*Air Pollution Modeling and Its Application*  
XVII International Monetary Fund  
This book analyzes the economic development choices initiated by Morocco's King Mohammed VI since he ascended the throne in 1999 and situates those choices in the political

economy development literature. Examining the policies enacted by the King, the authors argue that over the past twenty years Mohammed VI has achieved some outstanding successes in modernizing the foundational economic sectors of Morocco, but the benefits of this development have not reached all Moroccans. With its focus on economic development, this book explores the way in which Mohammed VI's development

strategies have, in part, resembled the neoliberal model advocated by Western powers and institutions, as well as how the King also adopted some of the European practices of state intervention found in the "varieties of capitalism" models across Europe. Additionally, Mohammed VI's Strategies for Moroccan Economic Development looks at the way in which the King has sought to utilize "leap frog" technologies so that Morocco has become a leader in certain productive sectors and is not just catching up to rival producers. The book also examines the extent to which Moroccan citizens have benefited from the economic transformations, arguing that not all Moroccans have benefited; many Moroccan citizens in 2019 echo the same economic concerns that were

voiced in 1999 when King Mohammed VI first assumed the throne. With its focus on economic development, this book will be of interest not only to scholars and students of Middle East and North African Studies, but also Economics, International Development, and Politics. Economic Development Cambridge University Press

This paper examines the theoretical foundations for, and empirical evidence of, Fund support in preventing capital account crises. At a theoretical level, Fund supported programs can lower the crisis probability in two ways. First, such programs provide the member with additional external reserves, making a run for the exit by private creditors less likely. Second, such programs induce and signal better economic policies,

though this needs to be supported by conditionality.

The Oxford Handbook of the British Musical provides a comprehensive academic survey of British musical theatre offering both a historical account of the musical's development from 1728 and a range of in-depth critical analyses of the unique forms and features of British musicals, which explore the aesthetic values and sociocultural meanings of a tradition that initially gave rise to the American musical and later challenged its modern pre-eminence. After a consideration of how John Gay's

The Beggar's Opera (1728) created a prototype for eighteenth-century ballad opera, the book focuses on the use of song in early nineteenth century theatre, followed by a sociocultural analysis of the comic operas of Gilbert and Sullivan; it then examines Edwardian and interwar musical comedies and revues as well as the impact of Rodgers and Hammerstein on the West End, before analysing the new forms of the postwar British musical from *The Boy Friend* (1953) to *Oliver!* (1960). One section of the book examines the contributions of key twentieth century figures including Noel Coward, Ivor Novello, Tim Rice, Andrew Lloyd Webber, director Joan Littlewood and producer Cameron Macintosh, while a number of essays discuss both mainstream and alternative musicals of

the 1960s and 1970s and the influence of the pop industry on the creation of concept recordings such as Jesus Christ Superstar (1970) and Les Misérables (1980). There is a consideration of "jukebox" musicals such as Mamma Mia! (1999), while essays on overtly political shows such as Billy Elliot (2005) are complemented by those on experimental musicals like Jerry Springer: the Opera (2003) and London Road (2011) and on the burgeoning of Black and Asian British musicals in both the West End and subsidized venues. The Oxford Handbook of the British Musical demonstrates not only the unique qualities of British musical theatre but also the vitality and variety of British musicals today.

**States Army** Yale University Press  
 In This Much I Know about Mind Over Matter John Tomsett addresses, with refreshing honesty, the growing problem of the mental health issues experienced by children and young people, offering up a plan for averting a mental health crisis in our schools. Tomsett interweaves his formative and professional experience with strategies for addressing students' mental health issues and insights from his interviews with high profile thinkers on the subject including Professor Tanya Byron, Natasha Devon, Norman Lamb, Tom Bennett, Claire Fox and Dr Ken McLaughlin. The book is replete with truths about the state of children's mental wellbeing, about creating a school culture where everyone can

thrive and about living in the shadow of his mother's manic depression. With his typical mixture of experience, wisdom and research-based evidence, Tomsett explains how he manages the pressure of modern day state school headship in a climate where you are only as good as your last set of examination results, a pressure which acutely affects staff and students too. He outlines his strategies for mitigating this pressure and turning the tide of students' mental health problems. The autobiographical narrative modulates between self-effacing humour and heart-wrenching stories of his mother's life, blighted by mental illness. His professional reflections are a wisdom-filled blend of evidence-based policy and decades of experience in teaching and school

leadership. Tomsett writes with genuine humility. His prose is beautiful in its seeming simplicity. When you pick up one of his books you will find you have read the first fifty pages before you have even noticed: surely the hallmark of truly great writing. Topics covered include: the real state of the nation's mental health, the perfect storm that is precipitating a mental health crisis in schools, the problems of loose terminology what do we really mean when we talk about a mental health epidemic? and poor understanding of mental health problems and mental illness, the disparity between mental and physical health in public discourse, treatment and funding, beginning the conversation about mental health, the philosophical and psychological

principles underpinning the debate, strategies to support students in managing their own mental health better, resilience, growth mindset, mindfulness, grit, failure and mistakes, coping with pressure, York's school wellbeing workers project, evidence-based strategies that have worked in Huntington School, metacognitive strategies for improving exam performance, interviews with professionals in the field, the reality of living with a parent with a serious mental illness, self-concept and achievement, perfectionism, the relationship between academic rigour and therapeutic education and, significantly, what the research says, what the experts say and what Tomsett's experience says about adverting a

mental health crisis in schools. Suitable for teachers, leaders and anyone with an interest in mental health in schools.

Harvesting Labour McGill-Queen's Press - MQUP

The culture of television in Indonesia began with its establishment in 1962 as a public broadcasting service. From that time, through the deregulation of television broadcasting in 1990 and the establishment of commercial channels, television can be understood, Philip Kitley argues, as a part of the New Order's national culture project, designed to legitimate an idealized Indonesian national cultural identity. But Professor Kitley suggests that it also has become a site for the contestation of elements of the New Order's cultural policies. Based on his studies, he further

speculates on the increasingly significant role that television is destined to play as a site of cultural and political struggle. Focus On: 100 Most Popular Television Series by 20th Century Fox Television IOS Press

Inequalities in human development are a roadblock to achieving the 2030 Agenda for Sustainable Development. They are not just about disparities in income and wealth. They cannot be accounted for simply by using summary measures of inequality that focus on a single dimension. And they will shape the prospects of people that may live to see the 22nd century. The 2019 Report explores inequalities in human development by going beyond income, beyond averages and beyond today. It asks what forms of inequality matter and

what drives them, recognizing that pernicious inequalities are generally better thought of as a symptom of broader problems in a society and economy. It also asks what policies can tackle those drivers—policies that can simultaneously help nations to grow their economies, improve human development and reduce inequality. *Pinochet's Economists* Women's Press A fascinating account of how radical researchers have used experiments to overturn conventional wisdom and shaped life as we know it Experiments have consistently been used in the hard sciences, but in recent decades social scientists have adopted the practice. Randomized trials have been used to design policies to increase educational attainment, lower crime rates, elevate

employment rates, and improve living standards among the poor. This book tells the stories of radical researchers who have used experiments to overturn conventional wisdom. From finding the cure for scurvy to discovering what policies really improve literacy rates, Leigh shows how randomistas have shaped life as we know it. Written in a “Gladwell-esque” style, this book provides a fascinating account of key randomized control trial studies from across the globe and the challenges that randomistas have faced in getting their studies accepted and their findings implemented. In telling these stories, Leigh draws out key lessons learned and shows the most effective way to conduct these trials.

### *Policy Reform for Sustainable Development in the Caribbean* Frontiers Media SA

The Caribbean countries, and many other Third World countries in Latin America, Asia and Africa, have been under the yoke of structural adjustment measures for more than a decade. Numerous studies have addressed the

inequality of North-South relations, the lack of transparency in negotiations that have led to the signature of agreements, the absence of a clear definition of responsibilities of the parties engaged, the inadequacy and inadaptation of policies with regard to the socio-cultural context, and especially the refusal to take into account the social demands of the most deprived. The criticisms formulated in this book can only find a beginning of solutions by the setting up of a solid administrative organization in which the public officials are made accountable and who, once aware of the national and international stakes, can confront the constraints involved in State/international negotiation relations. The book is a very rich presentation of the concept and the problems of

structural adjustment and institutional development in the developing countries. Beside the impressive introduction and the convincing conclusion, the articles on these prerequisites for institutional sustainability present the most important empirical research results. The contents is a clear description of problems, failures and results in institutional reforms.

**Sleep and Mood Disorders** Crown House Publishing Ltd

This book tells the extraordinary story of the Pinochet regime's economists, known as the "Chicago Boys". It explores the roots of their ideas and their sense of mission, following their training as economists at the Department of Economics at the University of Chicago.

After their return to Chile, the "Chicago Boys" took advantage of the opportunity afforded them by the 1973 military coup to launch the first radical free market strategy implemented in a developing country. The ideological strength of their mission and the military authoritarianism of General Pinochet combined to transform an economy that, following the return to democracy, has stabilized and is now seen as a model for Latin America. This book, written by a political scientist, examines the neo-liberal economists and their perspective on the market. It also narrates the history of the transfer of ideas from the industrialized world to a developing country, which will be of particular interest to economists.

*Epilepsy - Case Report Collection 2022*  
Geological Society of London

A major postgraduate textbook in emergency medicine, covering all the major topics that present to the trainee doctor in the emergency department. A comprehensive textbook of adult emergency medicine for trainee doctors - covers all the problems likely to present to a trainee in the emergency department. Chapters are short and concise, with key point boxes (called "Essentials") at the beginning. Also has boxes featuring controversial areas of treatment. Practical and clinically orientated. Major changes to resuscitation guidelines. Complete rewriting of ENT section. Significant updating of following topics - acute coronary syndrome management, trauma, sepsis management, imaging, arrhythmias. Expansion of administration

section - especially patient safety.  
Changes to drug overdose sections in toxicology section.

Joint Conference on Applications of Air Pollution Meteorology Frontiers Media SA

The rise of Maoism as one of the organized political movement in India is the outcome of a historical situation. Both colonialism and the failure of the Indian state to implement land reforms more stringently in the aftermath of independence resulted in terrible sufferings of the marginalized, land-dependent, sections of society. Through historical analysis, this book assesses the ideological articulation of the contemporary ultra-left movement in India, including Maoism which is expanding gradually in India. The author provides answers to the following issues:

Is Maoism reflective of the growing disenchantment of the people in the affected areas with the state? Is it a comment on 'the distorted development planning' pursued by the Indian state? Is this an outcome of the processes of 'deepening of democracy' in India? Using Orissa as a case study, the book raises questions on India's development strategy. The author argues that Maoism provides critical inputs for an alternative paradigm for development, relevant for 'transitional societies' and that it is a still a powerful ideology for the poorer parts of the world although its ideological appeal has declined internationally. *A State of Arrested Development* e-artnow sro

One of the most critically-acclaimed television series of all time, Arrested

Development is widely hailed as a cutting-edge comedy that broke the traditional sitcom mold. The winner of six Emmys, the series was canceled by Fox in 2006, only to be revived in 2013 via Netflix's streaming service. Beyond its innovative approach to storytelling, the series lampooned contemporary American culture, holding up an unflattering mirror to modern society. This collection of new essays explores how the show addressed issues such as wealth and poverty, race, environmentalism and family relationships. Focusing on the show's iconic characters, the essays also consider Arrested Development as it stands next to such works of fiction as Hamlet, The Godfather and the writings of Kafka. Also covered is the show's

reinvention of the sitcom genre, and what its revival on Netflix means for the future of television.

**Autonomous State** e-artnow sro  
The first book of its kind, this volume explores women and non-binary people in popular culture in Canada, with a focus on intersectional analysis of settler colonialism, race, white privilege, ability, and queer representations and experiences in diverse media. The chapters include discussions of film, television, videogames, music, and performance, as well as political events, journalism, social media, fandom, and activism. Throughout this collection, readers are encouraged to think carefully about the role women play in the cultural landscape in Canada as active viewers, creators, and

participants. Covering a wide range of topics from historical perspectives to recent events, media, and technologies, this collection acts as an introduction, an archive, and a continuing commitment to lifting the voices and stories of women and popular culture in Canada. This book is a must-read for gender studies and media studies courses that focus on popular culture, Canadian feminism, and Canadian media. FEATURES includes questions for critical thought that stimulate discussion focuses on intersections of race, gender, ability, and sexuality provides contemporary Canadian content from an interdisciplinary and intersectional lens  
*Textbook of Adult Emergency Medicine E-Book* Elsevier Health Sciences  
In recent decades an increasing share of

Canada's agricultural workforce has been made up of temporary foreign workers from the Global South. These labourers work difficult and dangerous jobs with limited legal protections and are effectively barred from permanent settlement in Canada. In *Harvesting Labour* Edward Dunsworth examines the history of farm work in one of Canada's underrecognized but most important crop sectors – Ontario tobacco. Dunsworth takes aim at the idea that temporary foreign worker programs emerged in response to labour shortages or the unwillingness of Canadians to work in agriculture. To the contrary, Ontario's tobacco sector was extremely popular with workers for much of the twentieth century, with high wages attracting a diverse workforce and

enabling thousands to establish themselves as small farm owners. By the end of the century, however, the sector had become something entirely different: a handful of mega-farms relying on foreign guest workers to produce their crops. Taking readers from the leafy fields of Ontario's tobacco belt to rural Jamaica, Barbados, and North Carolina and on to the halls of government, Dunsworth demonstrates how the ultimate transformation of tobacco – and Canadian agriculture writ large – was fundamentally a function of the capitalist restructuring of farming. *Harvesting Labour* brings together the fields of labour, migration, and business history to reinterpret the historical origins of contemporary Canadian agriculture and its workforce.

The Latin American Economic Outlook is the OECD Development Centre's annual analysis of economic developments in Latin America. This edition's focus is on the role of education, skills and innovation.

*Focus On: 100 Most Popular Television Series by Warner Bros. Television e-artnow sro*

*Rethinking Superhero and Weapon Play* offers a fresh and knowledgeable insight into children's fascination with superheroes and weapon play. It explores what lies at the heart of superhero and weapon play and why so many children are drawn to this contentious area of children's play. This innovative book offers: A detailed look at why many early years professionals and

teachers are cautious about superhero and weapon play. Does weapon play make children more violent? Do 'goodies versus baddies' stories make children more confrontational? Do superheroes offer positive gender role-models? The book tackles these questions and suggests some alternative perspectives, as well as offering practical advice about keeping children's superhero and weapon play positive and productive. An exploration of how superhero and weapon play relates to the development of children's moral values, moral principles and moral reasoning; the building of children's co-operation, empathy and sense of community; and the development of children's sense of self and self-esteem. Discussion of the deep moral themes that lie within

superhero narratives, and how superhero characters and narratives can be used to enhance and deepen children's understanding of good character, moral responsibility, attachment, prejudice and ill-treatment, and why it is important to be good in the first place. A wealth of learning opportunities and suggestions of ways to use superheroes to advance children's moral, philosophical and emotional thinking This book is an excellent resource for those studying or working in early years or primary education who wish to understand the phenomenon of children's superhero and weapon play and make the most of children's enthusiasm for it. "Warm, funny, smart, and honest, the argument made in Steven Popper's book astutely, and with

a sharp eye for detail, teases out many subtle reflections on morality, childhood development and the paradoxes of human nature, through the lens of our much-loved Superhero narratives. He is able, through nuanced and well-supported argument, drawn from both theory and practice, and from pedagogy and real life, to present a compelling and detailed account of the ways in which these stories might interface with the moral development of children. The book offers a rich, and articulate narrative of its own, which 'aims at the good' in its desire to propose that immersion in such superhero 'narrative play' can teach children about ethics, social responsibility, and what it is to be 'human'. This is also a wonderful contribution to debates around the role

of mass media in promoting critical thinking and enquiry among children." Dr. Sheena Calvert, Senior Lecturer, University of Westminster, UK "This book authoritatively assesses the virtues of engaging in superhero play with young children. It argues that far from damaging children and encouraging them to adopt unthinking, aggressive behaviours superhero play is an implicitly moral activity. It encourages children to explore profound moral and ethical thinking. This book is both a well-researched account of the appeal that superhero play has for children of both sexes and a practical guide to how such play can be used imaginatively in early years settings." Rob Abbott, Senior Lecturer in Early Childhood and Education, University of Chichester, UK

## **Mohammed VI's Strategies for Moroccan Economic Development**

earnow sro

Autonomous State provides the first detailed examination of the Canadian auto industry, the country's most important economic sector, in the post-war period. In this engrossing book, Dimitry Anastakis chronicles the industry's evolution from the 1973 OPEC embargo to the 1989 Canada-US Free Trade Agreement and looks at its effects on public policy, diplomacy, business enterprise, workers, consumers, and firms. Using an immense array of archival sources, and interviews with some of the key actors in the events, Anastakis examines a fascinating array of topics in recent auto industry and

Canadian business and economic history: the impact of new safety, emissions, and fuel economy regulations on the Canadian sector and consumers, the first Chrysler bailout of 1980, the curious life and death of the 1965 Canada-US auto pact, the 'invasion' of Japanese imports and transplant operations, and the end of aggressive auto policy-making with the coming of free trade. More than just an examination of the auto industry, the book provides a rethinking of Canada's tumultuous post-OPEC political and economic evolution, helping to explain the current tribulations of the global auto sector and Canada's place within it. *Television, Nation, and Culture in Indonesia* Oxford University Press
