Taming the Tiger
Within Cambridge
University Press
Language—that is, oral
or written content that

references abstract
concepts in subtle
ways—is what sets us
apart as a species, and
in an age defined by
such content, language
has become both the
fuel and the currency
of our modern
information society.
This has posed a

vexing new challenge for linguists and engineers working in the field of language-processing: how do we parse and process not just language itself, but language in vast, overwhelming quantities? Modern Computational Models of Semantic Discovery in Natural Language compiles and reviews the most prominent linguistic theories into a single source that serves as an essential reference for future solutions to one of the most important challenges of our age. This comprehensive publication benefits an audience of students and professionals, researchers, and practitioners of linguistics and language discovery. This book includes a comprehensive range

of topics and chapters covering digital media, social interaction in online environments, text and data mining, language processing and translation, and contextual documentation, among others.

Taming Uncertainty

BenBella Books, Inc.

Thrive is the roadmap of how to grow your business and drive sales in highly shifting, constantly changing economic times. It is the story of those leaders and organizations that have seen consistent growth through several economic crises- companies that were founded in the late 1700's to early 1900's and they are still in business thriving today. In this book we share their stories, their struggles, and tell

you exactly how they have not only overcome adversity, but thrived through it. Praise for the Book: “We live in a time when uncertainty is the order of the day. THRIVE is a must-read for all who strive to grow intellectually and to succeed through the opportunities an uncertain world offers.” —Ken Langone, Founder, Home Depot, American Billionaire and Philanthropist “Talk about the right book for the right time! What I liked most about THRIVE are the case studies of real companies and real people who weathered the storms and emerged more successful than before. THRIVE is both practical and inspirational. I’ve ordered copies for my

entire team.” —Bill Cates, CSP, CPAE, Founder, The Cates Academy for Relationship Marketing, Author of Radical Relevance “In THRIVE, Meridith weaves in 250 years of business history to show how resilient businesses and people find opportunities in every situation. This is a must-read to gain ideas and perspective in a sea of change.” —Mary C. Kelly, PhD, CEO, Productive Leaders, Author of The Five Minute Leadership Guide “You do not merely read this book; you read, you think, you develop next steps. Meridith does a masterful job of detailing companies doing it right and then goes further by adding her insights to create a playbook of what you

need to do. Perfect book for the time we're in right now!" —Mark Hunter, CSP, "The Sales Hunter", Author of *A Mind For Sales* "The only certainty in business is there will be times of great uncertainty. It's how you react when your world—or the world—doesn't go as planned that determines your future. Meredith studies how companies have thrived in their uncertain times to become global market leaders and shares the proven success strategies that you can implement in your business to do the same. If there was ever a time where our world needed this book, it's now. Read it. Study it. And thrive!" —Sam Richter, CSP, CPAE, Hall of Fame Speaker,

Bestselling Author, and Technology Entrepreneur
Modern Computational Models of Semantic Discovery in Natural Language Sound Wisdom
There is a gremlin within you. He is the narrator in your head. He tells you who you are, and he defines and interprets your every experience. He wants you to feel bad, and he pursues this loathsome task by means of sophisticated maneuvers: just when you feel you've out-argued or overcome him, he changes his disguise and his strategy. He's the sticky sort -- grapple with him and you become more enmeshed. What he hates is simply being noticed. That's the first step to his taming. If

you have a low tolerance for self-help books or they haven't worked for you, here is a more creative yet practical approach to solving life's problems. Through the powerful metaphor of the gremlin, presented so imaginatively by Richard Carson's writing and Novle Rogers's artwork, you will find ways to identify and banish the tenacious, self-defeating aspects of your personality.

Taming Babel Simon and Schuster
The theory of evolution has clearly altered our views of the biological world, but in the study of human beings, evolutionary and preevolutionary views continue to coexist in a state of perpetual tension. The Taming of Evolution addresses

the questions of how and why this is so. Davydd Greenwood offers a sustained critique of the nature/nurture debate, revealing the complexity of the relationship between science and ideology. He maintains that popular contemporary theories, most notably E. O. Wilson's human sociobiology and Marvin Harris's cultural materialism, represent pre-Darwinian notions overlaid by elaborate evolutionary terminology. Greenwood first details the humoral-environmental and Great Chain of Being theories that dominated Western thinking before Darwin. He systematically compares these ideas with those later influenced by Darwin's

theories, illuminating the surprising continuities between them. Greenwood suggests that it would be neither difficult nor socially dangerous to develop a genuinely evolutionary understanding of human beings, so long as we realized that we could not derive political and moral standards from the study of biological processes.

This professional resource equips K-12 students with the skills they need to be critical readers in the 21st century. Today's reader is reading across multiple genres, on phones and tablets, with text in hand, and

also online, and this helpful book provides educators with techniques on how to teach students to read on every platform and in every genre, to struggle with text, and to break through to new ideas when reading text. It focuses on the habits that students must form in order to gain the confidence to access all texts across all platforms. Each chapter is devoted to developing the five habits for successful reading: reading closely, widely, critically, deeply, and purposefully. Grounded in the latest research, the easy-to-implement strategies and instructional methods will help students cultivate strong reading skills in the 21st century

classroom.

Taming Intuition

Spiritual Evolution

In many areas women have earned the equality we've been fighting for. We've broken through glass ceilings and achieved great success. We've shown that we can prosper by our own means. And we've become influential, respected leaders. Yet many of us find ourselves unhappy, anxious, overwhelmed. Where's the pot of gold at the end of our "I can do it just like a man" rainbow? The problem is that while we can be as successful as a man, we don't get there through a masculine approach. Being a "damsel in distress" is not the way to make your dreams come true, but neither is

being the hyper-aggressive Alpha Bitch. In this New York Times bestselling book, transformation leaders Christy Whitman and Rebecca Grado reveal how when women try to claim power through a forceful "take no prisoners" approach it ultimately works against us and undermines our best efforts to create the life of our dreams. In fact, wielding Alpha Bitch force is ironically disempowering, because it introduces conflict, struggle, and competition into our personal and professional relationships, blocking women from creating the life we desire. How do you change from being a controlling, competitive, and disruptive Alpha Bitch to being an

Empowered Female who is allowing, collaborative, and balanced? Enter the Laws of the Universe: • The Law of Attraction • The Law of Allowing • The Law of Pure Potentiality • The Law of Oneness • The Law of Balance and Harmony • The Law of Sufficiency and Abundance Taming the Alpha Bitch will show you how to use these laws to create freedom, joy, and abundance in your life. By using this knowledge, you put yourself in the ideal position for attracting those things you want with ease and effortlessness, not struggle and pain. *Taming Childhood?* Cambridge University Press This book combines detailed scientific

historical research with characteristic philosophic breadth and verve. Taming Your Gremlin Penguin Meet Robin Page: outcast sorceress, mythic history buff, unapologetic bookworm, and the last person you'd expect to command the rarest demon in the long history of summoning. Though she holds his leash, this demon can't be controlled ... but can he be tamed? Rapid Development Harper Collins How solar could spark a clean-energy transition through transformative innovation—creative financing, revolutionary technologies, and flexible energy systems. Solar energy, once a niche

application for a limited market, has become the cheapest and fastest-growing power source on earth. What's more, its potential is nearly limitless—every hour the sun beams down more energy than the world uses in a year. But in *Taming the Sun*, energy expert Varun Sivaram warns that the world is not yet equipped to harness erratic sunshine to meet most of its energy needs. And if solar's current surge peters out, prospects for replacing fossil fuels and averting catastrophic climate change will dim. Innovation can brighten those prospects, Sivaram explains, drawing on firsthand experience and original research spanning science,

business, and government. Financial innovation is already enticing deep-pocketed investors to fund solar projects around the world, from the sunniest deserts to the poorest villages. Technological innovation could replace today's solar panels with coatings as cheap as paint and employ artificial photosynthesis to store intermittent sunshine as convenient fuels. And systemic innovation could add flexibility to the world's power grids and other energy systems so they can dependably channel the sun's unreliable energy. Unleashing all this innovation will require visionary public policy: funding researchers developing next-generation solar

technologies, refashioning energy systems and economic markets, and putting together a diverse clean energy portfolio. Although solar can't power the planet by itself, it can be the centerpiece of a global clean energy revolution. A Council on Foreign Relations Book

Taming Demons for Beginners Random House

This book explores the links between recent reports of increasing levels of unhappiness and mental health problems amongst children and young people, and changes within childhood which restrict and reduce opportunities for children to develop and maintain resilience. Although in academic terms children may be

viewed as beings, Creasy and Corby posit that there is much to suggest that for parents, practitioners and policy-makers, children are primarily seen as becomings. The book argues that viewing children as becomings, together with the idea that childhood is fraught with danger, contributes to practices and policies which can be seen as making childhood tame. This taming of childhood leads to an impoverished childhood that does not provide the space that children need to grow and develop. Furthermore, Taming Childhood? challenges the idea that young adults are 'snowflakes', unable to cope with everyday pressures. Students and scholars

across a range of social science disciplines will find this book of interest.

Taming the Spirited

Child Random House

Cass McKay has been called stubborn, temperamental, difficult, and that word that rhymes with “witch” more times than she cares to count. But that’s all about to pay off. She has finally landed the role she was born to play—Kate, in *The Taming of the Shrew*—in the summer apprentice program of a renowned Shakespeare theater company in the forests of Vermont. But Cass can barely lace up her corset before her troubles begin. Her leading man, Drew, is a complete troll, and he’s going to ruin Cass’s summer. Even worse,

Cass’s bunkmate Amy has somehow fallen head over heels for Drew. Cass can’t let Amy throw herself at a total jerk, so she comes up with a genius plan to give Drew the personality makeover he so desperately needs: they’ll tame Drew just as Petruchio tames Kate! But as Shakespeare’s classic plays out offstage, Cass finds it harder and harder to resist falling for Drew herself. The best kind of entertainment, *The Taming of the Drew* is smart, funny, fresh, and original. You’re going to love this badass heroine and her friends. You might even end up liking Drew, too.

An examination of the
cognitive tools that the
mind uses to grapple
with uncertainty in the
real world. How do
humans navigate
uncertainty,
continuously making
near-effortless
decisions and
predictions even under
conditions of imperfect
knowledge, high
complexity, and
extreme time
pressure? Taming
Uncertainty argues
that the human mind
has developed tools to

grapple with uncertainty. Unlike much previous scholarship in psychology and economics, this approach is rooted in what is known about what real minds can do. Rather than reducing the human response to uncertainty to an act of juggling probabilities, the authors propose that the human cognitive system has specific tools for dealing with different forms of uncertainty. They identify three types of tools: simple heuristics, tools for information search, and tools for harnessing the wisdom of others. This set of strategies for making predictions, inferences, and decisions constitute the mind's adaptive toolbox. The

authors show how these three dimensions of human decision making are integrated and they argue that the toolbox, its cognitive foundation, and the environment are in constant flux and subject to developmental change. They demonstrate that each cognitive tool can be analyzed through the concept of ecological rationality—that is, the fit between specific tools and specific environments. Chapters deal with such specific instances of decision making as food choice architecture, intertemporal choice, financial uncertainty, pedestrian navigation, and adolescent behavior.

Taming the Megalopolis: A Design for Urban Growth is a stimulating and provocative text that identifies the imminent problems of human settlement in large emerging cities in developing countries with mixed economies and their possible solution. The book is a written expression of an expert's view on the problem of human settlement that aims to raise discussions, from concerned policymakers, on the identification of the problems and inciting proposals for solutions to the growing problem of human settlement in large emerging cities. The text is divided in two parts: Urban Problems and Solutions. The first part provides the basic definition and aspects

of urbanization and the identification of problems of human settlement in urbanized areas. Part II introduces possible measures to solve the problems of urbanization, such as changing the design of metropolitan areas; maintaining ownership in public corporations; capturing rise in land values; and securing relatively full employment for urban workers. Economists, sociologists, urban planners and policymakers, engineers and designers, and people affected by the problems of urbanization will find this book invaluable. *The Snurtch* Cambridge University Press "Each of us carries an inner tyrant, a demanding, obsessive,

demeaning complex which accumulates all the negatives our history has brought us.... [P]resents a step-by-step means by which the reader can grow larger than the tyrant's agenda, providing rich biographical examples, methodologies for liberation, and provocative exercises"-P. [4] of cover.

Taming The Big Data Tidal Wave HarpPeren
 Taming Teens is a practical guide that offers advice to navigate key challenges and issues that arise with teenagers, and to improve the communication between parents and their teens. The book will appeal to parents who want to maintain a healthy, connected relationship with their

teenagers, and find joy in guiding their journey into well-adjusted young adults. Dr Anna Cohen, Doc.Clin.Psych, M.Clin.Psych, B.Psych(Hons), is one of Sydney's leading Clinical Psychologists and leading authority on adolescent behaviour. She has drawn on her wealth of experience to develop her approach to parenting, which serves to empower parents and encourage them to direct and guide their teens, rather than control them.

A Scot on fire
 Wrongfully imprisoned and tortured by an unseen enemy,
 Broderick MacPherson lives for one

purpose—punishing the villain who targeted him. But when a wayward English lass interrupts his revenge, he loses his enemy in the dark. Now, her compelled testimony could send Broderick back to the prison that nearly killed him. Unless they find a loophole—an inconvenient, shockingly tempting loophole. A beauty under pressure For Kate Huxley, visiting her brother in the Scottish Highlands is a blissful escape from the stifling expectations of the marriage mart. Blissful, that is, until a scarred, beastly Highlander with a heartbreaking past frightens her out of her wits, making her a witness in a criminal inquiry. A match to light the darkness Kate

has no wish to testify against a man who's already suffered too much. But the only remedy is to become his wife. And she can't possibly marry such a surly, damaged man ... can she? Well, perhaps. If it means she can stay in her beloved Scotland. And if he promises they'll never fall in love.

30 Days to Taming Your Anger Llewellyn Worldwide

Through a study of Malaysia, *Taming Babel* examines how empires and postcolonial nation-states struggle to govern multilingual and polyglot subjects.
