A Field Guide to Lies MIT Press

This title was first published in 2002: This field guide assesses two views of human error - the old view, in which human error becomes the cause of an incident or accident, or the new view, in which human error is merely a symptom of deeper trouble within the system. The two parts of this guide concentrate on each view, leading towards an appreciation of the new view, in which human error is the starting point of an investigation, rather than its conclusion. The second part of this guide focuses on the circumstances which unfold around people, which causes their assessments and actions to change accordingly. It shows how to "reverse engineer" human error, which, like any other component, needs to be put back together in a mishap investigation.

America's most populous region is also home to some of the nation's most serenely beautiful country. Tracing a gentle, thousand-mile curve from New York City southwestward to Montgomery, Alabama, the Piedmont connects an arc of urban centers which includes five state capitals, America's largest city, and the national capital. Between the Atlantic coastal plain and the Blue Ridge Mountains, the Piedmont's rolling hills span miles of farmland and forest. Michael Godfrey's *Field Guide to the Piedmont*--originally published by Sierra Club Books and here newly revised and updated--is an informative and entertaining guide to the entire region's habitats, ecosystems, and rich botanical communities. Focusing on plant succession, geology, soils, climate, and the plants and animals with which we share the land, *Field Guide to the Piedmont* also features 180 illustrations for easy identification of the Piedmont's principal flora and fauna. A chapter describing and providing directions to over fifty sites of special interest will inspire Piedmont residents to take this field guide in hand and explore their natural surroundings. A Field Guide to Men's Health W. W. Norton & Company

The very first work of fiction by the best-selling, acclaimed author of *City on Fire*--his piercingly beautiful treasure box of a novella about two families in the suburbs, now in a newly designed full-color edition For years, the Hungates and the Harrisons have coexisted peacefully in the same Long Island neighborhood,

enjoying the pleasures and weathering the pitfalls of their suburban habitat. But when the patriarch of one family dies unexpectedly, the survivors face a stark imperative: adapt or face extinction. In sixty-three interlinked vignettes and striking accompanying photographs, the novella cuts multiple paths--which can be reconstructed in any order--through the lives of its richly imagined characters. Part art object, part Choose Your Own Adventure, *A Field Guide to the North American Family* is an innovative and deeply personal look at the ties that bind, as well as a poignant meditation on connection in a fragmented world.

A new approach to identifying mushrooms based on five key features that can be observed while in the field. Toadstools, truffles, boletes and morels, witches' butter, conks, corals, puffballs and earthstars: mushrooms are both mysterious and ecologically essential. They can also be either delicious or deadly. Thousands of different species of mushrooms appear across North America in the woods, backyards, and in unexpected corners. Learning to distinguish them is a rewarding challenge for a naturalist or chef. Covering most of the common edible and poisonous species readers are likely to encounter, this portable-sized field guide takes a new, simple approach to the method of mushroom identification based on key features that do not require a microscope or technical vocabulary. In addition to the watercolors from the original edition, hundreds more illustrations have been added. These paintings make use of the limited space available in a field guide and focus on the distinguishing details of each species, thereby serving as an ideal tool for beginner and intermediate mycologists alike.

Washington Post columnist Alexandra Petri turns her satirical eye on her own life in this hilarious new memoir... Most twentysomethings spend a lot of time avoiding awkwardness. Not Alexandra Petri. Afraid of rejection? Alexandra Petri has auditioned for America's Next Top Model. Afraid of looking like an idiot? Alexandra Petri lost Jeopardy! by answering "Who is that dude?" on national TV. Afraid of bad jokes? Alexandra Petri won

an international pun championship. Petri has been a debutante, reenacted the Civil War, and fended off suitors at a Star Wars convention while wearing a Jabba the Hutt suit. One time, she let some cult members she met on the street baptize her, just to be polite. She's a connoisseur of the kind of awkwardness that most people spend whole lifetimes trying to avoid. If John Hodgman and Amy Sedaris had a baby...they would never let Petri babysit it. But Petri is here to tell you: Everything you fear is not so bad. Trust her. She's tried it. And in the course of her misadventures, she's learned that there are worse things out there than awkwardness--and that interesting things start to happen when you stop caring what people think.

'Ridiculously enjoyable' Tom Holland A Book of the Year for The Times, Mail on Sunday and BBC History Magazine The 'Mermaid of Morwenstow' excommunicated a cat for mousing on a Sunday. When he was late for a service, Bishop Lancelot Fleming commandeered a Navy helicopter. 'Mad Jack' swapped his surplice for leopard skin and insisted on being carried around in a coffin. And then there was the man who, like Noah's evil twin, tried to eat one of each of God's creatures... In spite of all this they saw the church as their true calling. These portraits reveal the Anglican church in all its colourful madness.
