Teachers, principals, school administrators, even school support staff know that it "takes a village to educate a child". Unfortunately, educators, parents and tax payers are often on different sides of issues, and work at cross purposes. Teachers get frustrated and stressed, and parents get angry, upset, and often aggressive and hostile towards school staff, often because they care so much. In this practical and hands-on book, teachers, administrators and school staff can learn to deal with even the most difficult parents, even those who are insulting and challenging. You'll learn over 100 hands-on, practical tactics to: Take control of difficult conversations with parents Maintain your own self-control when interacting with upset, and even abusive parents and members of the community. Reduce the time and stress involved in dealing with uncooperative parents. Apply the Psychology of anger, and basic psycholinguistic elements to establish rapport and bridges when conflict happens. Apply basic principles of Jiu Jitsu and Aikido to difficult conversations. Stop verbal abuse cold, while maintaining a professional demeanor and focusing on the welfare of the student. Handle non-verbal intimidation tactics smoothly and safely. Set limits and apply them to difficult interactions when the gentler methods of verbal self-defense fail. Ideal for teaching staff, but also school principals, school superintendents and school board officials -- anyone who deals directly with parents and community members. Included is a special chapter for principals and administrators with tactics to use to support teachers and staff in building bridges with the community, rate payers, and parents.

The surprising ways nature has influenced architecture. It may come as a surprise to learn that architects have found solutions to all kinds of design challenges in nature! Some have looked to nature to solve a structural problem, like creating an earthquake-proof bridge by mimicking the extremely long roots of a special type of grass. Others have turned to nature for artistic inspiration, designing buildings and bridges that evoke the movement of swimming fish or a bird in flight. When it comes to style and structure, nature and architecture make perfect partners! From cactuses to birds' wings, termite towers to honeycombs, inspiration for ingenious design is everywhere around us!

The verbal section of the GRE is essentially a vocabulary test. With a few exceptions, if you know the word, you will probably be able to answer the question correctly. Thus, it is crucial that you improve your vocabulary. Even if you have a strong vocabulary, you will still encounter unfamiliar words on the GRE. Many students write off questions, which contain words, they don't recognize. This is a mistake. This book introduces numerous techniques that decode unfamiliar words and prod your memory of words you only half-remember. With these techniques, you will often be able to squeeze out enough meaning from an unfamiliar word to answer a question correctly. Nevertheless, don't rely on just these techniques--you must study word lists. Obviously, you cannot attempt to memorize the dictionary, and you don't need to. The GRE tests a surprisingly limited number of words, and this book has 4000 prime candidates. Granted, memorizing a list of words is rather dry, but it is probably the most effective way of improving your performance on the verbal section. All the words you need for success on the GRE! Features: * 4000 Words Defined * Word Analysis section * 200 Prefixes, Roots, and Suffixes * Concise, practical definitions
