Abstract : Wil Offermans is a flutist-composer with a holistic approach to contemporary flute pedagogy. At present day, there are very few English-language publications on Offermans; thus, in comparison to his contemporaries, the broader English-speaking flute community knows very little of the Dutch flutist-composer. The purpose of this treatise is to present Offermans's pedagogical ideas as a modern day flutist-composer so that his knowledge, creativity, and unique perspective may be made available to a larger flute population. A brief overview of the development of contemporary flute music will set the stage for the emergence of Offermans's role in the flute world. A biographical sketch of Offermans follows, along with a discussion of his teaching philosophy and four pedagogical themes that reoccur in his teaching and methods: extended techniques, interculturalism, improvisation, and body movement. Other pedagogical applications associated with these themes are discussed in addition. Finally, the concept of holism in education

is explored using Offermans as an example of a holistic pedagogue.

Kierkegaard's Concepts is a comprehensive, multi-volume survey of the key concepts and categories that inform Kierkegaard's writings. Each article is a substantial, original piece of scholarship, which discusses the etymology and lexical meaning of the relevant Danish term, traces the development of the concept over the course of the authorship, and explains how it functions in the wider context of Kierkegaard's thought. Concepts have been selected on the basis of their importance for Kierkegaard's contributions to philosophy, theology, the social sciences, literature and aesthetics, thereby making this volume an ideal reference work for students and scholars in a wide range of disciplines.

A Complete Guide for Students and Performers Oxford University Press

For the flutist wishing to perform music composed by women, this annotated catalog will come as a most welcome addition to the numerous flute bibliographies now available. Boenke has spent four years gleaning all possible sources to come up with several hundred listings of composers from three centuries and 40 different countries. When the information is available, she lists

publisher and the OCLC system record number after the routinely listed title and instrumentation. In addition to the alphabetical listing are indexes for instrumentation, title, publisher, and composer. A short list of sources is heavy on LC and NUC catalogs as well as the several standard sources on women in music. This volume could serve as an example for instrument-specific music bibliographies. For flutists it is priceless. "Choice" This book, an alphabetical listing of flute music by women composers, provides ready access to flute music that is published or available in manuscript form. Unlike any previous handbook of the flute repertoire, it is devoted entirely to the works of women, the vast majority of whom are not mentioned in the standard catalogs of flute literature. A carefully compiled study, the volume examines the quantity, variety, and scope of women's work in this genre and includes composers from more than forty countries, spanning three centuries. It contains works for solo flute, duets, flute and piano, concertos, woodwind quintets, other chamber ensembles, or any work that employs soloistic use of the flute. It also provides biographical information on the composers, publishers, availability of works, and annotations on the works themselves. All compositions are indexed by title and by instrumentation, and publishers and contemporary composers are listed with current addresses, to

facilitate the ordering of music. The first published volume of its kind, this unusual work will draw attention to valuable and unknown repertoire in this genre and provide the opportunity for women's works to be heard more often. It will be useful in all university music libraries and conservatories, and it will be a valuable resource for professional flutists, teachers of flute, and researcher in women's studies.

Crossing Over: Essentials for Jazz and Classical Flute The Flute and Flute Playing

"The Māori people, native to New Zealand, have a rich culture steeped in intricate musical traditions. Contemporary composers from New Zealand are increasingly evoking the spirit and essence of traditional Māori music in fusion with Western classical musical conventions in works written for Western trained musicians. The Western flute is one of the most frequently used instruments in these crossover works as the flute is able to emulate many features of the traditional Māori instruments (many of which are considered flutes themselves). Works such as 'Taurangi' for flute and piano by Gillian Whitehead, 'Te Tangi e te Matui' for solo flute by Helen Fisher, and the concerto 'Maui Tikitiki a Taranga' for flute and orchestra by Maria Grenfell, are all pieces which display this fusion of Māori and Western traditions. These pieces are quickly becoming standard modern repertoire for flutists. Due to the lack of academic resources available to Western musicians pertaining to maori music, there is some difficulty in the comprehension and performance of such pieces. Māori musical practices are vastly different from Western musical concepts, forcing composers to communicate Māori ideas in numerous ways which lack standardization. The most common means of emulating traditional Māori instruments, and/or inherently Māori musical concepts and ideas, tends to be the use of extended techniques, the programmatic integration of myth, and the incorporation of text and song. Although the pieces being discussed are influenced or inspired by New Zealand's unique cultural heritage, the application of the techniques used within these works are seen in other contemporary works as well. The fusion of Western Art music and Folk music from all over the world is popular amongst composers of the Western classical tradition, and continues to enrich the repertoire available to Western musicians." -- Abstract.

In *Working Class Heroes*, David Simonelli explores the influence of rock and roll on British society in the 1960s and '70s. At a time when social distinctions were becoming harder to measure, rock musicians appeared to embody the mythical qualities of the idealized working class by perpetuating the image of rebellious, irreverent, and authentic musicians.

Revivals - movements that revitalize, resuscitate, or re-indigenize traditions perceived as threatened or moribund into new temporal, spatial, or cultural contexts - have been well-documented in Western Europe and Euro-North America. Less documented are the revival processes that have been occurring and recurring elsewhere in the world. And particularly under-analyzed are the aftermaths of revivals: the new infrastructures, musical styles, performance practices, subcultural communities, and value systems that have grown out of revival movements. The Oxford Handbook of Music Revival helps us achieve a deeper understanding of the role and development of traditional, folk, roots, world, classical, and early music in modern-day postindustrial, postcolonial, and postwar contexts. The book's thirty chapters present innovative theoretical perspectives illustrated through new ethnographic case studies on diverse music cultures around the world. Together these essays reveal the potency of acts of revival, resurgence, restoration, and renewal in shaping musical landscapes and transforming social experience. The contributors present research from Euro-America, Native America, Latin America and the Caribbean, Africa, Europe, the former Soviet bloc, Asia, Australia, and the Pacific. They enrich the field by applying approaches and insights from across the disciplines of ethnomusicology, ethnochoreology, historical musicology, folklore studies, anthropology, ethnology, sociology, and cultural studies. The book makes a powerful argument for the untapped potential of revival as a productive analytical tool in contemporary, global contexts—one that is crucial for understanding manifestations of musical heritage in postmodern, cosmopolitan societies. With its detailed treatment of authenticity, recontextualization, transmission, institutionalization, globalization, and other key concerns, the collection makes a significant impact far beyond the field of revival studies and is crucial for understanding contemporary manifestations of folk, traditional, and heritage music in today's postmodern cosmopolitan societies.

Tradition and Creativity in Korean Taegŭm Flute Performance describes the taegŭm as a representation of Korean culture in the contemporary world. Through the development and performance of creative works, this horizontal bamboo flute reflects both tradition and contemporary creativity. The first part of the book outlines the historical background of the taegŭm. The author illuminates the potential future of the Korean flute in a globalised world through the analyses of three musical works for taegŭm. The second part of the book draws on approaches of Practice Research within ethnomusicology and sociology to examine the ways in which the taegŭm tradition interacts with, and responds to, different genres in performance. Documenting collaborative encounters with musicians from three musical cultures: jazz, Western art and electroacoustic music, the result is an innovative exploration of the musical and social relationships between composers, performers and audiences in intercultural performances, contrasting traditional uses of the taegŭm with perspectives on its use today.

The eminent philosopher D. D. Raphael presents the culmination of a lifetime's study of the development of the idea of justice, from the ancient world to the late twentieth century. His aim is not just historical but philosophical: to illuminate our understanding of justice. His original approach to the subject draws not only on classic texts by such philosophers as Plato, Aristotle, Hume, Mill, and Rawls, but also on the Bible and Greek tragedy, and some neglected but important thinkers in the modern era. Lucid and stimulating, Concepts of Justice can be enjoyed by anyone interested in moral and political thought.

Method for the One-Keyed Flute Oxford University Press, USA

In many places around the world, flutes and the sounds of flutes are powerful magical forces for seduction and love, protection, vegetal and human fertility, birth and death, and other aspects of human and non-human behavior. This book explores the cultural significance of flutes, flute playing, and flute players from around the world as interpreted from folktales, myths, and other stories—in a word, "flutelore." A scholarly yet readable study, *World Flutelore: Folktales, Myths, and Other Stories of Magical Flute Power* draws upon a range of sources in folklore, anthropology, ethnomusicology, and literary analysis. Describing and interpreting many examples of flutes as they are found in mythology, poetry, lyrics, and other narrative and literary sources from around the world, veteran ethnomusicologist Dale Olsen seeks to determine what is singularly distinct or unique about flutes, flute playing, and flute players in a global context. He shows how and why world flutes are important for personal, communal, religious, spiritual, and secular expression and even, perhaps, existence. This is a book for students, scholars, and any reader interested in the cultural power of flutes.

First Published in 1994. In their quest for new sound materials, avant-garde musicians often produce sounds which accidentally bear a strong resemblance to traditional instruments. While conventional Western instruments have taken on a functional role, instruments such as the shakuhachi are still closely associated with their cultural, religious, and historical roots. The colorful and unique shakuhachi has become the most widely known and used Japanese instrument. This collection provides a comprehensive historical overview of the shakuhachi, its technical aspects and its relationship to the flute.
