EMERSON PATEL

Campbell Biology Cliffs Notes

Each of the eight units reflect the progress in scientific understanding of biological processes at many levels, from molecules to ecosystems.

AP® *Biology Crash Course, For the New 2020 Exam, Book + Online* Academic Press

Techniques for plant cell and tissue culture developed over the past 20 years, are having a profound effect on the world of botanical research and in industries from agriculture to pharmaceuticals. This book examines the theory behind plant cell and tissue culture techniques and processes, before going on to examine their application. Throughout the book, the authors highlight current problems and discuss likely future developments - especially in cases where basic research is only just beginning to find commercial applications.

Strengthening Forensic Science in the United States Elsevier

These skill-building flashcards of 600 essential AP terms make it easy to remember what you need

to know on exam day 5 Steps to a 5: AP Biology Flashcards features 600 key terms that expert author Mark Anestis has selected as ones that frequently appear on AP Biology exams. This extra tool increases your knowledge and helps you achieve up to a maximum 5 score. You now have an additional way to master the key terms that are the basis of AP Biology success, delivered in a format that is convenient for your lifestyle. Topics include: Chemistry • Cells • Respiration • Photosynthesis • Cell Division • Heredity • Molecular Genetics • Evolution • Taxonomy & Classification • Plants • Human Physiology • Human Reproduction • Behavioral Ecology & Ethology • Ecology in Further Detail • Laboratory Review

Elsevier
 The Practice of Medicinal Chemistry, Fourth Edition provides a practical and comprehensive overview of the daily issues facing pharmaceutical researchers and chemists. In addition to its thorough treatment of basic medicinal chemistry principles, this updated edition has been revised to provide new and expanded coverage of the latest technologies and approaches in drug discovery. With topics like high content screening, scoring, docking, binding free energy calculations, polypharmacology, QSAR, chemical collections and databases, and much more, this

book is the go-to reference for all academic and pharmaceutical researchers who need a complete understanding of medicinal chemistry and its application to drug discovery and development. Includes updated and expanded material on systems biology, chemogenomics, computer-aided drug design, and other important recent advances in the field Incorporates extensive color figures, case studies, and practical examples to help users gain a further understanding of key concepts Provides high-quality content in a comprehensive manner, including contributions from international chapter authors to illustrate the global nature of medicinal chemistry and drug development research An image bank is available for instructors at www.textbooks.elsevier.com

The Practice of Medicinal Chemistry Macmillan Higher Education

Campbell Essential Biology, Fifth Edition, makes biology irresistibly interesting for non-majors biology students. This best-selling book, known for its scientific accuracy and currency, makes biology relevant and approachable with increased use of analogies, real world examples, more conversational language, and intriguing questions. Campbell Essential Biology make biology irresistibly interesting. NOTE: This is the standalone book, if you want the book/access card package order the ISBNbelow; 0321763335 / 9780321763334 Campbell Essential Biology Plus

MasteringBiology with eText -- Access Card Package Package consists of: 0321772598 / 9780321772596 Campbell Essential Biology 0321791711 / 9780321791719 MasteringBiology with Pearson eText -- Valuepack Access Card -- for Campbell Essential Biology (with Physiology chapters) "

Campbell Essential Biology Elsevier

Biology of Stress in Fish: Fish Physiology provides a general understanding on the topic of stress biology, including most of the recent advances in the field. The book starts with a general discussion of stress, providing answers to issues such as its definition, the nature of the physiological stress response, and the factors that affect the stress response. It also considers the biotic and abiotic factors that cause variation in the stress response, how the stress response is generated and controlled, its effect on physiological and organismic function and performance, and applied assessment of stress, animal welfare, and stress as related to model species. Provides the definitive reference on stress in fish as written by world-renowned experts in the field Includes the most recent advances and up-to-date thinking about the causes of stress in fish, their implications, and how to minimize the negative effects Considers the biotic and abiotic factors that cause variation in the stress response

Biology of Stress in Fish Academic Press

Biology for AP® courses covers the scope and sequence requirements of a typical two-semester Advanced Placement® biology course. The text provides comprehensive coverage of foundational research and core biology concepts through an evolutionary lens. Biology for AP® Courses was designed to meet and exceed the requirements of the College Board's AP® Biology framework while allowing significant flexibility for instructors. Each section of the book includes an introduction based on the AP® curriculum and includes rich features that engage students in scientific practice and AP® test preparation; it also highlights careers and research opportunities in biological sciences.

Raven, Biology © 2017, 11e (Reinforced Binding) AP Focus Review Guide Academic Press

Students can master key concepts and earn a better grade with the thought-provoking exercises found in this study guide. A wide range of questions and activities helps students test their understanding of biology.

5 Steps to a 5 AP Biology Flashcards Princeton Review

The Paramedic Association of Canada, together with the American Academy of Orthopaedic Surgeons and Jones and Bartlett Publishers are proud to continue Dr. Nancy Caroline's legacy by introducing Emergency Care in the Streets--Canadian Edition! Dr. Caroline's work transformed EMS and the entire paramedic field. She created the first national standard curriculum for paramedic training in the United States. She also wrote the first paramedic textbook: Emergency Care in the Streets. In 2007, we welcomed back Emergency Care in the Streets with the publication of the Sixth Edition in the United States. Now, this program has been rewritten and revised by Canadian EMS experts specifically for Canadian paramedics, using the National Occupational Competency Profiles.

Note: You are purchasing a standalone product; MyLab™ & Mastering™ does not come packaged with this content. Students, if interested in purchasing this title with MyLab & Mastering, ask your instructor for the correct package ISBN and Course ID. Instructors, contact your Pearson representative for more information. If you would like to purchase both the physical text and MyLab & Mastering, search for: 0134082311 / 9780134082318 Campbell Biology Plus MasteringBiology with eText -- Access Card Package Package consists of: 0134093410 / 9780134093413 Campbell Biology 0134472942 / 9780134472942 MasteringBiology with Pearson eText -- ValuePack Access Card -- for Campbell Biology The World's Most Successful Majors Biology Text and Media Program are Better than Ever The Eleventh Edition of the best-selling Campbell BIOLOGY sets students on the path to success in biology through its clear and engaging narrative, superior skills instruction, innovative use of art and photos, and fully integrated media resources to enhance teaching and learning. To engage learners in developing a deeper understanding of biology, the Eleventh Edition challenges them to apply their knowledge and skills to a variety of new hands-on activities and exercises in the text and online. Content updates throughout the text reflect rapidly evolving research, and new learning tools include Problem-Solving Exercises, Visualizing Figures, Visual Skills Questions, and more. Also Available with MasteringBiology™ MasteringBiology is an online homework, tutorial, and assessment product designed to improve results by helping students quickly master concepts. Features in the text are supported and

integrated with MasteringBiology assignments, including new Figure Walkthroughs, Galapagos Evolution Video Activities, Get Ready for This Chapter questions, Visualizing Figure Tutorials, Problem-Solving Exercises, and more.

Educated McGraw-Hill Education

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The factors governing life on earth are changing constantly and the same is true for life too. The unique property of the living forms is their ability to change themselves, accepting the challenge caused by changes in the surroundings and this has enabled them to exploit the environment successfully, leading to their survival, multiplication and continuation on earth since first appearance. The association of man and animals dates back to the prehistoric period. The prehistoric men knew animals; they could distinguish them from one another, from different angles, primarily from their daily needs and safety. The early Egyptians knew quite a lot about animals, and domesticated cattle, sheep, cats and ducks. Today the tree of Animal Science has grown steadily for millions of years, diversifying it in many branches. Our ever-increasing knowledge in Animal Science has enabled us to apply this science in human benefit, ranging from prevention of diseases to production of various items for our use, introduction and stabilization of new hybrids, and in many other fields. Hence, the Animal Science has attained new and advance spectrum, which is visible in this book. Therefore, it is to be noted that the present book is a unique compilation of most recent research articles in various fields of Zoology and will be very much helpful for students, research scholars, and college or university teachers. Contents Chapter 1: Fish and Human Welfare with Special Reference to its Conservation Strategies by Arvind Kumar and C Bohra; Chapter 2: Ageing Biology and Related Growth Statistics of a Freshwater Fish *Tor chilinooides* (Pisces: Cyprinidae) from Garhwal Himalaya, India by S P Uniyal, Anoop K Dobriyal and H K Joshi; Chapter 3: Role of Birds in the Seed Dispersal of *Zizyphus oenoplia* (Mill) in a Tropical Deciduous Forest of Central India by R M Mishra and Atul Mishra; Chapter 4: Avian Community of Orchard and its Surrounding Eucalyptus Windbreak in Punjab Agricultural University, University Campus, Punjab by Sumit Chakravarty and J S Sandhul; Chapter 5: Influence of Sago Wastes-Pressmud Mixture on the Growth and Reproduction of an Indian Epigeic Earthworm *Perionyx excavatus* (Perrier) by A Mary Violet Christy and R Ramalingam; Chapter 6: Parasites of Uzi Fly, *Exorista sorbillans* Wiedemann (Diptera: Tachinidae) III Biology of *Nesolynx thymus* (Girault) (Hymenoptera: Eulophidae) by Anand Kumar; Chapter 7: Humoral and Cellular Immunomodulation Induced by Endosulfan in Swiss Albino Mice by P Dhasarathan, A J A Ranjithsing and N Sukumaran; Chaptre 8: Effect of Parathion on Haemoglobin Content in Mice by Md Aftab Alam, Pankaj Kumar,

Ranjana and A P Mishra; Chapter 9: First Record of *Pontosclex corethrurus* (Muller, 1856) (Oligochaeta: Glossoscolecidae) from Rajasthan by P Bhardwaj and S S Suthar; Chapter 10: Scanning Electron Microscopic Observation of Armpit Gland Secretion in Field Mouse, *Mus booduga* (L) by S Kannan and P Ponmanickam; Chapter 11: Food Preference of *Eisenia fetida* (Savigny, 1826) Under Varying Temperature and pH by N Dhiman and S K Battish; Chapter 12: Host Parasitoid Density Relationship Between *Sylepta derogata* (Lepidoptera) and *Apanteles blateatae* (Hymenoptera: Braconidae) by T V Sathe; Chapter 13: Comparison of Mosquito Fauna in Srivilliputhur Town and Krishnankovil Village, Tamil Nadu by K Karuppasamy and T Sooravan; Chapter 14: A Study on Proteins During the Postnatal Development of Brain in Rat, *Rattus norvegicus* by D Anusuya and D J Prakash; Chapter 15: Thrombocytopenic Effect of Buprenorphine in Mice by Dhriti Banerjee and Nirmal Kumar Sarkar; Chapter 16: Chemical Impact on the Histological Studies of the Thyroid in the Freshwater Fish *Channa orientalis* (Sch) by S V Deshmukh and K M Kulkarni; Chapter 17: Length-weight Relationship and Relative Condition in *Catla-catla* (Ham) from a Pond in Jabalpur by Reeta Solanki, K K Dubey and A K Mandloi; Chapter 18: Alteration in Oxygen Consumption in Freshwater Snail *Bellamya bengalensis* (Lamarck) During Pesticide Exposure by P H Rohankar & K M Kulkarni; Chapter 19: Studies on the Efficacy of Five Botanical Extracts as Pupicidal against *Trogoderma granarium* (Everts) by S C Dwivedi and Nidhi Bala Shekhawat; Chapter 20: Length-weight Relationship Between Body and Brain in *Puntius conchoniis* (Pisces: Cyprinidae) by Pankaj K Bahuguna, Hemant K Joshi, Sandhya Goswami and Anoop K Dobriyal; Chapter 21: Mosquito Larvivorous Potential of Some Indigenous Fishes by Rajiv Shrivastava, S K Goyal, P K Mishra, Kapil Soni & R C Saxena; Chapter 22: Role of Liv-52 in Protection Against Vanadium Intoxication by Shakti Bhardwaj and R Mathur; Chapter 23: Seasonal Incidence of Diamondback Moth on Cabbage by A P Chavan, D B Pawar, D B Kadam and S P Kalthapure; Chapter 24: A Comparative Study on Some Enzymes of the Atrial and Ventricular Tissues of the Heart of Albino Rats Employing Snake Venoms of Two Different Geographical Locations by D Mukherjee and C R Maity; Chapter 25: On a New Species of Genus *Mehraorchis* from the Gall Bladder of *Rana cyanophlyctis* by Anjna Prema Vandana Khalkho, M T Dan and Umapati Sahay; Chapter 26: Effect of Opium on Certain Biochemical Constituents of Albino Rat, *Rattus norvegicus* by Arti Kumari and B P Akela; Chapter 27: New Record of Wild Silk Caterpillar, *Cricula trifenestrata* Heifer on Large Cardamon and Notes on its Biology by Sujata Yadav & Anand Kumar; Chapter 28: Inheritance of Resistance in Interspecific Hybrid Cotton to *Helicoverpa armigera* (Hubner) by Pandurang B Mohite and S Uthamasamy; Chapter 29: Collection of Fishes from Khaji-Kotnoor Reservoir by Padmavathi and K Vijaykumar; Chapter 30: Haemato-biochemical Variation Induced by *Monocrotophos* in *Cyprinus carpio* During the Exposure and Recovery Period by C Maruthanayagam and G Sharmila; Chapter 31:Growth Inhibition Activity of Quercitrin Flavonoidal Compound on *Earias fabia* (Stall) by Sunil Dubey, P K Misra, R C Saxena, Rahul Kavale & S Patel; Chapter 32: Aquatic Insects in the Lentic Systems of North Cachar Hills, Assam, India Tara Nandi Majumdar and Abhik Gupta; Chapter 33: Identification of Mulberry Genotypes Suitable for Cocoon Characters of Silkworm, *Bombyx mori* L by B Sannappa, Ramakrishna Naika, J Shanthala & R Govindan; Chapter 34: Cadmium Chloride Impact on Thyroid of the Fish *Channa orientalis* (Sch) by S V Deshmukh and K M Kulkarni; Chapter 35: Effect of Environmental Parameter (Light) on Pineal Secretion in the Wistar Albino Rat by Pravin P Joshi & K M Kulkarni; Chapter 36: Alternation in Nucleic Acid (DNA and RNA) Concentration of a Freshwater Fish *Tilapia mossambicus* Peters Under Fluoride Stress Condition by M K Mahapatra, B P Das and M Shedpure; Chapter 37: A Study of Amylase Activity in Some Indian Prawns by Papree Chatterjee, Tushar Kanti Mukhopadhyay and Nirmal Kumar Sarkar; Chapter 38: Effect of Chlorine on Common Carps by C Bala Murali Krishna; Chapter 39: A New Species of *Microvelia* Westwood, 1834 from India by Y C Gupta and V K Khandelwal; Chapter 40: Holistic Approach in Biological Phenomena by M P Chaudhary; Chapter 41: The Prevalence Rate of Certain Stomach and Nodular Helminths of Pigs Belonging to Agra and Neighbouring Areas by Rajesh Prakash; Chapter 42: Rapid Screening Technique for Measuring Antibiosis to *Helicoverpa armigera* (Hubner) in Wild *Gossypium* spp by Panduran B Mohite and S Uthamasamy; Chapter 43:Impact of Flyash of a Thermal Power Station on Biochemical Parameters of a Shrimp, *Panaeus monodon* Inhabiting Ennore Brackishwater by E Ekambaram and D Sudarsanam; Chapter 44: Haemato-biochemical Studies on Some Economically Important North Indian Fishes III On the Seasonal Variation of Organic Metabolite-Glucose by S K Singh, K N Srivastava and Amar Kumar; Chapter 45: Effect of Body Weight and Sex on Liver Glycogen Level of *Heteropneustes fossilis* (Bloch) by B P Akela; Chapter 46: Braconid Parasitoids Associated with Rice Insect Pests in India by Arshad Ali Raider and Md Noor Alam; Chapter 47:

Evaluation of a New Molecule, Spinosad 2.5 SC for the Management of Diamond Blackmoth *Plutella xylostella* on Cauliflower by Panduran, B Mohite, Sarjerao A Patil and Babruwan B Gaikwad.

[Animal Science Research](#) Academic Press

Building on the foundation set in Volume I—a landmark synthesis of research in the field—Volume II is a comprehensive, state-of-the-art new volume highlighting new and emerging research perspectives. The contributors, all experts in their research areas, represent the international and gender diversity in the science education research community. The volume is organized around six themes: theory and methods of science education research; science learning; culture, gender, and society and science learning; science teaching; curriculum and assessment in science; science teacher education. Each chapter presents an integrative review of the research on the topic it addresses—pulling together the existing research, working to understand the historical trends and patterns in that body of scholarship, describing how the issue is conceptualized within the literature, how methods and theories have shaped the outcomes of the research, and where the strengths, weaknesses, and gaps are in the literature. Providing guidance to science education faculty and graduate students and leading to new insights and directions for future research, the Handbook of Research on Science Education, Volume II is an essential resource for the entire science education community.

Biology U.S. Government Printing Office

Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers”—are at the foundation of children’s well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child’s brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents’ lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents’ use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

Biology for the AP® Course Elsevier Inc. Chapters

The major new course text has been written by experienced authors to provide coverage of the Advanced Subsidiary (AS) and Advanced GCE Biology and Human Biology specifications in a single book. Advanced Biology provides clear, well-illustrated information, which will help develop a full understanding of biological structure and function and of relevant applications. The topics have been carefully organised into parts, which give a logical sequence to the book. This new text has

been developed to replace the best-selling titles *Biology: Principles and Processes* and *Biology, A Functional Approach*. Features include: full-colour design with clear diagrams and photographs; up-to-date information on biotechnology, health, applied genetics and ecology; clearly written text using the latest Institute of Biology terminology; a useful summary and a bank of practice questions at the end of every chapter; support boxes help bridge the gap from GCSE or equivalent courses; extension boxes providing additional depth of content - some by guest authors who are experts in their field; and a comprehensive index so you can quickly locate information with ease. There is also a website providing additional support that you can access directly at www.advancedbiology.co.uk.

Explore *Biology for the AP® Course*, a textbook program designed expressly for AP® teachers and students by veteran AP® educators. *Biology for the AP® Course* provides content organized into modules aligned to the CED, AP® skill-building instruction and practice, stunning visuals, and much more.

Principles of Bone Biology Kaplan Publishing

The field of gender-specific medicine examines how normal human biology and physiology differ between men and women and how the diagnosis and treatment of disease differs as a function of gender. This revealing research covers various conditions that predominantly occur in men as well conditions that predominantly occur in women. Among the areas of greatest difference are cardiovascular disease, mood disorders, the immune system, lung cancer as a consequence of smoking, osteoporosis, diabetes, obesity, and infectious diseases. The Second Edition of *Principles of Gender-Specific Medicine* focuses on the essentials of gender-specific medicine and the current study of sex and gender differences in human physiology and pathophysiology. New section editors, new chapter authors, and new chapters have been added to reflect the most up-to-date clinical research and practice. Offers insight into how the gender-specific risks of one organ system’s disease affects the health of other organ systems Outlines the sex-specific differences of normal anatomy and physiology Illustrates the gender-specific features and quantifies "gender" and "sex" as risk factors across all major diseases Qualifies and analyzes the results of new drug therapies designed with gender-specific differences in mind: ex, hormone therapy in men and women for the prevention and treatment of cardiovascular disease All chapters progress translationally from the basic science to the clinical applications of gender-specific therapies, drugs, or treatments Sections on drug metabolism, aging, and meta-analysis of data incorporated into all disease-specific chapters

Principles of Gender-Specific Medicine McGraw Hill Professional

Kaplan’s AP Biology Prep Plus 2020 & 2021 is revised to align with the 2020 exam changes. This edition features pre-chapter assessments to help you review efficiently, lots of practice questions in the book and even more online, 3 full-length practice tests, complete explanations for every question, and a concise review of the most-tested content to quickly build your skills and confidence. With bite-sized, test-like practice sets, expert strategies, and customizable study plans, our guide fits your schedule whether you need targeted prep or comprehensive review. We’re so confident that AP Biology Prep Plus offers the guidance you need that we guarantee it: after studying with our online resources and book, you’ll score higher on the AP exam—or you’ll get your money back. The College Board has announced that there are May 2021 test dates available are May 3-7 and May 10-14, 2021. To access your online resources, go to kaptest.com/moreonline and follow the directions. You’ll need your book handy to complete the process. Personalized Prep. Realistic Practice. 3 full-length practice exams with comprehensive explanations and an online test-scoring tool to convert your raw score into a 1-5 scaled score Pre- and post-quizzes in each

chapter so you can monitor your progress and study exactly what you need Customizable study plans tailored to your individual goals and prep time Online quizzes for additional practice -Focused content review of the essential concepts to help you make the most of your study time Test-taking strategies designed specifically for AP Biology Expert Guidance We know the test—our AP experts make sure our practice questions and study materials are true to the exam. We know students—every explanation is written to help you learn, and our tips on the exam structure and question formats will help you avoid surprises on Test Day. We invented test prep—Kaplan (kaptest.com) has been helping students for 80 years, and 9 out of 10 Kaplan students get into one or more of their top-choice colleges.

How Tobacco Smoke Causes Disease Elsevier Health Sciences

Advances in Protein Molecular and Structural Biology Methods offers a complete overview of the latest tools and methods applicable to the study of proteins at the molecular and structural level. The book begins with sections exploring tools to optimize recombinant protein expression and biophysical techniques such as fluorescence spectroscopy, NMR, mass spectrometry, cryo-electron microscopy, and X-ray crystallography. It then moves towards computational approaches, considering structural bioinformatics, molecular dynamics simulations, and deep machine learning technologies. The book also covers methods applied to intrinsically disordered proteins (IDPs) followed by chapters on protein interaction networks, protein function, and protein design and engineering. It provides researchers with an extensive toolkit of methods and techniques to draw from when conducting their own experimental work, taking them from foundational concepts to practical application. Presents a thorough overview of the latest and emerging methods and technologies for protein study Explores biophysical techniques, including nuclear magnetic resonance, X-ray crystallography, and cryo-electron microscopy Includes computational and machine learning methods Features a section dedicated to tools and techniques specific to studying intrinsically disordered proteins

Bones and Cartilage National Academies Press

#1 NEW YORK TIMES, WALL STREET JOURNAL, AND BOSTON GLOBE BESTSELLER • One of the most acclaimed books of our time: an unforgettable memoir about a young woman who, kept out of school, leaves her survivalist family and goes on to earn a PhD from Cambridge University “Extraordinary . . . an act of courage and self-invention.”—The New York Times NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY THE NEW YORK TIMES BOOK REVIEW • ONE OF PRESIDENT BARACK OBAMA’S FAVORITE BOOKS OF THE YEAR • BILL GATES’S HOLIDAY READING LIST • FINALIST: National Book Critics Circle’s Award In Autobiography and John Leonard Prize For Best First Book • PEN/Jean Stein Book Award • Los Angeles Times Book Prize Born to survivalists in the mountains of Idaho, Tara Westover was seventeen the first time she set foot in a classroom. Her family was so isolated from mainstream society that there was no one to ensure the children received an education, and no one to intervene when one of Tara’s older brothers became violent. When another brother got himself into college, Tara decided to try a new kind of life. Her quest for knowledge transformed her, taking her over oceans and across continents, to Harvard and to Cambridge University. Only then would she wonder if she’d traveled too far, if there was still a way home. “Beautiful and propulsive . . . Despite the singularity of [Westover’s] childhood, the questions her book poses are universal: How much of ourselves should we give to those we love? And how much must we betray them to grow up?”—Vogue NAMED ONE OF THE BEST BOOKS OF THE YEAR BY The Washington Post • O: The Oprah Magazine • Time • NPR • Good Morning America • San Francisco Chronicle • The Guardian • The Economist • Financial Times • Newsday • New York Post • theSkimm • Refinery29 • Bloomberg • Self • Real Simple • Town & Country • Bustle • Paste • Publishers Weekly • Library Journal • LibraryReads • Book Riot • Pamela Paul, KQED • New York Public Library
