Praise for *Foreign Exchange* "Tim Weithers starts by telling the reader that foreign exchange is not difficult, just confusing, but *Foreign Exchange: A Practical Guide to the FX Markets* proves that money is much more exciting than anything it buys. This

useful book is a whirlwind tour of the world's largest market, and the tour guide is an expert storyteller, inserting numerous fascinating insights and quirky facts throughout the book." -John R. Taylor, Chairman, CEO and CIO, FX Concepts "The book reflects the author's doctorate from the University of Chicago, several years' experience as an economics professor, and, most recently, a very successful decade as an executive at a huge international bank. These fundamental ingredients are seasoned with bits of wisdom and experience. What results is a very tasty intellectual stew." -Professor Jack Clark Francis, PhD, Professor of Economics and Finance, Bernard Baruch College "In this book, Tim Weithers clearly explains a very complicated subject. Foreign Exchange is full of jargon and conventions that make it very hard for non-professionals to gain a good understanding. Weither's book is a must for any student or professional who wants to learn the secrets of FX." -Niels O. Nygaard, Director of Financial Mathematics, The University of Chicago "An excellent text for students and practitioners who want to become acquainted with the arcane world of the foreign exchange market." -David DeRosa, PhD, founder, DeRosa Research and Trading, Inc., and Adjunct Professor of Finance, Yale School of Management "Tim Weithers provides a superb introduction to the arcana of foreign exchange markets. While primarily intended for practitioners, the book would be a valuable introduction for students with some knowledge of economics. The text is exceptionally clear with numeric examples and exercises that reinforce concepts. Frequent references are made to the economic theory behind the trading practices." -John F. O'Connell, Professor of Economics, College of the Holy Cross

But the prospect of making some incredible profits still exists, provided you are ready to navigate the complexities of the Forex market. In fact, here is something you should know. This is a real market. It is the largest financial market in the world, and you have to treat it as such. You can trade in this market part-time, or you can do it every day. In fact, you can make it your business-the business of trading. People have actually quit their day jobs to get into the world of Forex trading. However, that is something that you should not even consider if you are starting out. Do not make rash decisions in the hope that you are going to master the markets and strike rich in no time. Those are wonderful ambitions but are not backed by experience. You see, trading can be learned, of course, but the experience can't be transmitted. It has to be constructed by every individual through a personal effort of understanding and hard work. Another thing that is important to understand is that you will never ever stop learning. Markets are changing every day, and the Forex is a living organism that evolves in the same way as all its traders. Always remember that

although it seems to be an unknown entity, at the end of the day, the market is merely made up of investors, large and small, from all corners of the world, each with his or her own emotions, psychology, and predictable behaviors and reactions. Do you ever walk up to a doctor and ask him or her if there is a shortcut to reaching where he or she has reached? Would you do that to an engineer or a renowned sports person? These people have developed their skills over time. They have honed their abilities as much as possible before they could use them fluently. It is the same with trading in the Forex market. You need to put in effort to learn the tricks of the trade (no pun intended). Learn to move on after losses. Don't dwell on missed trades or lost revenue after you decide to close. There will be hundreds of opportunities in the future. Follow your plan, and follow your system. Practice every day, and experience will come with time, patience, and discipline. Don't look outside for what's already inside. Leave your ego behind. Be humble and smart. You can't decide where the market will go, so learn to see where it wants to lead you, not the other way around. Exit bad trades, and hold on to good trades. Set yourself a goal and stop trading when you have reached it.
