 As the digital economy changes the rules of the game for enterprises, the role of software and IT architects is also transforming. Rather than focus on technical decisions alone, architects and senior technologists need to combine organizational and technical knowledge to effect change in their company's structure and processes. To accomplish that, they need to connect the IT engine room to the penthouse, where the business strategy is defined. In this guide, author Gregor Hohpe shares real-world advice and hard-learned lessons from actual IT transformations. His anecdotes help architects, senior developers, and other IT professionals prepare for a more complex but rewarding role in the enterprise. This book is ideal for: Software architects and senior developers looking to shape the company's technology direction or assist in an organizational transformation Enterprise architects and senior technologists searching for practical advice on how to navigate technical and organizational topics CTOs and senior technical architects who are devising an IT strategy that impacts the way the organization works IT managers who want to learn what's worked and what hasn't in large-scale transformation

This book offers a wide-ranging and up-to-date overview of the basic science underlying PET and its preclinical and clinical applications in modern medicine. In addition, it provides the reader with a sound understanding of the scientific principles and use of PET in routine practice and biomedical imaging research. The opening sections address the fundamental physics, radiation safety, CT scanning dosimetry, and dosimetry of PET radiotracers, chemistry and regulation of PET radiopharmaceuticals, with information on labeling strategies, tracer quality control, and regulation of radiopharmaceutical production in Europe and the United States. PET physics and instrumentation are then discussed, covering the basic principles of PET and PET scanning systems, hybrid PET/CT and PET/MR imaging, system calibration, acceptance testing, and quality control. Subsequent sections focus on image reconstruction, processing, and quantitation in PET and hybrid PET and on imaging artifacts and correction techniques, with particular attention to partial volume correction and motion artifacts. The book closes by examining clinical applications of PET and hybrid PET and their physiological and/or molecular basis in conjunction with technical foundations in the disciplines of oncology, cardiology and neurology, PET in pediatric malignancy and its role in radiotherapy treatment planning. Basic Science of PET Imaging will meet the needs of nuclear medicine practitioners, other radiology specialists, and trainees in these fields.

The three steps of salvation in a nutshell are these - becoming a Christian; living the Christian life; and going to heaven. Theologians refer to these three steps as Justification, Sanctification, and Glorification. The first and third steps are instantaneous experiences, but the second step (sanctification) is a life long process whereby the Holy Spirit works in the believer's life to bring about practical holiness and transform his character into the likeness of Christ. It is this second step of salvation with which the believer struggles, because it requires putting to death the deeds of the body (saying "no" to our sin nature), and obeying the promptings of the Holy Spirit (saying "yes" to God) - this is the essence of spiritual warfare. Sadly, most churches in the West today pretty much ignore the issue of Sanctification, and just focus on Justification - either out of ignorance about what Scripture teaches, or out of fear that living a holy life is essentially "legalism." But living a life of obedience to Christ in the power of the Holy Spirit has nothing to do with legalism - legalists think they "gain favor with God" by being good, but believers obey Christ out of gratitude because they already "have favor with God!" The "key" to sanctified living is gratitude! The Bible emphatically describes God as being both loving and holy, yet

western Christianity primarily focuses on God's love, and says almost nothing at all about His holiness. As such, the central message of most churches is one of love and forgiveness, with scarcely a word being said about holiness and death to sin and self. Satan is thrilled with our one dimensional Christianity, because it essentially leaves believers lukewarm, impotent and ineffectual. This book presents God's blueprint for spiritual development and portrays the "transformational experiences" every believer goes through in life - they include ups and downs, highs and lows, peaks and valleys, joy and suffering, victory and defeat - these experiences are the "norm" for every believer; none of us get a painless, trouble-free road to glory. Incidentally, the material presented in this book reflects the teachings of the most respected Christian theologians since the reformation - individuals the evangelical community has long recognized as being "pillars of the faith." To our lamentable regret, however, these teachings no longer have a prominent place in the vast majority of churches in the West. It is time for believers in America today to reconsider the fullness of God's call upon their lives. Donald W. Ekstrand is a retired pastor, adjunct professor, and author. The 22 full papers and 2 short papers included in this volume were carefully reviewed and selected from 44 submissions. The papers discuss key emerging topics and evolving practices in the area of educational computing research. They are organized in the following topical sections: Digital education across educational institutions; National policies and plans for digital competence;

Learning with digital technologies; and Management issues.

The Book of Transformations Cambridge Scholars Publishing
 trans•for•ma•tion tran(t)s-f?r-'ma-sh?n NOUN A marked change, of something or someone, usually for the better. Nature provides an amazing example of a transformation. A butterfly's life begins as an egg that becomes a larva. At its appointed time, a caterpillar breaks out and then begins to eat, and eat, and eat. Then the caterpillar spins a thread into a shell-like covering around its body. Inside this cocoon, the caterpillar changes into a pupa. The pupa grows into a beautiful, colorful, and graceful butterfly. People also go through transformations. From conception until death, we go through a series of changes. Once conceived, the life cycle stages begin and progress to produce a newborn baby. The baby grows and becomes a toddler, which then matures into an adolescent. Adulthood follows, and the process continues through mid-life through to old age. This experience is a natural transformation. There is also a spiritual transformation that we all should go through. This alteration involves changing on the inside and revealing it on the outside. You go through a conversion from living a worldly lifestyle to living a Christian life that is pleasing to God. You should desire and seek to achieve this spiritual makeover with all of your might. Many will confess to being a Christian, but are they really like Christ? You can't just name it and claim it. You have to live it. To be a Christian means to be Christ-like. you must learn to live like Christ, to love like Christ, forgive like Christ, even bless like Christ, etc. Some may say that living a Christian life is easier said than done. Why is that so? I think mainly because we have inherently conformed to this world, and this world promotes pretty much everything except Christian living. Sadly, the vast majority of those who call themselves Christians in these last days are as far from Christ as they can possibly be. They think they are living for Jesus with all of their wickedness and false doctrines and evil lifestyles. I believe that people want this transformation but are not too willing to take the necessary steps to make this process change. This change isn't always easy, but it is absolutely obtainable. You may ask, "What is required to live a Christian life?" The answer is in the Holy Bible. Transformation—Living a Christian Life can be summed up with one Bible verse: "And be not conformed to this world: but be ye transformed by the renewing of your mind, that ye may prove what is that good, and acceptable, and perfect, will of God" (Rom. 12:2). Many have conformed to the ways of the world. They need a renewing of their mind. They need to get back in alignment with the will of God. This book's purpose is to reunite you with God, His Word, and His will for your life, which is good and acceptable and perfect.

Given the current climate of economic and environmental uncertainty, it is all too easy for individuals to feel hopeless about their lives and indifferent to the problems of others. But according to leading psychologist, James Garbarino, this is the peak time for people to enhance their optimism, empathy, and emotional responsiveness. In his important new book, *The Positive Psychology of Personal Transformation*, Dr. Garbarino reveals the social basis for moral development in adversity, and the mental and physical benefits of psychological and spiritual growth. Drawing widely on his years as a healing professional and own experience of personal crisis as well as on decades of resilience and happiness literature, the author traces the evolution of the moral sense that affects all human relationships, including the one with the Earth itself. In these compelling pages, Dr. Garbarino: Examines how humans' deep bonds with dogs can model positive human relationships. Compares the risks and benefits of the "oblivious" versus the self-aware life. Analyzes the role of trauma in heightening our sense of the meaning of life and defines the experience of transformational grace in adversity. Explains current manifestations of narcissism and the need for "the positive death of the self." Asserts that every person is capable of "living an 'extraordinary' life." A book with vast significance across the healing disciplines, *The Positive Psychology of Personal Transformation* should be read, savored, and practiced by researchers, practitioners, and scientists in clinical child, school, and developmental psychology; social work; educational and community psychology; sociology; and public health.

A complete guide to non-invasive imaging techniques in cardiology Today's imaging technologies offer cardiologists more ways than ever to diagnose conditions of the heart without the need of endoscopies and other invasive procedures. Now in its third edition, *Cardiac CT, PET and MRI* continues to provide an in-depth explanation of these tools and their correct applications, while also exploring cardiac imaging's most recent and groundbreaking developments. This wide-ranging guide places CT, PET and MRI in a practical context, illustrating clearly their respective functions as they apply to specific cardiological disorders and clinical situations. With the addition of seven new chapters, it also offers an expanded insight into PET an increasingly popular and affordable diagnostic utility, hitherto underexplored in texts devoted to imaging. *Cardiac CT, PET and MRI* includes: Clinically focused examinations of CT, PET and MRI the three most popular non-invasive imaging modalities Illustrative full-color photos and images Access to a companion website featuring additional content Cardiologists, radiologists, nuclear medicine physicians, physicists, and imaging technologists alike will find the third edition of *Cardiac CT, PET and MRI* an informative and accessible resource with a direct use in their day-to-day practice.

A new and corrupt Emperor seeks to rebuild the ancient structures of Villjamur to give the people of the city hope in the face of great upheaval and an oppressing ice age. But when a stranger called Shalev arrives, empowering a militant underground movement, crime and terror becomes rampant. The Inquisition is always one step behind, and military resources are spread thinly across the Empire. So Emperor Urtica calls upon cultists to help construct a group to eliminate those involved with the uprising, and calm the populace. But there's more to The Villjamur Knights than just phenomenal skills and abilities...

This book looks at Russian women's mobilization and agency during the two periods of transformation, the turn of the 19th-20th century and the 20th - 21st century. Bringing together the parallels between the two great transformations, it focuses on both the continuities and breaks and, importantly, it shows them from the grassroots point of view, emphasizing the local factor. Chapters show the international and transnational aspects of Russian women's agency of different spheres and different historical periods. The book goes on to raise new research questions such as the evaluation and comparison of Soviet society and contemporary Russia from the point of view of gender and women's possibilities in society.

Recent scholarship has challenged post-Reformation ideas about the early Christian doctrines of salvation. This ground-breaking book draws together the conclusions of recent scholarship into a compelling and clear view of the early Christian paradigm of salvation. It presents the case that the early Christians focussed not on Christ's death on the cross or 'saving faith', but on moral transformation. They saw Jesus as God's appointed teacher, prophet, and leader, who died as a martyr in order to teach them a new way of life. Their paradigm of salvation centred upon this way of life taught by Jesus, and on following faithfully his example and teachings. Part 1: 'How the Gospels present Jesus' explores the way in which the early Christians understood the teaching of Jesus. It highlights five themes of Jesus' message: economics and wealth, moral purity, social equality, the temple system, and physical and spiritual affliction. It shows why people viewed Jesus as a divinely appointed teacher, prophet, and leader, and saw his death as a martyrdom for his cause and movement. Part 2: 'Doctrines of the early Christians' presents the key early Christian doctrines of salvation and shows why several post-Reformation doctrines conflict with their views. It shows that the early Christians believed God's final judgment is made on the basis of character and conduct. They believed that by following Jesus and transforming their lives morally, they would obtain positive judgment and resurrection. This part shows how the early Christians' ideas of faith, justification, forgiveness and grace all fit into this paradigm. Part 3: 'The importance of Jesus' looks at why the early Christians considered Jesus so significant; they focussed on the moral transformation he brought to their lives. This part highlights what they believed Jesus achieved for them, and how they used sacrificial language to explain these beliefs. It explores the evidence for viewing Jesus' death as a martyrdom, and for seeing his resurrection as equally important. Part 4: 'Ideas throughout history' shows that Christians held this paradigm of salvation for several centuries. It outlines the key changes that occurred from the 4th century through to the Reformation, which moved tradition away from the early Christian ideas. Finally, it offers a critique of modern post-Reformation doctrines of salvation.

Test developers need to provide a clear explication of the language ability constructs that underpin the tests they offer in the public domain; such an explication is essential for supporting claims about the validity - or usefulness - of test scores. This volume describes the theory and practice of Cambridge ESOL's approach to assessing second language writing ability. A comprehensive test validation framework is used to examine the tasks in Cambridge ESOL writing tests from a number of different validity perspectives that reflect the socio-cognitive nature of any assessment event. The authors show how an understanding and analysis of the framework and its components can assist test developers to operationalise their tests more effectively, especially in relation to the key criteria that differentiate one proficiency level from another. The book provides: an up-to-date review of relevant literature on assessing writing, an accessible and systematic description of the different proficiency levels in second language writing, a comprehensive and coherent basis for validating tests of writing. This volume is a rich source of information on all aspects of examining writing ability. As such, it will be of considerable interest to examination boards who wish to validate their own writing tests in a systematic and coherent manner, as well as to academic researchers and students in the field of language assessment more generally.
