This introductory, comprehensive text of audio practices is for both production and post-production sound. It emphasizes the importance of recording the sound properly on the set and also explains the post-production audio process as a creative collaboration that enhances the story and is not merely a "fix" for various audio problems. This book guides readers through a series of exercises to better understand the relationships between the gear and practices required for optimal recordings and mixes. Rather than merely explain the concepts of sound wave propagation, the electronics of how sound is recorded, or the acoustics of sound reverberation in spaces, these exercises are designed to demonstrate and reinforce these crucial ideas. This systematic approach from simple recording through sound editing and mixing gives aspiring sound technicians valuable hands/ears-on experience so they can achieve the same professional quality as those working in the industry!

Capturing Maui's golden era of windsurfing, from the early pioneering days of Kailua to the big waves at Hookipa and Jaws, this book tells the story of the Kings and legends of the sport as it evolved from longboards to high-performances in big surf. Fictional dialogue accompanies remarkable true events of survival, from near-drownings to helicopter crashes. Told by Sports Illustrated Picture of the Year (POY) award-winning photographer and filmmaker Jonathan Weston. He was the first filmmaker to take the audience along for the ride with his innovative point-of-view (POV) helmet-mounted 16mm movie camera. The thrills, dangers and behind the scenes experiences are all shared in this epic tale of perseverance and survival. Remarkable images and Wind Legends movie, also produced by Jonathan Weston, are posted in accompanying website.
