HESTER ALISSON

The Psychology of Magic and the Magic of Psychology DK Publishing (Dorling Kindersley)

Do you know your riffle shuffle from your French drop? Can you make a bottle disappear or read someone's mind? Learn the greatest magic tricks around and astound your friends and family, all without buying fancy props or equipment. From coins to muffins, make magic with

anything you can get your hands on. Including over 50 step-by-step magic tricks of varying levels of difficulty, this book is a great insight into the popular world of 'street magic' - where magicians specialise in up-close, informal tricks to bamboozle their audiences. A mix of graphics and up-close photography, and with clear, easy-to-read text and fascinating facts, this book is guaranteed to keep you entertained for hours. *Self-Working Card Tricks* Critical Thinking Books & Software
Magicians have dazzled audiences for

many centuries; however, few researchers have studied how, let alone why, most tricks work. The psychology of magic is a nascent field of research that examines the underlying mechanisms that conjurers use to achieve enchanting phenomena, including sensory illusions, misdirection of attention, and the appearance of mind-control and nuanced persuasion. Most studies to date have focused on either the psychological principles involved in watching and performing magic or "neuromagic" - the neural correlates of such phenomena. Whereas performers

sometimes question the contributions that modern science may offer to the advancement of the magical arts, the history of magic reveals that scientific discovery often charts new territories for magicians. In this research topic we sketch out the symbiotic relationship between psychological science and the art of magic. On the one hand, magic can inform psychology, with particular benefits for the cognitive, social, developmental, and transcultural components of behavioural science. Magicians have a large and robust set of effects that most researchers rarely exploit. Incorporating these effects into existing experimental, even clinical, paradigms paves the road to innovative trajectories in the study of human behaviour. For example, magic provides an elegant way to study the behaviour of participants who may believe they had made choices that they actually did not make. Moreover, magic fosters a more ecological approach to experimentation whereby scientists can probe participants in more natural environments compared to the traditional lab-based settings. Examining how magicians consistently influence spectators, for example, can

elucidate important aspects in the study of persuasion, trust, decision-making, and even processes spanning authorship and agency. Magic thus offers a largely underused armamentarium for the behavioural scientist and clinician. On the other hand, psychological science can advance the art of magic. The psychology of deception, a relatively understudied field, explores the intentional creation of false beliefs and how people often go wrong. Understanding how to methodically exploit the tenuous twilight zone of human vulnerabilities – perceptual, logical, emotional, and temporal – becomes all the more revealing when top-down influences, including expectation, symbolic thinking, and framing, join the fray. Over the years, science has permitted magicians to concoct increasingly effective routines and to elicit heightened feelings of wonder from audiences. Furthermore, on occasion science leads to the creation of novel effects, or the refinement of existing ones, based on systematic methods. For example, by simulating a specific card routine using a series of computer stimuli, researchers have decomposed the effect and reconstructed it into a more effective

routine. Other magic effects depend on meaningful psychological knowledge, such as which type of information is difficult to retain or what changes capture attention. Behavioural scientists measure and study these factors. By combining analytical findings with performer intuitions, psychological science begets effective magic. Whereas science strives on parsimony and independent replication of results, magic thrives on reproducing the same effect with multiple methods to obscure parsimony and minimise detection. This Research Topic explores the seemingly orthogonal approaches of scientists and magicians by highlighting the crosstalk as well as rapprochement between psychological science and the art of deception.

Big Book of Magic Tricks Booksales
Read minds! Make objects disappear and then reappear! One of the great magicians of all time reveals how to perform 200 masterful deceptions without training or special equipment to audiences of all sizes.

Mark Wilson's Complete Course in Magic QED Publishing

Magic with Everyday Objects is an easy-to-

follow how-to manual for novice magicians or those interested in picking up a few easy tricks to entertain at a moment's notice.

Complete Book of Magic and Magic Tricks
Rowman & Littlefield

"The best book yet on easy-to-do magic." — Martin Gardner Amaze friends, astonish your family, and fascinate any audience by infallibly dealing a royal flush, correctly predicting the outcome of the World Series, unmasking a psychic fraud, and performing a host of other dazzling deceptions. You can do it with the help of this book, one of the best guides to magic tricks that don't require long hours of practice or elaborate preparation. You'll find invaluable techniques — clearly demonstrated with abundant illustrations — for accomplishing magical feats with cards, coins, rope, comedy magic, mental displays of dexterity and much more, as well as expert advice for practicing psychological misdirection and dramatic presentation. Although the tricks in this book require little in the way of props, sleight of hand or a high degree of skill, the effects they produce are astounding. Novices especially will find Big Book of

Magic Tricks a wonderful introduction to the art of conjuring but the book is crammed with so much choice new information that even professional magicians can learn something. "This book is quality — the tricks are effective, the methods ingenious, and the advice Fulves gives on presenting the tricks properly is excellent." — Robert Dike Blair
Encyclopedia of Card Tricks Courier Corporation

Courier Corporation

Marvelous treasury of card magic presents exact details of 155 professional card tricks that anyone can learn. Card wizard John Scarne reworked these tricks to eliminate the need for sleight-of-hand. Simple instructions and clear diagrams illustrate Houdini's "Card on the Ceiling," Blackstone's "Card Trick Without Cards," Milton Berle's "Quickie Card Deal," more.

The Expert at the Card Table Running Press Kids

From simple to advanced, and using household and inexpensive props, Knack Magic Tricks includes tricks using cards, coins, handkerchiefs, and fruit, as well as mental tricks, anytime tricks, standup tricks, and tricks especially for kids (to be performed both for them and by them).

Algebra Magic Tricks Hamlyn

This resource book contains 20 magic tricks based on the properties of whole numbers that are intended to spark the interest and imagination of students.

Following each activity, students are asked to write about their discoveries and to create their own magic tricks. A matrix of skills for all the activities and lists of the materials required for each activity are included. Each of the activities has three sections: unraveling the trick, questions to ponder, and further investigations. The emphases of these activities are on student discovery, critical thinking, verbal and written communications, and creativity. The tricks work well in whole class or small group situations. (DDR) [Easy-to-Do Magic Tricks for Children](#) Bloomsbury Publishing USA Demonstrates sleight of hand and other magic tricks, and includes tips on performing before children and television cameras.

The Royal Road to Card Magic Turtleback Books

Master magicians of their time, Hatton and Plate recorded in this book — which they wrote in 1910 — solutions to problems that seemed unsolvable. Indispensible to today's amateur and professional magicians, the how-to manual explains 140 tricks performed with cards, coins, balls, eggs, handkerchiefs, and other common household items. 194 black-and-

white illustrations.

Knack Magic Tricks Courier Corporation
An extraordinary memoir about finding wonder in everyday life, from magician Nate Staniforth. Nate Staniforth has spent most of his life and all of his professional career trying to understand wonder--what it is, where to find it, and how to share it with others. He became a magician because he learned at a young age that magic tricks don't have to be frivolous. Magic doesn't have to be about sequins and smoke machines--rather, it can create a moment of genuine astonishment. But after years on the road as a professional magician, crisscrossing the country and performing four or five nights a week, every week, Nate was disillusioned, burned out, and ready to quit. Instead, he went to India in search of magic. Here Is Real Magic follows Nate Staniforth's evolution from an obsessed young magician to a broken wanderer and back again. It tells the story of his rediscovery of astonishment--and the importance of wonder in everyday life--during his trip to the slums of India, where he infiltrated a

three-thousand-year-old clan of street magicians. Here Is Real Magic is a call to all of us--to welcome awe back into our lives, to marvel in the everyday, and to seek magic all around us.

Mind-Blowing Magic Tricks for Everyone Penguin

The ultimate book of magic for kids from a world-famous magician, complete with photographs for easy to follow instructions. From one of the world's premier practitioners of classic magic, with years of experience instructing younger readers in the magical arts, comes this new revision of his complete guide to learning and performing fantastic feats of prestidigitation.
