George Orwell was a much-respected English novelist, who wrote some of the finest pieces in literary criticism, fiction.
Orwell's work is known for its simplicity and wit. He wrote with

smartness on subjects such as anti-fascism, democratic socialism etc. His best works include □ANIMAL FARM□. It's an allegorical novella. It got published in August 1945. The fiction based on Farm animals, the author has named them too. Such as Major (a majestic-looking pig), 3-dogs (Bluebell, Jessie, and Pincher),

many hens, pigeons, ducklings, sheeps and cows. Two horses, Boxer and Clover. Amongst them, Major is their leader. He wanted to speak on "the nature of life on this earth" and "How any animal is now living". The author has nicely elaborated through these Characters about the animals' misery and slavery. Animals complain that despite their hard labour, why then do they continue

in the miserable condition? They also complain about human beings that they use to steal nearly the whole of their produce. Their main enemy is - Man. So, remove Man from the scene and the root cause of hunger and overwork will be abolished for ever. The book narrates about the agony of ill-treated farm animals. Then what decision they take and how this Animal Farm born,

everything has become very interesting. The ultimate satire on fascism. A must-read book. Analytical Writing and Thinking Instructor's Manual

This book explores the mechanics of storytelling within a study aimed at focusing on a 'hidden' population of migrants in the city of York, UK. Taking applied linguistics to mean the consideration of real-world 'problems' as identified by a

'client', in which the use of (and beliefs about) language is a significant component, the authors describe the benefits and challenges of working in a partnership with a community organisation. With project participants from Africa, Europe, Asia and South and Central America who had lived in York between two and fifty years, the study considers the co-construction of meaning in

interviews from a range of practical and theoretical perspectives. The book will be of interest to students, academic researchers and community project leaders who are interested in migration stories and interviews as a method of data collection.

Supreme: Solutions to the Real Essay Topics Vibrant Publishers
Analytical sociology is a strategy for understanding the social world. It is concerned with explaining important social facts such as network structures, patterns of residential segregation, typical beliefs, cultural tastes, and common ways of acting. It explains such facts by detailing in clear and precise ways

the mechanisms through which the social facts were brought about. Making sense of the relationship between micro and macro thus is one of the central concerns of analytical sociology. The approach is a contemporary incarnation of Robert K. Merton's notion of middle-range theory and presents a vision of sociological theory as a tool-box of semi-general theories each

of which is adequate for explaining certain types of phenomena. The Handbook brings together some of the most prominent sociologists in the world. Some of the chapters focus on action and interaction as the cogs and wheels of social processes, while others consider the dynamic social processes that these actions and interactions bring about.
