"Picking up accounting as a language and as a skill will add credibility to your CV and enhance your employability. Any job role you may be involved with - from an HR manager, to investment banker, to a self-employed musician - they all require, and are done better with, a basic grasp and understanding of accounting to be able to

make financially sound decisions on a daily basis. Warren Buffet is an example - not an accountant - but making a good use of accounting in his investment and business dealings to notable success"---.

Among the uncertainties are the lack of formalization of lessons learned regarding the

impacts of previous programs and projects. Beyond the challenges of generating the proper information on these impacts, there are other difficulties that relate with how to socialize the information and knowledge gained so that change is transformational and enduring. The main complexities lie in understanding the interactions of social-ecological

systems at different scales and how they varied through time in response to policy and other processes. This volume is part of a broad research effort to develop an independent evaluation of certification impacts with stakeholder input, which focuses on FSC certification of natural tropical forests. More specifically, the evaluation program aims at building the evidence base

of the empirical biophysical, social, economic, and policy effects that FSC certification of natural forest has had in Brazil as well as in other tropical countries. The contents of this volume highlight the opportunities and constraints that those responsible for managing natural forests for timber production have experienced in their efforts to improve their practices in Brazil. As

such, the goal of the studies in this volume is to serve as the foundation to design an impact evaluation framework of the impacts of FSC certification of natural forests in a participatory manner with interested parties, from institutions and organizations, to communities and individuals.
