DIABETES Diabetes Specialist Nurses: Improving Patient Outcomes and Reducing Costs February 2014 Key points A joint position statement from Diabetes UK, TREND-UK and the Royal College of Nursing

1. Diabetes Specialist Nurses (DSNs) are central to good patient care and outcomes including confident self-care management.

2. POSITION STATEMENT - Diabetes UK Trend are the leading brand of router cutters, routing jigs and routing accessories sold through a network of stockists in the United Kingdom, Ireland and USA. Trend products are also available online from ecommerce partners in Europe, New Zealand and Australia. Trend Machinery & Cutting Tools Ltd

- Less than 0.6 mmol/L is normal
- 0.6 to 1.5 mmol/L means you may be at risk of developing DKA so test again after 2 hours
- 1.6 to 2.9 mmol/L means you are at risk of DKA and should contact your diabetes team or GP as soon as possible
- 3 mmol/L or higher means you have a very high risk of

TYPE 1 DIABETES - Chelsea and Westminster Hospital The authors suggest that these trends might reflect the

effectiveness of diabetes prevention activities. In the US, for example, Magliano and colleagues suggest that the declining incidence of type 2 diabetes might be related to a small decrease in consumption of sugar sweetened beverages.

Trends in type 2 diabetes | The BMJ diabetes treatment: Useful resources | Diabetes UK: www.diabetes.org.uk | TREND-UK has leaflets on a range of diabetes-related topics, which can be downloaded at: www.trend-uk.org | If your blood glucose is persistently higher than usual (greater than 11 mmol/L), you will need to increase your insulin dose: | If your blood glucose levels are much higher What to do when you are unwell - NHS Oxfordshire CCG Diabetes UK recommends testing for ketones if blood glucose levels become high - usually above 15 mmol/L. Testing for ketones in this way can help detect the problem at an early stage This allows for advice and treatment to be given before the level of ketones in the blood becomes dangerous.
