"Built on interviews and detailed surveys of almost a thousand recent college graduates from a diverse range of colleges and universities, *Aspiring Adults Adrift* reveals a generation facing a difficult transition to adulthood. Analyzing these findings in light of students' performance on standardized tests of general collegiate skills, the selectivity of institutions they attended, and their choice of major, Arum and Roksa not only map out the current state of a generation too often adrift, but enable us to examine the relationship between college experiences and tentative transitions to adulthood"--Back cover.
