* Outboard motor repair for the average guy * Fix up an old
outboard and SAVE \$1000 or more compared to buying a new
motor! With a little know-how and a few common tools, you can
fix an old motor—bring it back from the dead. Sometimes all it

takes is a squirt of WD-40 into the cylinder and a new spark plug.
Or a new set of points and condensers—which do not require
expert knowledge or black magic to install. Maybe the carburetor
needs cleaning and adjusting. You can do it! Max E. Wawrzyniak
III is an outboard motor guru. He advises you to find an old motor
at a yard sale for \$100 or so (and he tells you exactly which ones
to look for), and fix it up—rather than spending \$1500 or more on
a new motor. He is a big fan of “cheap power.” Get on the water
with money left in your pocket. With a basic understanding of
how these motors work, a little logical thinking, and a few hours’
work, you can go boating for a fraction of what everyone else has
to pay. Also—for the boater who already owns an outboard motor
of any age—this book demystifies these internal-combustion
marvels that can bring such frustration if they malfunction. You’ll

learn how they work, and the simple things you can do to keep them running forever. What Max teaches are not only money-saving skills, but can also be life-saving, as you will no longer be helpless in the face of engine trouble on the water. His clear instructions and over one hundred color photographs will make anyone into a capable outboard mechanic. INCLUDES: What to Buy, Where to Find It, Tools Needed and Where to Begin, The Ignition System, Carburetors, Water Pump Repairs, Recoil Starters, Fuel Tanks, Propellers, Lower Units, Emergency Shut-Down, Fuel Pump Conversion, Remote Controls: Shift and Throttle, Remote Control: Steering, Tiller Conversion, Trouble-Shooting, and Onboard Spares and Tools. This book has always been very popular and well-used in its print edition. Now it's available as an e-book so you can load it into your phone or tablet and always have this wealth of repair / maintenance information at your fingertips, even when out on your boat.

Lloyd's Register

Wisconsin entrepreneur Ole Evinrude will inspire children in this addition to the Badger Biographies series for young readers, where the story of Ole's invention, from drawing board to factory floor, is told in a reader-friendly format that includes historic images, a glossary of terms, and sidebars explaining how an outboard motor works. Ole Evinrude was born in Norway in 1877 and immigrated to the United States when he was five years old. The Evinrude family settled in Wisconsin and began farming, but it was clear from a very young age that Ole would not follow the

family tradition. Ole Evinrude was meant to work with boats. Building an outboard motor was not easy, though - Ole suffered numerous mechanical and financial setbacks along the way. After years of hard work and persistence, the Evinrude motor company was founded and Ole's outboard motors were an instant hit around the world. Ole continued to improve the design of his motor and attracted other entrepreneurs to the area, making Wisconsin the center of the outboard motor industry for decades.
