An intimate glimpse into the professional and romantic relationship between Harriet Pattison and the renowned architect Louis Kahn On a winter day in 1953, a mysterious man in a sheepskin coat stood out to Harriet Pattison, then a theater student at Yale. She would later learn he was the architect Louis Kahn (1901–1974). This chance encounter served as preamble to a fifteen-year romance, with Pattison becoming the architect's closest confidante, his intellectual partner, and the mother of his only son. Here for the first time, Pattison recounts their passionate and sometimes searing relationship. Married and twenty-seven years her senior, Kahn sent her scores of letters—many from far-flung places—until his untimely death. This book weaves together Pattison's own story with letters, postcards, telegrams, drawings, and photographs that reveal Kahn's inner life and his architectural thought process, including new insight into some of his greatest works, both built and unbuilt. What emerges is at once a poignant love story and a vivid portrait of a young woman striving to raise a family while forging an artistic path in the shadow of her famous partner.

Exploring an unjustly overlooked figure in 20th-century British visual culture This book offers a comprehensive overview to the work and legacy of David King (1943-2016), whose fascinating career bridged journalism, graphic design, photography, and collecting. King launched his career at Britain's Sunday Times Magazine in the 1960s, starting as a designer and later branching out into image-led journalism. He developed a particular interest in revolutionary Russia and began amassing a collection of graphic art and photographs—ultimately accumulating around 250,000 images that he shared with news outlets. Throughout his life, King blended political activism with his graphic design work, creating anti-Apartheid and anti-Nazi posters, covers for books on Communist history, album artwork for The Who and Jimi Hendrix, catalogues on Russian art and society for the Museum of Modern Art in Oxford, and typographic covers for the left-wing magazine City Limits. This well-researched and finely illustrated publication ties together King's accomplishments as a visual historian, artist, journalist, and activist.

Designing Brand Identity John Wiley & Sons

The world's leading practitioner of branding predicts the future of companies' identities in an ever-changing marketing landscape What is the future for brands and branding? Does globalization mean that variety and individuality will be crushed out of existence by massive multinationals? Will everywhere and everything become similar, like the world of airports today? Or will there still be room for brands that thrive on being different? What about the impact of digital technology and increasing customer feedback through the internet and social media? What, in fact, do customers want? Today's businesses, in addition to thinking about price and authenticity, have to deal with corporate social responsibility. How does this affect the products and services we consume? How does it influence the way we feel about organizations? Are corporations here to maximize profits and grow, or to help society, or both? With the rapid rise of new markets in India, China, Brazil, and elsewhere, will new global brands emerge based around local cultural strengths and heritage? If so, what will this mean for the traditional dominance of brands based on Western cultural norms? Wally Olins's fascinating book looks at every aspect of the world of branding. With his customary flair and no-nonsense prose, he analyzes the problems facing today's organizations, criticizes corporate missteps, praises those companies who seem to be building and sustaining brands efficiently in our brave new world, and predicts the future of branding. No one interested in marketing, business, or contemporary culture will want to be without this book.

For everyone interested in the enduring appeal of Louis Kahn, this book demonstrates that a close look at how Kahn put his buildings together will reveal a deeply felt philosophy. Louis I. Kahn is one of the most influential and poetic architects of the twentieth century, a figure whose appeal extends beyond the realm of specialists. In this book, noted Kahn expert John Lobell explores how Kahn's focus on structure, respect for materials, clarity of program, and reverence for details come together to manifest an overall philosophy. Kahn's work clearly conveys a kind of "transcendent rootedness"--a rootedness in the fundamentals of architecture that also asks soaring questions about our experience of light and space, and even how we fit into the world. In Louis Kahn: Architecture as Philosophy, John Lobell seeks to reveal how Kahn's buildings speak to grand

humanistic concerns. Through examinations of five of Kahn's great buildings--the Richards Medical Research Building in Philadelphia; the Salk Institute for Biological Studies in La Jolla; the Phillips Exeter Academy Library in New Hampshire; the Kimbell Art Museum in Fort Worth; and the Yale Center for British Art in New Haven--Lobell presents a clear but detailed look at how the way these buildings are put together presents Kahn's philosophy, including how Kahn wishes us to experience them. An architecture book that touches on topics that addresses the universal human interests of consciousness and creativity, Louis Kahn: Architecture as Philosophy helps us understand our place and the nature of well-being in the built environment.
