MAGDALENA HOWE

Developing Language and Literacy with Young Children ASHA
Press

The heart of this book is a new approach to the teaching of language and literacy. Its focus is exemplary classroom practice built on rigorous theory and evidence. The approach combines new theory and dynamic practice in its advocacy for

contextualised teaching. This book shows how the teaching of smaller units of language, such as sentences, words, letters and phonemes, follows naturally from the context of whole texts. The book offers: practical examples, photographs from settings, case studies and action points to help any practitioner working with young children to develop one of the most crucial life skills, advice on how to build on children's motivation using whole texts, clear guidance on phonics teaching in an appropriate context and a unique blend of new theory and dynamic practice.

Languages and Children Taylor & Francis

Simple changes in a teacher's language can bring about profound

changes in students and classrooms. By paying attention to your words and tone of voice, you will: Increase students' engagement with academics Build positive community More effectively manage your classroom That is the message of *The Power of Our Words*, a book that has changed the teaching lives of tens of thousands of educators since it was first published in 2007. In this updated second edition you will find practical information to help you: Lead students in envisioning themselves achieving success Use questions that encourage deep and creative thinking Listen to students in ways that support their growth Reinforce students efforts and remind or redirect them when they go off track. Throughout, you will find an increased emphasis on using teacher language to support academic engagement and critical thinking skills as called for in the Common Core State Standards. And an updated, livelier format makes this second edition even easier to read.

Reading and Writing with English Learners Allyn & Bacon

ENDORSEMENTS "This book is a conduit for students, teachers, and teacher educators -- a carefully guided path to making language learning not only possible, but meaningful and fun " -- Marjorie Hall Haley, PhD, Board of Directors of the American Council on the Teaching of Foreign Languages (ACTFL), Director of Foreign Language Teacher Licensure, George Mason University "Professor Konyndyk has developed a foreign-language pedagogy that makes students' deserts bloom. Foreign-language instructors and special educators will find themselves grateful to her for this contribution. --Lynn E. Snyder, PhD, CCC-SLP, Professor Emerita and Former Director of the Center for Language and Learning, University of Colorado at Boulder "Though I was told for such a

long time 'No, you can't, ' you constantly were a voice saying 'Yes, you can and you will.' You not only helped show me that the world of language is one that is possible for me, but you also showed me the way that we . . . can have such a positive impact on the lives of others." --a personal note from one of Irene's own at-risk students ABOUT FOREIGN LANGUAGES FOR EVERYONE "This book is about how I learned to teach a second language to those who either have failed before or were not really given a chance to succeed. I wrote it to help others to be smart, productive teachers of foreign languages to students with learning disabilities. The book called me. My life journey prepared and inspired me to write it." --Irene Brouwer Konyndyk, from her preface Foreign Languages for Everyone is based on Professor Irene Brouwer Konyndyk's careful study and classroom experience teaching foreign languages effectively to students with learning disabilities. The goal of serving at-risk students became highly personal for Irene when she realized that her own daughter had a learning disability but could succeed academically with the right combination of multisensory learning experiences. This is a wonderfully practical and inspiring book loaded with practical tips and pedagogical insights for successfully teaching foreign languages to children, young people, high school and college students, and older adults who have difficulty learning a second language. ABOUT IRENE AND HER FREE ONLINE RESOURCES Irene Brouwer Konyndyk has taught languages at all levels -- from elementary through college. She received the Calvin College Innovative Teaching Award for her groundbreaking work developing a successful curriculum for at-risk second-language learners. She leads workshops across

North America. Her free website, FOREIGN LANGUAGES FOR EVERYONE, provides: (1) downloadable copies of book-related appendixes, forms, and lesson plans, (2) illustrative video and audio clips, (3) news about important developments at the intersections of special education, learning disabilities, and foreign-language instruction, and (4) a community for second-language instructors to share best practices. TEACHING ENGLISH AS A SECOND LANGUAGE (ESL) This book is ideal for educators and volunteers who teach English as a second language (ESL). Spotlight on Young Children Da Capo Lifelong Books

A child's very first word is a miraculous sound, the opening note in a lifelong symphony. Most parents never forget the moment. But that first word is soon followed by a second and a third, and by the age of three, children are typically learning ten new words every day and speaking in complete sentences. The process seems effortless, and for children, it is. But how exactly does it happen? How do children learn language? And why is it so much harder to do later in life? Drawing on cutting-edge developments in biology, neurology, psychology, and linguistics, Charles Yang's *The Infinite Gift* takes us inside the astonishingly complex but largely subconscious process by which children learn to talk and to understand the spoken word. Yang illuminates the rich mysteries of language: why French newborns already prefer the sound of French to English; why baby-talk, though often unintelligible, makes perfect linguistic sense; why babies born deaf still babble -- but with their hands; why the grammars of some languages may be evolutionarily stronger than others; and why one of the brain's earliest achievements may in fact be its most complex. Yang also puts forth an exciting new theory.

Building on Noam Chomsky's notion of a universal grammar -- the idea that every human being is born with an intuitive grasp of grammar -- Yang argues that we learn our native languages in part by unlearning the grammars of all the rest. This means that the next time you hear a child make a grammatical mistake, it may not be a mistake at all; his or her grammar may be perfectly correct in Chinese or Navajo or ancient Greek. This is the brain's way of testing its options as it searches for the local and thus correct grammar -- and then discards all the wrong ones. And we humans, Yang shows, are not the only creatures who learn this way. In fact, learning by unlearning may be an ancient evolutionary mechanism that runs throughout the animal kingdom. Thus, babies learn to talk in much the same way that birds learn to sing. Enlivened by Yang's experiences with his own young son, *The Infinite Gift* is as charming as it is challenging, as thoughtful as it is thought-provoking. An absorbing read for parents, educators, and anyone who has ever wondered about the origins of that uniquely human gift: our ability to speak and, just as miraculous, to understand one another.

Raising Multilingual Children MIT Press

Questions are often raised asking whether the learning of two or more languages in early childhood is an advantage in terms of the academic, cognitive and social benefits, or whether it causes confusion and difficulty for the child. This book explores language learning in early years education in a wide range of geographical contexts with a focus on second language learning and bilingualism. Drawing on a synthesis of theory, research and practice, this book contributes to the existing knowledge base concerning pre-literate skills and experiences of very young

children. Topics cover: Pre-school literacy development Literacy in the home Plurilingualism Technology in early language acquisition Chapters present theory and research related to practice in teacher education, policy-making, country case studies, home and school based projects, code switching and language use, and methodologies and approaches. This makes the book essential reading for researchers, academics, teacher trainers, and post-graduate students alike.

Teaching Languages to Young Learners Star Bright Books Talking Like Children is a series of captivating stories that show how age comes to be. Elise Berman analyzes adoption negotiations, efforts to keep food, and debates about supposed child abuse. In these situations, age differences emerge through the decisions people make, the emotions they feel, and the power they gain.

The Infinite Gift Routledge

It's no fun when you have to wait. And Hanna has to wait for her little brother Peter a lot. She waits at the speech-language pathologist's office, at story time-will it ever be her turn? Many brothers and sisters of children with a speech-language disorder have a hard time understanding why their sibling is getting extra attention. It's no surprise when they feel left out. This engaging story shows how Hanna, with a little help, learns to understand her feelings and find a way for both Peter and her to have their turn. The endearing illustrations bring the story to life and make this a warm and accessible story for sharing at bedtime-or anytime. This book can be used by parents, speech-language pathologists, and educators as a springboard for more conversations. It includes a section of helpful and practical

communication tips for the whole family. Discussion starters help children understand and communicate their feelings.

Growing Up With Language John Benjamins Publishing Company

Offers practical ways to support young dual language learners and their families. Addresses communicating, using technology, pairing children, and more.

How to Make Your Own Secret Language Guilford Publications Acknowledgements. Preface. Introduction. Key Concepts for Success: Elementary and Middle School Foreign Languages. Standards for Foreign Language Learning in the 21st Century: Overview. Section A: Focus on the Learner. 1. Characteristics of Young Learners. Second Language Acquisition.Cognitive Characteristics of the Learner.

Everybody Needs a Turn The Hanen Centre

With a focus on communicative language teaching as it reflects cognitive and second language acquisition theory, this classic in the field provides a wealth of strategies and activities ready to use in the K-8 foreign language classroom. This popular and completely updated text is the only comprehensive foreign language methods text for K-8 classrooms that is also accessible and engaging for undergraduate students. Languages and Children: Making the Match, Fourth Edition, provides extensive new information that is not easily accessible to the field. The Fourth Edition maintains the integrity of past editions while reflecting the new and fascinating language issues that exist in today's classrooms and making standards-based planning and instruction the guiding principles throughout the book.

Languages and Learners Spotlight on Young Children

In recent years the field has seen an increasing realisation that the full complexity of language acquisition demands theories that (a) explain how children integrate information from multiple sources in the environment, (b) build linguistic representations at a number of different levels, and (c) learn how to combine these representations in order to communicate effectively. These new findings have stimulated new theoretical perspectives that are more centered on explaining learning as a complex dynamic interaction between the child and her environment. This book is the first attempt to bring some of these new perspectives together in one place. It is a collection of essays written by a group of researchers who all take an approach centered on child-environment interaction, and all of whom have been influenced by the work of Elena Lieven, to whom this collection is dedicated.

The Power of Our Words CreateSpace

This book will develop readers' understanding of children are being taught a foreign language.

Children's Language Moody Publishers

Shows parents how to help their child communicate and learn language during everyday activities.

The 5 Love Languages of Children Allyn & Bacon

German language can be taught to kids, and they'll absolutely love it! The acquisition of a second language will help boost your child's preparedness for internationalization. This means that your child becomes skilled to tackle the world. Other benefits to learning a second language include improved cognitive processes. Help your child to learn the German language today.

Current Perspectives on Child Language Acquisition Allyn & Bacon

The Companion Exercise Forms for Teach Me Language makes the Teach Me Language manual more convenient to use because it provides all the manual's exercise forms in a larger, blank format. To help explain how the exercises in Teach Me Language are done, the book includes facsimiles of drill sheets, filled out with examples of how and who the exercises are done. The Companion Exercise Forms for Teach Me Language is a collection of the exercise sheets found in the Teach Me Language manual without the examples written on the forms. The exercise forms in this supplement are blank and enlarged for ease of use.

The Acquisition of Creole Languages Addison-Wesley

Language in Children provides a concise and basic introduction for students studying child language acquisition for the first time. Starting from the first sounds a child produces, this book covers all the stages a child goes through in acquiring a language. This title: Illustrates developmental stages from the recognition of sounds and words to the ability to hold a conversation, also covering bilingual upbringing and language disorders; Features real-life examples of all the phenomena discussed, from languages such as French, Spanish and Portuguese as well as English; Incorporates guidance on sources for further reading and exploration by chapter; Is supported by a companion website that includes exercises with links to real-world data in the CHILDES archive. Written by an experienced author and teacher, Language in Children is essential reading for students studying this topic.

Choice Words Routledge

Provides helpful ideas about classroom activities, assessment and planning.

Early Years Second Language Education SAGE

Reading & Writing with English Learners offers kindergarten through fifth grade reading and writing educators a user-friendly guide and framework for supporting English learners in balanced literacy classrooms. Authors Valentina Gonzalez and Melinda Miller lead readers in exploring the components of Reading & Writing with English Learners with a special eye for increasing the effectiveness of instructional methods and quality of instruction to serve English learners. This book shares practical and effective techniques for accommodating reading and writing instruction to design learning that simultaneously increases literacy and language development. Reading & Writing with English Learners was written for: • K-5 Classroom Teachers • ESL Teachers • Reading and Writing Instructional Coaches • District Leaders Reading & Writing with English Learners includes: • the components of Reading & Writing Workshop • accommodations that support English Learners • high yield practices for Reading & Writing Workshop during remote teaching • the role of phonics • a culturally inclusive booklist • activities that support Reading & Writing Workshop And more!

Language in Children Cambridge University Press

How to Make Your Own Secret Language offers detailed instructions for a number of 'Pig Latins.' When children get this book they become enthralled, and spend hours and hours reading it, trying it out, twisting their tongue into knots and laughing hysterically, and something crazy happens: they start to play with language. Wouldn't you like your child to learn languages, to become proficient at language, as they do with the latest video game? This book, 'How to Make Your Own Secret Language, ' is

the key to a child who plays with words, and the masters language skills. Heck, English becomes a toy, and even foreign languages become MUCH easier to learn! Includes detailed instructions for the following languages. Pig Latin Double Dutch Gibberish Ak Backslang Doble Dop Ubbi Dubbi Arpy Darpy Oben Globish Gobbledygook BTW, maybe it's time for a few of you adults out there to start having some fun, too. Eh? If you don't your kids will end up being smarter than you! About the Author: Al Case has been writing since 1967. He wrote for the martial arts magazines beginning in 1981, and had his own column in Inside Karate. He is a published poet, has written books on algebra and poetry, and has over 40 books on Amazon/Kindle.

Family Language Learning Cambridge University Press
Adults tend to take language for granted - until they have to learn a new one. Then they realize how difficult it is to get the pronunciation right, to acquire the meaning of thousands of new words, and to learn how those words are put together to form sentences. Children, however, have mastered language before they can tie their shoes. In this engaging and accessible book, William O'Grady explains how this happens, discussing how children learn to produce and distinguish among sounds, their acquisition of words and meanings, and their mastery of the rules for building sentences. How Children Learn Language provides readers with a highly readable overview not only of the language acquisition process itself, but also of the ingenious experiments and techniques that researchers use to investigate his mysterious phenomenon. It will be of great interest to anyone - parent or student - wishing to find out how children acquire language.
