Since the late eighteenth century, academic engagement with political, economic, social, cultural and spatial changes in our cities has been dominated by theoretical frameworks crafted with reference to just a small number of cities. This book offers an important antidote to the continuing focus of urban studies on cities in 'the Global North'. *Urban Theory Beyond the West* contains twenty chapters from leading scholars, raising important theoretical issues about cities throughout the world. Past and current conceptual developments are reviewed and organized into four parts: 'De-centring the City' offers critical perspectives on re-imagining urban theoretical debates through consideration of the diversity and heterogeneity of city life; 'Order/Disorder' focuses on the political, physical and everyday ways in which cities are regulated and used in ways that confound this ordering; 'Mobilities' explores the movements of people, ideas and policy in cities and between them and 'Imaginations' investigates how urbanity is differently perceived and experienced. There are three kinds of chapters published in this volume: theories generated about urbanity 'beyond the West'; critiques, reworking or refining of 'Western' urban theory based upon conceptual reflection about cities from around the world and hybrid approaches that develop

both of these perspectives. *Urban Theory Beyond the West* offers a critical and accessible review of theoretical developments, providing an original and groundbreaking contribution to urban theory. It is essential reading for students and practitioners interested in urban studies, development studies and geography. *Middle East Economic Digest* Oxford Business Group
From desert sands to a glittering metropolis: the inside story of Dubai's transformation. In just two decades; Dubai has reinvented itself from a small; poor and quiet fishing village to a dazzling city with a vibrant urban life. How did this happen? Home to more than 200 nationalities—particularly those from the Indian subcontinent—the emirate's choice to welcome expatriates has paid off. Cultivating an open and welcoming culture; Dubai manages to attract people from all over the world; heartily embracing any entrepreneurial contribution they wish to make. The emirate is now also known for its cosmopolitan melting-pot culture; and its enabling environment to conduct business; and this; along with the tax-free system and hassle-free infrastructure; makes it a much sought-after site for multinational enterprises who want a base in Asia. Unlike the Gulf emirates that can count on petroleum wealth; Dubai has wound its way to prosperity by planning carefully and executing those plans methodically. Its airline and luxury construction have made it a popular destination for luxury tourism. Projects like the Burj al-Arab; the Palm Jumeirah and the Burj Khalifa; along with events like the world's richest horserace—the Dubai World Cup—and the Dubai Shopping Festival; have sustained tourist interest and focused the world's attention on the emirate. Pranay Gupte draws on his deep knowledge of the region and its leading personalities

to trace the city-state's extraordinary and fabulous journey.

Already a regional and global centre for business and finance, Dubai's reputation has been bolstered by the MSCI's decision to upgrade the UAE from frontier to emerging market status in 2014, while the emirate's successful Expo 2020 bid is expected to generate myriad opportunities for private investors across a range of sectors. Construction is thriving once again, driven in large part by strong retail sector growth, with various projects, including plans for the world's largest mall, indicating that the sector will maintain its position as the emirate's biggest GDP contributor moving forward. The transport and logistics framework is set for major expansion in the coming years as well, furthering cementing the emirate's status as a leading transport and logistics hub not just regionally, but globally too. The continued development of Dubai's retail and hospitality offerings, alongside the upgrades to its airports, should help to ensure robust growth in visitor numbers from both the region and further afield.

This volume presents innovative work on innovative methods, tools and practices aimed at supporting the transition of Asian and Middle Eastern cities and regions towards a more smart and sustainable dimension. The role of the built and urban environment are becoming more pronounced in Asia and Middle East as the regions continues to experience rapid increase in population and urbanisation, which have only led to an increase in environmental degradation but also rise in energy consumption

and emissions. Individual chapters covers timely topics such as sustainable infrastructure, transportation, renewable energy, water and methods supporting an innovative and sustainable development of urban areas. Real-world examples are presented to highlight recent developments and advancements in design, construction and transportation infrastructures. The volume is based on the best contributions to the 2nd GeoMEast International Congress and Exhibition on Sustainable Civil Infrastructures, Egypt 2018 - The official international congress of the Soil-Structure Interaction Group in Egypt (SSIGE).

Around the world, mass transit is struggling to compete with the private automobile. Yet a number of metropolitan areas have in recent decades managed to mount cost-effective and resource-conserving transit services that provide alternatives to car travel. What sets these places apart? Noted transportation expert Robert Cervero provides an on-the-ground look at more than a dozen mass transit success stories, introducing the concept of the "transit metropolis"--a region where a workable fit exists between transit services and urban form.
