in the past.

After years of working to change schools from within-testifying before Congress and addressing audiences around the world about how to make schools better places for children-John Holt founded *Growing Without Schooling* magazine in 1977 to support self-directed education and learning outside of school. Each issue is a lively exchange among readers and Holt, packed with useful advice, resource recommendations, and all sorts of legal, pedagogical, and parenting ideas from people who pioneered what we now call homeschooling. John Holt (1983-1985) is the author of *How Children Learn* and *How Children Fail*, which together have sold over a million and a half copies, and eight other books about children and learning. His work has been translated into more than 40 languages. Once a leading figure in school reform, John Holt became increasingly

interested in how children learn outside of school. The magazine he founded, *Growing Without Schooling* (GWS), reflects his philosophy, which he called unschooling. GWS was published from 1977 to 2001 and is the first magazine devoted to homeschooling and self-directed education.

The author of *Race for Profit* carries out "[a] searching examination of the social, political and economic dimensions of the prevailing racial order" (Michelle Alexander, author of *The New Jim Crow*). In this winner of the Lannan Cultural Freedom Prize for an Especially Notable Book, Keeanga-Yamahtta Taylor "not only exposes the canard of color-blindness but reveals how structural racism and class oppression are joined at the hip" (Robin D. G. Kelley, author of *Freedom*

Dreams). The eruption of mass protests in the wake of the police murders of Michael Brown in Ferguson, Missouri, and Eric Garner in New York City have challenged the impunity with which officers of the law carry out violence against black people and punctured the illusion of a post-racial America. The Black Lives Matter movement has awakened a new generation of activists. In this stirring and insightful analysis, activist and scholar Keeanga-Yamahtta Taylor surveys the historical and contemporary ravages of racism and the persistence of structural inequality, such as mass incarceration and black unemployment. In this context, she argues that this new struggle against police violence holds the potential to reignite a broader push for black liberation. "This brilliant book is the best analysis we have of the #BlackLivesMatter moment of the long struggle for freedom in America. Keeanga-Yamahtta Taylor has emerged as the most sophisticated and courageous radical intellectual of her generation." —Dr. Cornel West, author of *Race Matters* "A must read for everyone who is serious about the ongoing praxis of freedom." —Barbara Ransby, author of *Ella Baker and the Black Freedom Movement* "[A] penetrating, vital analysis of race and class at this critical moment in America's racial history." —Gary Younge, author of *The Speech: The Story Behind Dr. Martin Luther King Jr.'s Dream*
