The Hero with a Thousand Faces New Directions Publishing

Joseph Campbell, arguably the greatest mythologist of our time, was certainly one of our greatest storytellers. This new cloth edition of *The Hero's Journey*, published to celebrate the 100th anniversary of Campbell's birth, recounts his own quest and conveys the excitement of his lifelong exploration of our mythic traditions, what he called "the one great story of mankind."

Myths to Live By Ballantine Books

The story of Hammurabi is the story of forty-three years jampacked with conquest, temple and wall building, irrigation efforts, and lawmaking, but it's also a story of broken relations and rising and falling empires. It's a story of betrayal and shifting alliances, a story where even the gods take a backseat to the matters of common men.

Inanna Returns Bollingen Foundation

From revered Colombian writer Laura Restrepo comes the smart, thrilling story of a young woman

trying to outrun a nightmare. María Paz is a young Latin American woman who, like many others, has come to America chasing a dream. When she is accused of murdering her husband and sentenced to life behind bars, she must struggle to keep hope alive as she works to prove her innocence. But the dangers of prison are not her only obstacles: gaining freedom would mean facing an even greater horror lying in wait outside the prison gates, one that will stop at nothing to get her back. Can María Paz survive this double threat in a land where danger and desperation are always one step behind, and safety and happiness seem just out of reach?

Snow Crash Llewellyn Worldwide

Over the years, startling evidence has been unearthed, challenging established notions of the origins of Earth and life on it, and suggesting the existence of a superior race of beings who once inhabited our world. The product of thirty years of intensive research, *The 12th Planet* is the first book in Zecharia Sitchin's prophetic Earth Chronicles series--a revolutionary body of work that

offers indisputable documentary proof of humanity's extraterrestrial forefathers. Travelers from the stars, they arrived eons ago, and planted the genetic seed that would ultimately blossom into a remarkable species...called Man. *The 12th Planet* brings to life the Sumerian civilization, presenting millennia-old evidence of the existence of Nibiru, the home planet of the Anunnaki, and of the landings of the Anunnaki on Earth every 3,600 years, and reveals a complete history of the solar system as told by these early visitors from another planet. Zecharia Sitchin's Earth Chronicles series, with millions of copies sold worldwide, deal with the history and prehistory of Earth and humankind. Each book in the series is based upon information written on clay tablets by the ancient civilizations of the Near East. The series is offered here, for the first time, in highly readable, hardbound collector's editions with enhanced maps and diagrams.

The Book of the Dead Harper Collins

The Book of the Dead is the title now commonly given to the great collection of funerary texts

which the ancient Egyptian scribes composed for the benefit of the dead. These consist of spells and incantations, hymns and litanies, magical formulae and names, words of power and prayers, and they are found cut or painted on walls of pyramids and tombs, and painted on coffins and sarcophagi and rolls of papyrus. This book is the treatise and analysis of *The Book of the Dead*, (also known as *Spells of Coming and Forth by Day*), by Egyptologist E. A. Wallis Budge

Discover Myth "There's no one quite like Joseph Campbell. He knows the vast sweep of man's panoramic past as few men have ever known it." --The Village Voice Joseph Campbell famously compared mythology to a kangaroo pouch for the human mind and spirit: "a womb with a view." In *Myths to Live By*, he examines all of the ways in which myth supports and guides us, giving our lives meaning. Love and war, science and religion, East and West, inner space and outer space — Campbell shows how the myths we live by can reconcile all of these pairs of opposites and bring a sense of the whole. This classic has been newly illustrated and annotated in its first new edition since its original publication, which also marks the first ebook in the *Collected Works* of Joseph Campbell series. In the tradition of *The Power of Myth* and *Pathways to Bliss*, *Myths to Live By* remains one of Joseph Campbell's most enduring, popular, and accessible works.

From a renowned historian comes a groundbreaking narrative of humanity's creation and evolution—a #1 international bestseller—that explores the ways in which biology and history have defined us and enhanced our understanding of what it means to be “human.” One hundred thousand years ago, at least six different species of humans inhabited Earth. Yet today there is only one—homo sapiens. What happened to the others? And what may happen to us? Most books about the history of humanity pursue either a historical or a biological approach, but Dr. Yuval Noah Harari breaks the mold with this highly original book that begins about 70,000 years ago with the appearance of modern cognition. From examining the role evolving humans have played in the global ecosystem to charting the rise of empires, *Sapiens* integrates history and science to reconsider accepted narratives, connect past developments with contemporary concerns, and examine specific events within the context of larger ideas. Dr. Harari also compels us to look ahead, because over the last few decades humans have begun to bend laws of natural selection that have governed life for the past four billion years. We are acquiring the ability to design not only the world around us, but also ourselves. Where is this leading us, and what do we want to become? Featuring 27 photographs, 6 maps, and 25 illustrations/diagrams, this provocative and insightful work is sure to spark debate and is essential reading for aficionados of Jared Diamond, James Gleick, Matt Ridley, Robert Wright, and Sharon Moalem.

“Fascinating . . . memorable . . . revealing . . . perhaps the best of Carl Sagan's books.”—The

Washington Post Book World (front page review) In *Cosmos*, the late astronomer Carl Sagan cast his gaze over the magnificent mystery of the Universe and made it accessible to millions of people around the world. Now in this stunning sequel, Carl Sagan completes his revolutionary journey through space and time. Future generations will look back on our epoch as the time when the human race finally broke into a radically new frontier—space. In *Pale Blue Dot*, Sagan traces the spellbinding history of our launch into the cosmos and assesses the future that looms before us as we move out into our own solar system and on to distant galaxies beyond. The exploration and eventual settlement of other worlds is neither a fantasy nor luxury, insists Sagan, but rather a necessary condition for the survival of the human race. “Takes readers far beyond *Cosmos* . . . Sagan sees humanity's future in the stars.”—Chicago Tribune

Digestive Intelligence tells the fascinating story of how our digestive systems are the centre of our bodies' second brain and how we think and live our emotions via our stomachs. Not surprising when you consider there is something equivalent to the size of a village football pitch hiding inside our bellies--that's the incredible magnitude of our digestive systems. Dr Matveikova answers the obvious questions: “How?” and “Why can this be so?” by explaining, in straight forward layman's language, that the digestive system contains more than one million neurones, identical to those in the brain and is responsible for producing 90% of the body's hormone, serotonin, the all-important hormone which makes us feel happy and full of wellbeing. It follows that, if our stomach is “out of sorts” we feel irritable and lacking in energy; and those feelings block our intellectual productivity, disorientate us and completely change our thought patterns and physical processes.

Explore Captivating Stories of Greek and Roman Gods, Goddesses and Monsters in this Ultimate Guide to Classical Mythology This book includes two captivating manuscripts: *Greek Mythology: Captivating Greek Myths of Greek Gods, Goddesses, Monsters and Heroes* *Roman Mythology: A Captivating Guide to Roman Gods, Goddesses, and Mythological Creatures* In addition to explaining how creation itself began, myths in many cultures have the function of “just-so” stories, explaining various other important things--the invention of fire, why we have weather, the names of plants and birds. Greek and Roman mythology is no different: enfolded in grand stories of gods and heroes are some of the ways the ancient Greeks and Romans understood many of the more common

aspects of their world. Although the gods and goddesses were powerful immortal beings, they were in many ways still very like the humans who worshiped them and who created these tales. The gods and goddesses are stricken with jealousy; they fall in love; they get angry when they feel slighted, and bestow gifts when they are honored. Likewise, the heroes are larger than life: they're stronger, faster, and more skilled than ordinary mortals, but they are still subject to pain, illness, and death. Within this book, you'll find the following myths and topics covered *The Creation of the Titans* *The Birth of the Olympians* and *The Downfall of the Titans* *Prometheus and Epimetheus* *The Birth of the Muses* *The Olympian Gods and Goddesses* *Hera, Queen of the Gods* *Hermes, Trickster, and Messenger of the Gods* *Grey-Eyed Athena, Goddess of Wisdom and Strategy* *Hephaestus, God of Fire and Smithcraft* *Artemis, Virgin Goddess of the Hunt* *Apollo, God of Music and Healing* *Dionysus, God of Wine and Ritual Madness* *Ares, God of War, and Aphrodite, Goddess of Love* *The Story of Demeter and Persephone* *Demigods, Heroes, and Monsters* *The Story of Perseus* *Heracles* *Theseus and the Minotaur* *The Trojan Connection* *What History and an Analysis of Myth Tell Us* *Founding of Rome* *Purely Roman Gods* *The Creatures of Roman Mythology* *Borrowings from Etruria* *Influence of the Greek Pantheon* *Greek Creatures Adopted by the Romans* *Roman Conquests of the Celts* *Truth Behind the Roman Gods* *And More* Get the book now and learn more about *Classical Mythology*

The companion volume to *The Earth Chronicles* series that reveals the identity of mankind's ancient gods • Explains why these “gods” from Nibiru, the Anunnaki, genetically engineered Homo sapiens, gave Earthlings civilization, and promised to return • 30,000 sold in hardcover Zecharia Sitchin's bestselling series *The Earth Chronicles* provided humanity's side of the story concerning our origins at the hands of the Anunnaki, “those who from heaven to earth came.” In *The Lost Book of Enki* we now view this saga from the perspective of Lord Enki, an Anunnaki leader revered in antiquity as a god, who tells the story of these extraterrestrials' arrival on Earth from the planet Nibiru. In his previous works Sitchin compiled the complete story of the Anunnaki's impact on human civilization from fragments scattered throughout Sumerian, Akkadian, Babylonian, Assyrian, Hittite, Egyptian, Canaanite, and Hebrew sources. Missing from these accounts, however, was the perspective of the Anunnaki themselves. What was life like on their own planet? What motives propelled them to settle on Earth--and what drove them from their new home? Convinced of the existence of a lost book that held the answers to these questions, the author began his search for evidence. Through exhaustive research of primary sources, he has here re-created tales as the memoirs of Enki, the leader of these first “astronauts.” What takes shape is the story of a world of mounting tensions, deep rivalries, and sophisticated scientific knowledge that is only today being confirmed. An epic tale of gods and men unfolds, challenging every assumption we hold about our past and our future.
