This is an illustrated "graphic history" based on an 1876 court transcript of a West African woman named Abina, who was wrongfully enslaved and took her case to court. The main scenes of the story take place in the courtroom, where Abina strives to convince a series of "important men"--A British judge, two Euro-African attorneys, a wealthy African country "gentleman," and a jury of local leaders --that her rights matter.--Publisher description.

A History of Southern Africa Routledge

The third edition of *Africana Studies: A Survey of Africa and the African Diaspora* is an update of the second edition (1998) and incorporates new chapters that include expanded coverage of issues on women, health, terrorism, the African Union, and many others, as well as the most recent theories and methods in *Africana* studies. To date, *Africana Studies* remains the most comprehensive and most suitable text for both teachers and students interested in Africa and the Diaspora in the US, the Caribbean, Afro-Latin-America, and elsewhere. The book is divided into five parts: the state of the art of *Africana* studies; the evolution of the history of black people; analysis of the contributions of the black world; the present and future status of these peoples; and the societies and values of black people. The book also includes a chronology of significant events in the history of peoples of African descent and a number of maps. "[This book] attempts in one volume to present more accurately the experiences and contributions of the African world. It introduces readers to the most comprehensive account of black interdisciplinary subjects to date and summarizes the research of specialists in a variety of fields... The number of contributors, variety, and depth of coverage show that the work was carefully thought out." -- Insights, on an earlier edition

Entries are drawn from all around sub-Saharan Africa, and many have been translated into English for the first time. Introductions to each source and chapter provide context and identify themes. *African History through Sources* allows readers to analyze change, understand perspectives, and imagine everyday life during an extraordinary time.

An overview of the ongoing methods used to understand African history. Spurred in part by the ongoing re-evaluation of sources and methods in research, African historiography in the past two decades has been characterized by the continued branching and increasing sophistication of methodologies and areas of specialization. The rate of incorporation of new sources and methods into African historical research shows no signs of slowing. This book is both a snapshot of current academic practice and an attempt to sort through some of the problems scholars face within this unfolding web of sources and methods. The book is divided into five sections, each of which begins with a short introduction by a distinguished Africanist scholar. The first section deals with archaeological contributions to historical research. The second section examines the methodologies involved in deciphering historically accurate African ethnic identities from the records of the trans-Atlantic slave trade. The third section mines old documentary sources for new historical perspectives. The fourth section deals with the method most often associated with African historians, that of drawing historical data from oral tradition. The fifth section is devoted to essays that present innovative sources and methods for African historical research. Together, the essays in this cutting-edge volume represent the current state of the art in African historical research. Providing new information on women's participation in the Moroccan independence movement, *Voices of Resistance* offers a rare opportunity to hear Moroccan women speak freely about their personal lives. Each woman is introduced in terms of her family background and personal style, and the interviews are given texture and context by references to Moroccan history and popular culture, including contemporary songs and poems. These women are storytellers, and they lived through stirring times. Their active struggle against French colonialism also challenged and redefined traditional Moroccan ideas about women's roles in society. The narratives reconstruct the little-known history of Moroccan feminism and nationalism, and probe the lives of a remarkable group of Islamic women whose voices have never been heard until now.

Luka Jantjie is today a largely forgotten hero of resistance to British colonialism. His place in South African history has tended to be overshadowed by events elsewhere in the region. This book attempts to redress the balance by recording his remarkable story. In 1870, at the beginning of the Kimberley diamond mining boom that was to transform southern Africa, Luka Jantjie was the first independent African ruler to lose his land to the new colonialists, who promptly annexed the

diamond fields. His outspoken stand against the hypocrisy of colonial 'justice' earned him the epithet: "a wild fellow who hates the English". As the son of an early Christian convert, Luka was brought up to respect peace and non-violence; his boycott of rural trading stores in the early 1890s was perhaps the earliest use of non-violent resistance in colonial South Africa. His steady refusal to bow to colonial demands of subservience intensified the enmity of local colonists determined to 'teach him a lesson'. As many of his people succumbed to colonial pressures, Luka was twice forced to take up arms to defend himself and his people from colonial attacks. His life ended in a dramatic and heroic last stand in the ancestral sanctuary of the Langeberg mountain range; its tragic consequences stretched far into the next century.

Drawing on many years of African experience, John Reader has written a book of startling grandeur and scope that recreates the great panorama of African history, from the primeval cataclysms that formed the continent to the political upheavals facing much of the continent today. Reader tells the extraordinary story of humankind's adaptation to the ferocious obstacles of forest, river and desert, and to the threat of debilitating parasites, bacteria and viruses unmatched elsewhere in the world. He also shows how the world's richest assortment of animals and plants has helped - or hindered - human progress in Africa.

The popularity and profile of African dance have exploded across the African diaspora in the last fifty years. *Hot Feet and Social Change* presents traditionalists, neo-traditionalists, and contemporary artists, teachers, and scholars telling some of the thousands of stories lived and learned by people in the field. Concentrating on eight major cities in the United States, the essays challenges myths about African dance while demonstrating its power to awaken identity, self-worth, and community respect. These voices of experience share personal accounts of living African traditions, their first encounters with and ultimate embrace of dance, and what teaching African-based dance has meant to them and their communities. Throughout, the editors alert readers to established and ongoing research, and provide links to critical contributions by African and Caribbean dance experts.

History of Southern Africa Routledge

For many Americans the mention of Africa immediately conjures up images of safaris, ferocious animals, strangely dressed "tribesmen," and impenetrable jungles. Although the occasional newspaper headline mentions authoritarian rule, corruption, genocide, devastating illnesses, or civil war in Africa, the collective American consciousness still carries strong mental images of Africa that are reflected in advertising, movies, amusement parks, cartoons, and many other corners of society. Few think to question these perceptions or how they came to be so deeply lodged in American minds. *Mistaking Africa* looks at the historical evolution of this mind-set and examines the role that popular media plays in its creation. The authors address the most prevalent myths and preconceptions and demonstrate how these prevent a true understanding of the enormously diverse peoples and cultures of Africa. Updated throughout, the fourth edition covers the entire continent (North and sub-Saharan Africa) and provides new analysis of topics such as social media and the Internet, the Ebola crisis, celebrity aid, and the Arab Spring. *Mistaking Africa* is an important book for African studies courses and for anyone interested in unravelling American misperceptions about the continent.

The Fortunes of Africa Simon and Schuster

Most of us still know less about Africa's past and peoples than we do about the continent's wild animals. And what we do know is colored by romance - safaris and treks and camel caravans, Solomon's mine and Tutankhamun's curse, the shores of Tripoli and the snows of Kilimanjaro. Yet the ancestor of all humankind may have lived in Africa. The world's longest-lived, literate civilization was African. Through the ages, great civilizations rose and fell in what was once called "darkest" Africa, leaving behind mysterious fortresses and splendid art. Christianity and Islam battled age-old beliefs - and each other. Traders on camels were followed by explorers in caravels and by a plague of invaders, hungry for ivory and diamonds and the "black gold" of slavery. In just the last half century, independence has swept away the old maps and colonial ways to jar the balance of the world. Here is Africa's story.

'Meredith has given a spectacularly clear view of the African political jungle' - Spectator 'This book is hard to beat... Elegantly written as well as unerringly accurate' - Financial Times The fortunes of Africa have changed dramatically since the independence era began in 1957. As Europe's colonial powers withdrew, dozens of new states were born. Africa was a continent rich in mineral resources and its economic potential was immense. Yet, it soon struggled with corruption, violence and warfare, with few states managing to escape the downward spiral. So what went wrong? In this riveting and authoritative account, Martin Meredith examines the myriad problems that Africa has faced, focusing upon key personalities, events and themes of the independence era. He brings his compelling analysis into the modern day, exploring Africa's enduring struggles for democracy and the rising influence of China. It is essential reading for anyone seeking to understand the continent's plight and its hopes for a brighter future.

African history before 1885 Cambridge University Press

Africa has been coveted for its riches ever since the era of the Pharaohs. In past centuries, it was the lure of gold, ivory, and slaves that drew fortune-seekers, merchant-adventurers, and conquerors from afar. In modern times, the focus of attention is on oil, diamonds, and other valuable minerals.

Land was another prize. The Romans relied on their colonies in northern Africa for vital grain shipments to feed the population of Rome. Arab invaders followed in their wake, eventually colonizing the entire region. More recently, foreign corporations have acquired huge tracts of land to secure food supplies needed abroad, just as the Romans did. In this vast and vivid panorama of history, Martin Meredith follows the fortunes of Africa over a period of 5,000 years. With compelling narrative, he traces the rise and fall of ancient kingdoms and empires; the spread of Christianity and Islam; the enduring quest for gold and other riches; the exploits of explorers and missionaries; and the impact of European colonization. He examines, too, the fate of modern African states and concludes with a glimpse of their future. His cast of characters includes religious leaders, mining magnates, warlords, dictators, and many other legendary figures—among them Mansa Musa, ruler of the medieval Mali empire, said to be the richest man the world has ever known. "I speak of Africa," Shakespeare wrote, "and of golden joys." This is history on an epic scale.

Albert René SAGE

The mobilization of local ideas about racial difference has been important in generating, and intensifying, civil wars that have occurred since the end of colonial rule in all of the countries that straddle the southern edge of the Sahara Desert. From Sudan to Mauritania, the racial categories deployed in contemporary conflicts often harken back to an older history in which blackness could be equated with slavery and non-blackness with predatory and uncivilized banditry. This book traces the development of arguments about race over a period of more than 350 years in one important place along the southern edge of the Sahara Desert: the Niger Bend in northern Mali. Using Arabic documents held in Timbuktu, as well as local colonial sources in French and oral interviews, Bruce S. Hall reconstructs an African intellectual history of race that long predated colonial conquest, and which has continued to orient inter-African relations ever since.
