*Statistics for Finance* Penguin  
 Discusses the ill-fated Vine and Olive Colony within the context of America's westward expansion and the French Revolution  
*Bonapartists in the Borderlands* recounts how Napoleonic exiles and French refugees from Europe and the Caribbean joined forces with Latin American insurgents, Gulf pirates, and international adventurers to seek their fortune in the Gulf borderlands. The U.S. Congress welcomed the French to America and granted them a large tract of rich Black Belt land near Demopolis, Alabama, on the condition that they would establish a Mediterranean-style Vine and Olive colony. This book debunks the standard account of the colony, which stresses the failure of the aristocratic, luxury-loving French to tame the wilderness. Instead, it shows that the Napoleonic officers involved in the colony sold their land shares to speculators to finance an even more perilous adventure--invading the contested Texas borderlands between Spain and the U.S. Their departure left the Vine and Olive colony in the hands of French refugees from the

Haitian slave revolt. While they soon abandoned vine cultivation, they successfully recast themselves as prosperous, slaveholding cotton growers and gradually fused into a new elite with newly arrived Anglo-American planters. Rafe Blaufarb examines the underlying motivations and aims that inspired this endeavor and details the nitty-gritty politics, economics, and backroom bargaining that resulted in the settlement. He employs a wide variety of local, national, and international resources: from documents held by the Alabama State Archives, Marengo County court records, and French-language newspapers published in America to material from the War Ministry Archives at Vincennes, the Diplomatic Archives at the Quai d'Orsay, and the French National Archives.

**Enhancing Learning Through Technology** Routledge  
 This is a brand new multi-media resource to support new and experienced primary school teachers develop skills of critical reflection in order to improve teaching and learning. An integrated DVD and textbook present a range of innovative case studies comprising video clips of real teachers in the classroom, together with context and narrative, step-by-step guidance through key issues, and commentary and debate from experts and professionals in the field.

University of Alabama Press

This volume provides an up-to-date study of theory and practice on the importance of technology in teaching and learning. The contributions are carefully peer-reviewed from over 100 submissions to the International Conference on Teaching and Learning 2006, held in Hong Kong. Sample Chapter(s). Chapter 1: Faculty Perceptions of ICT Benefits (391 KB). Contents: Faculty Perceptions of ICT Benefits (R Fox et al.); Thinking about Thinking Online (K Downing et al.); Teacher's Sharing Pedagogical Experiences in a Learning Environment that Supports Self-Regulated Learning (G Dettori et al.); Online Interaction: Trying to Get It Right (L Chow and R Sharman); Crossing Borders: How Cross-Cultural Videoconferencing can Satisfy Course Goals in Dissimilar Subjects (J S Wilkinson & A-L Wang); The Evaluation of Information and Communication Technology Use in Professional Schools (P Gabor & C Ing); Using Technology in Education: The Application of Data Mining (K H Chye et al.); A Comparison of WebCT, Blackboard and Moodle for the Teaching and Learning of Continuing Education Courses (K S Cheung); The Object-Oriented Database Application and the System Architecture of a National Learning Objects Repository for Cyprus (P Pouyioutas et al.); and other papers. Readership: Graduate students, researchers and practitioners involved in the development and education of e-learning.

**Pat the Zoo (Pat the Bunny)** Bell Press

A poignant novel about a biracial girl living in the suburbs of Las Vegas examines the friendships that grow out of, and despite, her race.

*Speaking Mathematically* John Wiley & Sons

Statistics for Finance develops students' professional skills in statistics with applications in finance. Developed from the authors' courses at the Technical University of Denmark and Lund University, the text bridges the gap between classical, rigorous treatments of financial mathematics that rarely connect concepts to data and books on econometrics and time series analysis that do not cover specific problems related to option valuation. The book discusses applications of financial derivatives pertaining to risk assessment and elimination. The authors cover various statistical and mathematical techniques, including linear and nonlinear time series analysis, stochastic calculus models, stochastic differential equations, Itô's formula, the Black-Scholes model, the generalized method-of-moments, and the Kalman filter. They explain how these tools are used to price financial derivatives, identify interest rate models, value bonds, estimate parameters, and much more. This textbook will help students understand and manage empirical research in financial engineering. It includes examples of how the statistical tools can be used to improve value-at-risk calculations and other issues. In addition, end-of-chapter exercises develop students' financial reasoning skills.

Literacy Lessons: Updated Edition Simon and Schuster

Working with the Anthropological Theory of the Didactic in Mathematics Education Routledge

Bratva Vow Taylor & Francis

A heartwarming novel from America's most popular living artist journeys to the picturesque village of Cape Light on the coast of New England, a hamlet populated by colorful inhabitants who share a strong sense of community and caring for their neighbors. Reprint.

Discover everything you've ever wanted to know about marijuana

all in one place with this authoritative A-to-Z guide to cannabis! What's a wake and bake? Who is Mitch Hedberg? What does Louisa May Alcott have to do with cannabis? And what exactly is the difference between a bong and a bubbler? Now you can "weed" all about it and find all the answers and more with this entertaining and updated edition of *Weedopedia*, your guide to everything marijuana—from the best movies to watch while high to cannabis slang and terminology. Whether you're interested in learning more about all things marijuana, or if you want something entertaining to read while enjoying a tokes, this book is the one-stop-shop for all your weed-related needs.

Ivy Springer Science & Business Media

Monsters aren't born, they are created. Katya. After spending years in hospitals, I can finally have a life. Then my mom abandons me to the care of the most breathtaking man I've ever seen. He's like the embodiment of Death, a Greek tragedy waiting to unfold. Can I break through the darkness that has a hold on him? Kristoff. My soul is black as tar. I'm a cold-hearted killer, the leader of my own Bratva. What mother in her right mind would leave a teenage daughter on my doorstep? A desperate one who's willing to make a deal with the devil. Note: This is the free prequel novella to the Bratva Royalty duet. Trigger warning: this book contains some traumas and scenes of violence. For fans of Natasha Knight, Julia Sykes, CD Reiss, Aleatha Romig, Skye Warren, Anna Zaires, Renee Rose, Carrie Ann Ryan, Penelope Ward, Lauren Blakely, Hannah Hill, Meghan March, Katee Robert. Topics: adult romance, alpha male, romantic suspense, romance series, bad boy romance, emotional read, contemporary romance, free romance books, mafia romance, novels for free romance, series books free, revenge romance, age gap romance, steamy romance books free.

Better Than Best Practice Routledge

This book constitutes the refereed proceedings of the 16th International Symposium on Algorithms and Data Structures, WADS, 2019, held in Edmonton, AB, Canada, in August 2019. The 42 full papers presented together with 3 invited lectures, we carefully reviewed and selected from a total of 88 submissions. They present original research on the theory and application of algorithms and data structures in many areas, including combinatorics, computational geometry, databases, graphics, and parallel and distributed computing.

**Room 555** OECD Publishing

Mood mapping simply involves plotting how you feel against your energy levels, to determine your current mood. Dr Liz Miller then gives you the tools you need to lift your low mood, so improving your mental health and wellbeing. Dr Miller developed this technique as a result of her own diagnosis of bipolar disorder (manic depression), and of overcoming it, leading her to seek ways to improve the mental health of others. This innovative book illustrates: \* The Five Keys to Moods: learn to identify the physical or emotional factors that affect your moods \* The Miller Mood Map: learn to visually map your mood to increase self-awareness \* Practical ways to implement change to alleviate low mood Mood mapping is an essential life skill; by giving an innovative perspective to your life, it enables you to be happier, calmer and to bring positivity to your own life and to those around you. 'A gloriously accessible read from a truly unique voice' Mary O'Hara, Guardian 'It's great to have such accessible and positive advice about our moods, which, after all, govern everything we do. I love the idea of MoodMapping' Dr Phil Hammond 'Can help you find calm and take the edge off your anxieties' Evening Standard 'MoodMapping is a fantastic tool for managing your mental health and taking control of your life' Jonathan Naess, Founder of Stand to Reason

*Weedopedia* Routledge

This stimulating study focuses on mathematics as a language with its own rules and conventions and explores the implications of this for classroom practice.

**Illustreret norsk konversations leksikon: Hellige Kjortel-Lassalle** Tabella House

Briefly discusses the traditional mathematics formerly taught in American schools and views the language and weaknesses of the modern math curriculum

Selected Regular Lectures from the 12th International Congress on Mathematical Education Golden Books

This book provides a basis for designing frameworks and for identifying indicators, existing data sources and areas needing further research related to the use of technology in education.

*The National Union Catalog, Pre-1956 Imprints* Simon and Schuster

A how-to-draw book, with over 100 animals and objects!

Almendannelse som ledestjerne Random House Incorporated

Developing Research in Mathematics Education is the first book in the series New Perspectives on Research in Mathematics Education, to be produced in association with the prestigious European Society for Research in Mathematics Education. This inaugural volume sets out broad advances in research in mathematics education which have accumulated over the last 20 years through the sustained exchange of ideas and collaboration between researchers in the field. An impressive range of contributors provide specifically European and complementary global perspectives on major areas of research in the field on topics that include: the content domains of arithmetic, geometry, algebra, statistics, and probability; the mathematical processes of proving and modeling; teaching and learning at specific age levels from early years to university; teacher education, teaching and classroom practices; special aspects of teaching and learning mathematics such as creativity, affect, diversity, technology and history; theoretical perspectives and comparative approaches in mathematics education research. This book is a fascinating compendium of state-of-the-art knowledge for all mathematics education researchers, graduate students, teacher educators and curriculum developers worldwide.

**Meddelelser angaaende de højere almenkoler i Danmark** Pan Macmillan

Who Is Hillary Clinton? Readers of our New York Times best-selling series can find out now! At age fourteen, Hillary Clinton thought it would be thrilling to become an astronaut, so she sent an application to NASA. The reply was a flat out rejection: the

space program didn't take women. It was a critical moment for the young girl, one that made her realize the world she lived in needed changing and that she had better try to make those changes happen. Clinton's life has been a thrilling series of firsts—First Lady of the US, then first First Lady to become a US Senator, Secretary of State, and the first woman to run as the Democratic candidate for President. This easy-to-read biography gives readers a firm grounding not only in Clinton's life history but the history of the times in which she's lived. It comes out as she makes her historic run for the White House.

Research as a Tool for Empowerment: Theory Informing Practice is an edited volume that includes an array of research-based chapters that not only further the field of second/foreign language research, but also provide practical implications to language classrooms in international and national settings. Chapters in this volume present a bridge between methodologically sound second/foreign language research and strong pedagogical implications. This volume includes the voices of researchers, graduate students, teachers, parents, and learners exploring the second/foreign language phenomena. The multiple voices of the contributing authors reflect the diverse readership of the Research in Second Language Learning series. Unlike previous anthologies in second/foreign language research, this volume presents studies from various research paradigms. Chapters include examples of various research methods from both quantitative and qualitative paradigms. Few previous anthologies have presented research based in multiple paradigms and from multiple perspectives. Research as a Tool for Empowerment: Theory Informing Practice not only presents these various perspectives, but it also makes the link from research to classroom implications and applications. The volume is unique as it makes a connection between different types of research and research methods and empowerment and issues of empowerment.

**Developing Research in Mathematics Education** Working with the Anthropological Theory of the Didactic in Mathematics Education

A fun and exciting touch-and-feel book featuring one of the best-selling children's book characters of all time - Pat the Bunny! Pat the Bunny has been creating special first-time moments between parents and their children for over 75 years. This engaging touch-and-feel book takes babies on a playful trip to the zoo where they can pet animals like lions, pandas, turtles, and more, all the while making cherished memories that will last a lifetime.
