Turning 50? Tom Dryden
beat you to it three years
ago and, to help you find
your way (since you will
be losing your glasses
along with your hearing,
muscle tone, sort-term
memory and, probably,
your job,) compiled this
hilarious sneak preview of
what you can expect. At
50, Your Warranty Expires
examines topics that will
resonate with every
Boomer/Geezer, from the
drug companies'
disturbing use of classic

rock and roll songs to
hawk pharmaceuticals, to
how to best prepare for
the revolting medical
procedure your doctor will
expect you to undergo
regularly now that you're
50. You'll find essays
about these topics, along
with more than four dozen
of his award-winning
columns examining the
increasingly wacky world
in which you can expect
to live out the few short
years you have left. Read
it quickly because, at your
age, you never know...
Tom Dryden, who runs an
advertising agency by
day, started writing his
column, *Doubting
Thomas*, in 1999, for the
local newspaper in Wilton,
Conn., where he lives with
his wife, Judy, two college-
age sons, and two idiot
dachshunds. He was
pleased to be named Best
Humor Columnist in New
England by the New
England Press Association
until he remembered that
nobody in New England
has a sense of humor.

This book discusses the
economics of the music
industry in the context of
the changing landscape
brought about by
innovation, technological
change, and rapid
digitization. The ability of
digital technology to
reduce the transaction
costs of music copyright
licensing has all but
destroyed the traditional
media business models of
incumbent Performance
Rights Organizations
(PROs), music publishers,
record labels, and radio
and television stations. In
a climate where
streaming services are

rapidly proliferating and consumers prefer subscription models over direct ownership, new business models, such as direct licensing, are developing. This book provides an overview of the economics of the traditional music industry, the technology-induced changes in business models and copyright law, and the role of publishers, copyright holders and songwriters in the emerging direct licensing model. In Part One, the author examines the economic aspects of direct licensing as an alternative to the traditional blanket license for copyrighted musical compositions, with an emphasis on the often monopolistic nature of PROs. In Part Two, the author focuses on the music publisher and the role direct licensing and competition may play in the changing business models in the music industry and the potential benefits this may bring to copyright holders, such as songwriters. To compliment this model, the author proposes a maximum statutory fixed-rate for musical performances to further streamline the royalty process, especially where distributors such as

Google and YouTube are concerned. This book adds to the growing body of literature on the economics of music licensing in the digital age. It will be useful to those in the fields of economics and law, as well as music executives, musicians, songwriters, composers, and other industry professionals who are interested in understanding how technology, innovation and competition have reshaped the music industry.
