ALGEBRA AND

TRIGONOMETRY: REAL

MATHEMATICS, REAL

PEOPLE, 7th Edition, is an

ideal student and

instructor resource for

courses that require the

use of a graphing calculator. The quality and quantity of the exercises, combined with interesting applications and innovative resources, make teaching easier and help students succeed. Retaining the series' emphasis on student support, selected examples throughout the text include notations directing students to previous sections to review concepts and skills

needed to master the material at hand. The book also achieves accessibility through careful writing and design—including examples with detailed solutions that begin and end on the same page, which maximizes readability. Similarly, side-by-side solutions show algebraic, graphical, and numerical representations of the mathematics and support a variety of

learning styles. Reflecting its subtitle, this significant revision focuses more than ever on showing students the relevance of mathematics in their lives and future careers.

The Primary Checkpoints series is designed to provide ready-made stimulating activities.

Familiarises students with a variety of assessment formats, such as, NAPLAN* Thematic units of work covering areas of the curriculum such as reading; language conventions and numeracy to provide students with solid and relevant practice towards assessment tasks at the appropriate Primary level. Each unit of work contains:

- a text type, based on a theme that is relevant to the age and ability level of the student
- reading comprehension
- language convention •

numeracy including mental arithmetic questions and problem solving Each of the units also includes motivation or encouragement pages in which students complete tasks related to other curriculum areas such as:

- science •
- geography •
- history •
- health •
- nutrition and fitness •
- social issues

Four Checkpoint Units to be completed in a 'test-like' or as a self-assessment activity. A removable answers insert.
