Is there life after death? After a tragic accident, doctors pronounced Richard Sigmund legally dead. Eight hours later, God miraculously brought him back to life on the way to the morgue. During those hours, God allowed him to experience the glorious beauty, heavenly sounds, sweet aromas, and boundless joys of heaven that await every believer. God then returned him back to earth with a mission to tell the world what he saw. You will thrill to Sigmund's eyewitness accounts of strolling down heaven's streets of gold, seeing angels playing with children, talking with Jesus, meeting with people from the Bible, as well as departed family and friends, seeing the mansions, and much more! Through Sigmund's testimony, God restored sight to the blind, hearing to the deaf, and even raised several people from the dead. Also, glimpse into the horrifying reality of "the other place"—a place where no one wants to go.

When Life in Peactime opens, on May 29, 2015, engineer Ivo Brandani is sixty-nine years old. He's disillusioned and angry--but morbidly attached to life. As he makes a day-long trip home from his job in Sharm el Sheik reconstructing the coral reefs of the Red Sea using synthetics, he reflects on both the brief time he sees remaining ahead and on everything that has happened already in his life to which he can never quite resign himself. We see his slow bureaucratic trudge as a civil servant, long summer vacations on a Greek island, his twisted relationship with his first boss, the turmoil and panic attacks he faced during the student uprisings in 1968 that pushed him away from philosophy and into engineering, and his fearful childhood as a postwar evacuee. A

close-up portrait of an ordinary existence, Life in Peactime offers a new look at the postwar era in Italy and the fundamental contradictions of a secure, middle-class life.

Literary Nonfiction. CALIBAN AND THE WITCH is a history of the body in the transition to capitalism. Moving from the peasant revolts of the late Middle Ages to the witch-hunts and the rise of mechanical philosophy, Federici investigates the capitalist rationalization of social reproduction. She shows how the battle against the rebel body and the conflict between body and mind are essential conditions for the development of labor power and self-ownership, two central principles of modern social organization. "It is both a passionate work of memory recovered and a hammer of humanity's agenda." Peter Linebaugh, author of The London Hanged"

Frost & Sullivan's 2014 Growth, Innovation, and Leadership Book of the Year "EXPONENTIAL ORGANIZATIONS should be required reading for anyone interested in the ways exponential technologies are reinventing best practices in business." —Ray Kurzweil, Director of Engineering at Google In business, performance is key. In performance, how you organize can be the key to growth. In the past five years, the business world has seen the birth of a new breed of company—the Exponential Organization—that has revolutionized how a company can accelerate its growth by using technology. An ExO can eliminate the incremental, linear way traditional companies get bigger, leveraging assets like community, big data, algorithms, and new technology into achieving performance benchmarks ten times better than its peers. Three luminaries of the business world—Salim Ismail, Yuri van Geest, and Mike Malone—have researched this phenomenon and documented ten characteristics of Exponential Organizations. Here, in EXPONENTIAL ORGANIZATIONS, they walk the reader through how any company, from a startup to a multi-national, can become an ExO, streamline its performance, and grow to the next level. "EXPONENTIAL ORGANIZATIONS is the most pivotal book in its

class. Salim examines the future of organizations and offers readers his insights on the concept of Exponential Organizations, because he himself embodies the strategy, structure, culture, processes, and systems of this new breed of company." —John Hagel, The Center for the Edge Chosen by Benjamin Netanyahu, Prime Minister of Israel, to be one of Bloomberg's Best Books of 2015

The real story behind the Tavistock Institute and its network, from a popular conspiracy expert The Tavistock Institute, in Sussex, England, describes itself as a nonprofit charity that applies social science to contemporary issues and problems. But this book posits that it is the world's center for mass brainwashing and social engineering activities. It grew from a somewhat crude beginning at Wellington House into a sophisticated organization that was to shape the destiny of the entire planet, and in the process, change the paradigm of modern society. In this eye-

opening work, both the Tavistock network and the methods of brainwashing and psychological warfare are uncovered. With connections to U.S. research institutes, think tanks, and the drug industry, the Tavistock has a large reach, and Tavistock Institute attempts to show that the conspiracy is real, who is behind it, what its final long term objectives are, and how we the people can stop them.

This book is the first that describes the practices of any stock exchange; it makes evident a high development of practices, with puts, calls, pools, and manipulations; and it appeared as early as the seventeenth century. Not inappropriately the stock exchange described is that of Amsterdam, a city which at the date of the volume's publication —1688 — was still the leading financial center of the world. The book, to be sure, is hardly a systematic account of the institution; the author pursued moral, philosophical, and rhetorical objectives, and, while saying a lot that seems now to be of little value, manages somehow to leave unsaid a great deal that would be of interest for us. Nevertheless, it represents, even in its peculiar form, a really important source of information about the stock exchange, and indeed about the Dutch business world of that period.

Francesco: El Maestro del Amor Francesco: El Llamado

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for

prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.
