MCKENZIE MORROW

Current List of Medical Literature Manchester University Press

This book asks whether the well-established privilege against self-incrimination applies to corporations, whether it should, and if so, to what extent. Those questions have an increasingly important EU criminal law dimension. To answer them, this study draws on comparative insights from Belgium, England and Wales, and the US; as well as case law of the ECtHR and EU Law. It covers the established CJEU case law in competition cases, the recent CJEU ruling in *DB v Consob* and addresses Directive (EU) 2016/343. It will appeal to scholars of EU criminal law, but also to white-collar and competition practitioners.

An Introduction to the Sociology of Law Oxford University Press, USA

First published in 1999, this book explores pint points, compares and dates the development of product differentiation and variety. This book also analyses' how firms have embraced a variety of ways of efficiently managing this verity though production, the design of the product as well as in the relations with the suppliers and distributors.

Art from Start to Finish John Wiley & Sons

This is the remarkable story of how two brothers - Edouard and Andre Michelin - turned a sleepy, family tyre firm in the heart of rural France into one of the most innovative and successful industrial empires in the world. Edouard, a landscape painter at the Ecole des Beaux Arts, displayed an engineering genius for tyre-making and product innovation, whilst Andre, trained as an engineer, displayed a creative genius for advertising and marketing. Together they kick-started the world motor industry and created a tourist industry around the motor car and their now legendary "Michelin Guides". The Michelin history, as described here by Herbert Lottman, reveals

insights into the development of this remarkable business.

French Bibliographical Digest Routledge

Ce livre est, ou veut être, le fruit de trente ans de coexistence avec l'automobile, avec les constructeurs, les professionnels, les utilisateurs. Directeur de la rédaction de l'Auto-Journal, Gilles Guérithault a participé, en 1950, à sa création. Depuis lors, les lecteurs de ce bimensuel ont eu la primeur des informations et des documents relatifs aux nouveaux modèles, bien avant leur lancement officiel. En France, en Europe, aux États-Unis, l'auteur a suivi, de très près, jusqu'à l'aventure inclusivement, la vie de l'automobile, son évolution, ses difficultés, ses conquêtes, ses progrès. Nourries de souvenirs, de réflexions, de témoignages, de perspectives, de confidences, de révélations, ces pages ne renferment pas de considération technique ou didactique. Les hommes y prennent toujours le pas sur la mécanique. Dans l'automobile, plus encore que dans toute autre

activité, les personnalités jouent le premier rôle. Elles se manifestent ici sous des aspects peu connus. Les chapitres qui composent ce livre, traitent de sujets variés et distincts. Ce qui les unit, c'est la passion de l'automobile, et celle de la franchise, la volonté d'y voir clair, dans un présent complexe et face à un avenir qui ne le sera pas moins. C'est aussi celle d'informer le lecteur, et de lui être utile. À bien des égards, l'auteur exprime des vues, qui vont à l'encontre des opinions couramment admises. La liberté d'expression totale, qui caractérise l'Auto-Journal, se retrouve ici sous une forme nouvelle.

The Michelin Men Routledge

Ibuprofen is widely used throughout the world for a variety of conditions. This reference work provides a comprehensive and critical review of the basic science and clinical aspects of the drug. The book begins with the history and development of the drug and its current patterns of use world-wide before moving on to examine its basic pharmaceutical attributes and medicinal chemistry. The properties of various formulations are described (oral prescription and OTC, topical and others) are described. The pharmacokinetics of ibuprofen in animals and humans is discussed - highlighting the factors affecting absorption, distribution, metabolism and elimination. The clinical pharmacology and toxicology and the drug's mechanisms of action in different disease states and conditions are covered. The therapeutic uses in various acute and inflammatory conditions is detailed. Also considered are the safety versus efficacy issues and the pharmacoepidemiological data.

Bibliographical Bulletin Routledge

The exiled Russian sociologist and legal scholar Nicholas S. Timasheff's place in the forefront of the sociology of law was established with the publication, in 1939, of *An Introduction to the Sociology of Law*. His magnum opus articulates a systematic legal sociology. The book's title is misleading, giving the false impression that the volume is merely a textbook intended for classroom use. It is much more than this. *An Introduction to the Sociology of Law* is a sophisticated treatise that explains, precisely and methodically, the law as a social force. It makes two fundamental points: law can, indeed must, be studied by sociology, and law is a combination of socio-ethical and imperative coordination of human behavior.

Bibliographical Bulletin Routledge

Forged at the heart of international political bodies by expert researchers, the innovation cluster concept has been incorporated into most public policies in industrialized countries. Based largely on the ideas behind the success of Silicon Valley, several imitative attempts have been made to geographically group laboratories, companies and training in particular fields in order to generate "synergies" between science and industry. In its first part, *Innovation in Clusters* analyzes the infatuation with the system of clusters that is integral to innovative policies by analyzing its socio-historical context, its revival in management and its worldwide expansion, looking at a French example at a local level. In its second part, the book explores a specialized biotechnology cluster dating back to the end of the 1990s. The sociological survey conducted twenty years later sheds a different light on the dynamics and relationships between laboratories and companies, contradicting the commonly held belief that innovation is made possible by geographical proximity.

The Psychoanalytic Study of Society, V. 12 Routledge

This book addresses one central question: if justice is to be done in the name of the community, how far do the decision-makers need to reflect the community, either in their profile or in the opinions they espouse? Each contributor provides an answer on the basis of a careful analysis of the rules, assumptions and practices relating to their own national judicial system and legal culture. Written by national experts, the essays illustrate a variety of institutional designs towards a better reflection of the community. The involvement of lay people is often most visible in judicial appointments at senior court level, with political representatives sometimes appointing judges.

They consider the lay involvement in the judicial system more widely, from the role of juries to the role of specialist lay judges and lay assessors in lower courts and tribunals. This lay input into judicial appointments is explored in light of the principle of judicial independence. The contributors also critically discuss the extent to which judicial action is legitimised by any 'democratic pedigree' of the judges or their decisions. The book thus offers a range of perspectives, all shaped by distinctive constitutional and legal cultures, on the thorny relationship between the principle of judicial independence and the idea of democratic accountability of the judiciary.

Based on the analysis of more than 35,000 company balance sheets, annual series of gross private investment have been constructed for 15 different sectors in Belgium between 1900 and 1995. The resulting data clearly show that the level of gross investment in the Belgian economy, expressed as a percentage of national income, was generally much lower than during the post world war two period. An international comparison demonstrates that Belgium usually invested far less than its major competitors. Moreover, the traditional coal and metal industries benefitted most of the investment effort instead of newer sectors like the chemical industry. Thus the present study contributes to explaining for the relatively poor growth performances of the Belgian economy prior to the 1960s.

Ibuprofen CRC Press

This text gathers together group of contributors from the worlds of sociology, musicology, literature, and communications to discuss how artists from jazz musicians to painters work: how they coordinate their efforts, how they think, how they start, and, of course, how they finish their productions.

Willing's Press Guide and Advertisers' Directory and Handbook BRILL

This volume explores how reproduction and reproducibility impact artistic and literary creation while also examining the ways in which reproducibility impacts our practices and disciplines. Ce volume explore l'impact de la reproduction et de la reproductibilité sur la création artistique et littéraire, mais aussi l'impact de la reproductibilité sur nos pratiques et sur nos disciplines.

Newspaper Press Directory R. R. Bowker

This book deals with specific aspects of psychic functioning and development in adolescence. It offers a conspectus of present-day psychoanalytic understanding of the process of adolescence and its vicissitudes. The book is helpful for those interested in the field of adolescent psychoanalysis.

In this book philosophers try to answer the following question: What is globalization and what does "globe" or "world" (monde) signify? Rémi Brague returns to the Greek idea of the cosmos in order to track the worldhood (mondanéité) of the world, that is, the process by which the idea of the world is formed. Don Ihde shows how a world has developed, in which technologies are no longer considered neutral means serving the ends of human action, but become the very means by which people exist in the world. Vittorio Mathieu describes the economical world at two levels - that of the individual and that of society. Tomonobu Imamichi analyses the capacity of aesthetic experience to disclose a world other than the world of technological efficiency. Francisco Miró Quesada C. emphasises that the great political questions are not solvable without worldviews that express value systems. David Rasmussen describes sensus communis as a cosmopolitan concept, which founds a political globalization of the world. And Peter Kemp attempts to grasp the meaning of that globalization upon which the destiny of our planet depends.

From Additive Manufacturing to 3D/4D Printing 3 FeniXX

This book presents the theories and observations of each major contributor to the discussion of psychoanalytic technique and reveals the particular advantages and disadvantages which fall to the various theoretical positions and orientations adopted by each contributor.

Willing's Press Guide University of Chicago Press

Intelligent Decision Technologies (IDT) seeks an interchange of research on intelligent systems and intelligent technologies which enhance or improve decision making in industry, government and academia. The focus is interdisciplinary in nature, and includes research on all aspects of intelligent decision technologies, from fundamental development to the applied system. This volume represents leading research from the Third KES International Symposium on Intelligent Decision Technologies (KES IDT'11), hosted and organized by the University of Piraeus, Greece, in conjunction with KES International. The symposium was concerned with theory, design, development, implementation, testing and evaluation of intelligent decision systems. Topics include decision making theory, intelligent agents, fuzzy logic, multi-agent systems, Bayesian networks, optimization, artificial neural networks, genetic algorithms, expert systems, decision support systems, geographic information systems, case-based reasoning, time series, knowledge management systems, rough sets, spatial decision analysis, and multi-criteria decision analysis. These technologies have the potential to revolutionize decision making in many areas of management, healthcare, international business, finance, accounting, marketing, military applications, ecommerce, network management, crisis response, building design, information retrieval, and disaster recovery for a better future. Vive l'auto ! Bloomsbury Publishing

. Topical . Written by leading Japanese, America, and European scholars . Based on proceedings of prestigious international conference Japan is now the world's largest producer of cars but it only began to catch up with its competitors after World War II by studying and modifying the Ford system of mass production implemented first in the USA in the early part of the century. Other countries have also developed the system in their own ways with varying degrees of success. The papers in this volume will examine and compare the experiences of different countries in modifying the Ford system, and the impact of the quality control movement' and lean production in Japan."

World and Worldhood / Monde et Mondanéité Taylor & Francis

With a turnover of some 5-15 billion € / year, the additive manufacturing has industrial niches bearers thanks to processes and materials more and more optimized. While some niches still exist on the application of additive techniques in traditional fields (from jewelery to food for example), several trends emerge, using new concepts: collective production, realization of objects at once (without addition Of material), micro-fluidic, 4D printing exploiting programmable materials and materials, bio-printing, etc. There are both opportunities for new markets, promises not envisaged less than 10 years ago, but difficulties in reaching them.
