The designer of Unreal and Gears of War

offers an eye-opening personal account

of the video game industry as it grew

from niche hobby to hundred-billion-

dollar enterprise. Video games are

dominating the planet. In 2020, they

brought in \$180 billion dollars

globally—nearly \$34 billion in the United

States alone. So who are the brilliant

designers who create these stunning

virtual worlds? Cliff Bleszinski—or CliffyB

as he is known to gamers—is one of the

few who've reached mythical, rock star

status. In *Control Freak*, he gives an

unvarnished, all-access tour of the

business. Toiling away in his bedroom,

Bleszinski created and shipped his first

game before graduating high school, and

at just seventeen joined a fledgling

company called Epic Games. He

describes the grueling hours, obscene

amounts of Mountain Dew and obsessive

focus necessary to achieve his singular

creative visions. He details Epic's rise to

industry leader, thanks largely to his

work on bestselling franchises Unreal

and Gears of War (and, later, his input

on a little game called Fortnite), as well

as his own awkward ascent from shy,

acne-riddled introvert to sports car-

driving celebrity rubbing shoulders with Bill Gates. As he writes, “No one is weirder than a nerd with money.” While the book is laced with such self-deprecating humor, Bleszinski also bluntly addresses the challenges that have long-faced the gaming community, including sexism and a lack of representation among both designers and the characters they create. *Control Freak* is a hilarious, thoughtful, and inspiring memoir. Even if you don’t play games, you’ll walk away from this book recognizing them as a true art form and appreciating the genius of their creators.

Get to grips with your insides and discover how the body works. This series takes readers on a visual tour of the human body, from the hair on your head to the tips of your toes. Packed with disgusting facts and amazing pictures, it's sure to keep young readers captivated. Following on from the successful *Science Crackers* series, *Body Works* explores the science of the Human Body. Bitesize facts and gross stories make information easy to digest. Cartoon doctors take readers on a tour of the human body, answering all the important questions about how a body really works. For example, why does it feel like there are butterflies in your stomach? Why does your leg sometimes go to sleep? Questions help children to relate to science, and comical

cartoons help them to visualise scientific facts. Each of the four books explains the functions of different organs and systems. Lively and informative text is supported by clearly labelled illustrations and detailed photographs. Each book contains five hands-on activities, from testing lung capacity to making a model stomach.
