**The Alpha King's Tribrid Mate** Createspace Independent Publishing Platform

Bears and bunnies aren't supposed to mix, or that's what Chase keeps telling himself when his bouncy new neighbor won't stay out of his business--and his mind. However, the more he gets to know his overly perky neighbor, the more he craves her, a desire worse than his addiction to honey and pie. Miranda's on a mission for the Furry United Coalition, and it involves secretly guarding one grumpy ol' bear. Staying focused on the job isn't easy when all she can think about is turning his frown upside down, a task made harder when she gets a glimpse of his passion. When she hears about his theory on woodland creatures and predators not mixing, she thinks all is lost, but she didn't count on a bear's curious nature--and possessive need. When an evil force abducts Chase, Miranda unleashes her bunny in order to save him, but the revelation of her shifter side puts her in danger. Is one ornery bear enough to save her from a mad scientist? And if he does, can a bear forget her woodland creature status long enough to love her and make her his mate?

You're beautiful and kind and very smart. But best of all, you're mine. Do you remember the stories your Grandma used to tell you every night about cursed beasts, village beauties, girls in red capes and wolves in disguises? Well, maybe, just maybe... they actually do happen. Maybe, beasts do exist. They do. I would know. I am bound to one. Whom, you may ask? Well, I am mated to the Alpha King. How? You will see. You will live through it with me. I am Theia Anderson. I am just like any one of you, human, alive, and breathing. But unlike any one of you, I've stumbled upon a world that until yesterday... I couldn't even fathom into existence. This is my story.

Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

This fascinating book is the first volume in a projected cultural history of the United States, from the earliest English settlements to our own time. It is a history of American folkways as they have changed through time, and it argues a thesis about the importance for the United States of having been British in its cultural origins. While most people in the United States today have no British ancestors, they have assimilated regional cultures which were created by British colonists, even while preserving ethnic identities at the same time. In this sense, nearly all Americans are "Albion's Seed," no matter what their ethnicity may be. The concluding section of this remarkable book explores the ways that regional cultures have continued to dominate national politics from 1789 to 1988, and still help to shape attitudes toward education, government, gender, and violence, on which differences between American regions are greater than between European nations.
