 111 Module 9 Lecture Notes 9.1Summary of the Properties of
 Rational Functions A rational function is of the form $R(x) = \frac{p(x)}{q(x)}$
 where p and q are polynomial functions. The zeros of a
 rational function are the values of x for which $p(x) = 0$, as the
 function's value is zero where the value of the numerator is
 zero.Module 9 Lecture Notes - PCCView Test Prep - MGMT650-
