-----	313	15.1. Body Language-----	-----	background biology students acquire in their courses. The result	-----
-----	314	15.2. Concentration-----	-----	is an undergraduate education in biology with very little	-----
-----	316	15.3.	-----	quantitative content. New mathematics courses must be devised	-----
Shyness -----	-----	-----	-----	with the needs of biology students in mind. In this volume,	-----
-----	-----	-----	-----	authors from a variety of institutions address some of the	-----
-----	-----	-----	-----	problems involved in reforming mathematics curricula for biology	-----
-----	-----	-----	-----	students. The problems are sorted into three themes: Models,	-----

Processes, and Directions. It is difficult for mathematicians to generate curriculum ideas for the training of biologists so a number of the curriculum models that have been introduced at various institutions comprise the Models section. Processes deals with taking that great course and making sure it is institutionalized in both the biology department (as a requirement) and in the mathematics department (as a course that will live on even if the creator of the course is no longer on the faculty). Directions looks to the future, with each paper laying out a case for pedagogical developments that the authors would like to see.
