GRAHAM GOODMAN

Autonomous and Self-Directed Learning Springer Nature
 Three-fourths of scientific research in the United States is funded by special interests. Many of these groups have specific practical goals, such as developing pharmaceuticals or establishing that a pollutant causes only minimal harm. For groups with financial conflicts of interest, their scientific findings often can be deeply flawed. To uncover and assess these scientific flaws, award-winning biologist and philosopher of science Kristin Shrader-Frechette uses the analytical tools of classic philosophy of science. She identifies and evaluates the concepts, data, inferences, methods, models, and conclusions of science tainted by the influence of special interests. As a result, she challenges accepted scientific findings regarding risks such as chemical toxins and carcinogens, ionizing radiation, pesticides, hazardous-waste disposal, development of environmentally sensitive lands, threats to endangered species, and less-protective standards for workplace-pollution exposure. In so doing, she dissects the science on which many contemporary scientific controversies turn. Demonstrating and advocating "liberation science," she shows how practical, logical, methodological, and ethical evaluations of science can both improve its quality and credibility -- and protect people from harm caused by flawed science, such as underestimates of cancers caused by bovine growth hormones, cell phones, fracking, or high-voltage wires. This book is both an in-depth look at the unreliable scientific findings at the root of contemporary debates in biochemistry, ecology, economics, hydrogeology, physics, and zoology -- and a call to action for scientists, philosophers of science, and all citizens.

Military Quality of Life and Veterans Affairs, and Related Agencies Appropriations for 2007: Overview, quality of life, related agencies Peterson's

A reference for how to build and maintain a CV, with samples, cover letters, and strategic features for particular situations, along with how to transform a CV into a résumé.

Peterson's Graduate Programs in Business, Education, Health, Information Studies, Law & Social Work 2012 Springer Nature
 Since Jan. 1901 the official proceedings and most of the papers of the American Association for the Advancement of Science have been included in Science.

Agronomy News Peterson's

Peterson's MBA Programs provides comprehensive profiles of up-to-date information on full-time, part-time, joint-degree, Executive MBA, and online graduate programs at more than 1,000 institutions, including degrees comparable or equivalent to an

MBA. A wealth of facts and figures on admission and degree requirements, entrance difficulty, postgraduate hiring rates, financial aid, and contact information for approximately 4,000 graduate-level business programs are all available within Peterson's guide. It contains informative articles such as how an MBA can advance a career, how to choose the right program and pay for it, the advantages of getting your advanced business degree abroad, information on the latest hiring and salary trends, and application tips, including guidance on how to write a winning essay. Profiles of institutions are listed alphabetically within state, province, or country, with all the fast facts an applicant needs-- plus two-page narrative descriptions which contain even more in-depth information on schools.

US Black Engineer & IT McGraw-Hill Companies

This book provides detailed information on the base catalysis of group 5 (Nb, Ta) metal oxide clusters by elucidating how the structural factors such as constituent metals, counter cations, and local structures of base sites affect their catalysis. Uniquely, it reveals the effects of key structural factors at the molecular level by combining experimental and theoretical approaches. The findings presented here provide rational design principles for base catalysis and will foster the development of promising catalysts for solving current and future energy and environmental problems.

Resume Writing and Interviewing Techniques that Work Oxford University Press

Accompanying disk contains resume templates. The resumes are located in directories corresponding to the appropriate chapter in the book text; filenames correspond to sample resumes within that chapter.

Journal of the American Veterinary Medical Association Peterson's

Peterson's Graduate Programs in Business, Education, Information Studies, Law & Social Work 2014 contains comprehensive profiles of more than 11,000 graduate programs in disciplines such as, accounting & finance, business administration & management, education, human resources, international business, law, library & information studies, marketing, social work, transportation management, and more. Up-to-date info, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable data on degree offerings, professional accreditation, jointly offered degrees, part-time & evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. Also find valuable articles on financial

assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Curriculum Vitae Watertree Press

Offers strong, impressive resumes that lead to the right job To stand out among the hundreds of job seekers applying for any position, it's vital to have a resume that hits the target every time. Each book in this series offers: Nearly 100 sample resumes and 20 cover letters for each field A variety of eye-catching resume formats Tips on highlighting strengths and using active vocabulary Work sheets for gathering personal information And much more

This journal is devoted to the latest research on physics, publishing articles on everything from elementary particle behavior to black holes and the history of the universe.

Environmental Health Perspectives Peterson's
 Peterson's Graduate Programs in Business, Education, Health, Information Studies, Law & Social Work 2012 contains a wealth of info on accredited institutions offering graduate degrees in these fields. Up-to-date info, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable data on degree offerings, professional accreditation, jointly offered degrees, part-time & evening/weekend programs,

postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. Also find valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Black Issues in Higher Education Neal-Schuman Publishers
 Starting a career as a librarian, moving, or looking for a new job? Robert Newlen offers this brand new, comprehensive resource as a guide to get you through every step of landing the ideal library job. Detailed guidance for authoring attention-grabbing cover letters, the most important part of any application package, will help you capture that administrator's attention and get your resume and application read.

New Scientist

This book provides insight into research and development of key aerospace materials that have enabled some of the most exciting air and space technologies in recent years. The stories are shared with you by the women who experienced them, those engineers

and scientists in the labs, on the shop floors, or on the design teams contributing to the realization of these technologies. Their work contributes to the world in the challenging and vital field of aerospace materials, and their stories seethe with a pride and a passion for the opportunity to make these important contributions. As an important part of the Women in Science and Engineering book series, the work highlights the contribution of women leaders in Aerospace Materials, inspiring women and men, girls and boys to enter and apply themselves to secure our future in an increasingly connected world.

The Curriculum Vitae Handbook

Peterson's Graduate Programs in the Biological/Biomedical Sciences & Health-Related Medical Professions 2015 contains profiles of 6,750 graduate programs at over 1,200 institutions in the biological/biomedical sciences and health-related/medical professions. Informative data profiles are included for 6,750 graduate programs in every available discipline in the biological and biomedical sciences and health-related medical professions, including facts and figures on accreditation, degree requirements, application deadlines and contact information, financial support, faculty, and student body profiles. Two-page in-depth descriptions, written by featured institutions, offer complete details on specific graduate program, school, or department as well as information on faculty research and the college or

university. Comprehensive directories list programs in this volume, as well as others in the graduate series.

Resumes for Education Careers

For nearly two decades, Professor Michael K. Ponton and Paul B. Carr have formulated discussions of self-directed and autonomous learning by building upon the conceptual frameworks provided by Professors Emeriti Gary Confessore (learner autonomy and conation) and Albert Bandura (social cognitive theory, human agency, and self-efficacy). Using an agentic perspective of personal agency to describe learning, the agent as a learner engages in forethought to adopt goals of personal value and formulate learning plans; reacts to this ideation by enacting plans; reflects upon consequences and outcomes; and uses this acquired information to inform future learning plans. Their work and that with their colleagues has included both theoretical discussions and original research. This edited compendium, primarily consisting of previously published articles, is the result of those efforts.

Curriculum Vitae

Peterson's Graduate Programs in the Humanities, Arts & Social Sciences 2014 contains comprehensive profiles of more than 11,000 graduate programs in disciplines such as, applied arts & design, area & cultural studies, art & art history, conflict

resolution & mediation/peace studies, criminology & forensics, language & literature, psychology & counseling, religious studies, sociology, anthropology, archaeology and more. Up-to-date data, collected through Peterson's Annual Survey of Graduate and Professional Institutions, provides valuable information on degree offerings, professional accreditation, jointly offered degrees, part-time and evening/weekend programs, postbaccalaureate distance degrees, faculty, students, requirements, expenses, financial support, faculty research, and unit head and application contact information. There are helpful links to in-depth descriptions about a specific graduate program or department, faculty members and their research, and more. There are also valuable articles on financial assistance, the graduate admissions process, advice for international and minority students, and facts about accreditation, with a current list of accrediting agencies.

Curriculum Vitae : Collected Poems

Sept.-Oct. issue includes list of theses and dissertations for U.S. and Canadian graduate degrees granted in crop science, soil science, and agronomic science during the previous academic year.
