Toward a Concrete Philosophy explores the reactions of Theodor Adorno, Max Horkheimer, and Herbert Marcuse to Martin Heidegger prior to their dismissal of

him once he turned to the Nazi party in 1933. Mikko Immanen provides a fascinating glimpse of the three future giants of twentieth-century social criticism when they were still looking for their philosophical voices. By reconstructing their overlooked debates with Heidegger and Heideggerians, Immanen argues that Adorno, Horkheimer, and Marcuse saw Heidegger's 1927 magnum opus, *Being*

and Time, as a serious effort to make philosophy relevant for life again and as the most provocative challenge to their nascent materialist diagnoses of the discontents of European modernity. Our knowledge of Adorno's "Frankfurt discussion" with "Frankfurt Heideggerians" remains anecdotal, even though it led to a proto-version of Dialectic of Enlightenment's idea of the entwining of myth and reason. Similarly, Horkheimer's enthusiasm over Heidegger's legendary post-World War I lectures and criticism of Being and Time have escaped attention almost entirely. And Marcuse's intriguing debate with Heidegger over Hegel and the origin of the problematic of "being and time" has remained uncharted until now. Reading these debates as fruitful intellectual encounters rather than hostile confrontations, *Toward a Concrete Philosophy* offers scholars of critical theory a new, thought-provoking perspective on the emergence of the Frankfurt School as a rejoinder to Heidegger's philosophical revolution.

Joseph Childers contends that novels such

as Benjamin Disraeli's *Coningsby*, Elizabeth Gaskell's *Mary Barton*, and Charles Kingsley's *Alton Locke* were in direct competition with other forms of public discourse for interpretive dominance of their age. Childers examines the interactions between the novel and a set of texts generated by parliamentary and radical politics, the sanitation reform movement, and religion. Reversing the position of earlier studies of this period, he argues that the novel was in fact constitutive of—and often provided the model for—texts as diverse as the political agendas of Robert Peel and T. B. Macaulay or Edwin Chadwick's enormously important Report on the Sanitary Condition of the Labouring Population of Great Britain, with its seemingly encyclopedic description of the conditions of poverty.

Charts the flight of some of this century's most important thinkers from Nazi Germany to the United States. Jay explores the theories of The Frankfurt School -- among them, the work of

Theodor Adorno, Leo Lowenthal and Herbert Marcuse -- as well, such as George Lichtheim, Hannah Arendt, and Henry Pachter.

Totality has been an abiding concern from the first generation of Western Marxists, most notably Lukács, Korsch, Gramsci, and

Bloch, through the second, exemplified by the Frankfurt School, Lefebvre, Goldmann, Sartre, Merleau-Ponty, and Della Volpe, up to the most recent, typified by Althusser, Colletti, and Habermas. Yet no consensus has been reached concerning the term's multiple meanings—expressive, decentered, longitudinal, latitudinal, normative—or its implications for other theoretical and practical matters. By closely following the adventures of this troublesome but central concept, *Marxism & Totality* offers an unconventional account of the history of Western Marxism. *Fiction and the Formation of Early Victorian Culture* Univ of California Press

Tackles a question as old as Plato and still pressing today: What is reason, and what roles does and should it have in human endeavor? The eminent intellectual historian Martin Jay surveys Western ideas of reason, particularly in German philosophy from Kant to Habermas. *Keywords of Our Time* Univ of California Press

This book is a study of overlooked themes in Iran's contemporary political and intellectual history. It investigates the way Iranian Muslim intellectuals have discussed politics and democracy. As a history of Iranian Islamism and its transformation to post-Islamism, this work demonstrates that Muslim intellectuals have enriched the Iranian society epistemologically, aesthetically, ethically, and politically. This book examines the internal conflicts of the Islamist ideology as the intellectual underpinnings of the 1979 Revolution, its contribution to the formation of the post-revolutionary state,

and the post-Islamist response to the democratic deficits of the post-revolutionary state. Seeking to overcome the shortcomings of historiographical approaches, this book demonstrates the intellectual and political agency of Muslim intellectuals from the 1960s to the present.

Assessing the legacy of the Frankfurt School in the twenty-first century Although successive generations of the Frankfurt School have attempted to adapt Critical Theory to new circumstances, the work done by its founding members continues in the 21st century to unsettle conventional wisdom about culture, society and politics. Exploring unexamined episodes in the School's history and reading its work in unexpected ways, these essays provide ample evidence of the abiding relevance of Horkheimer, Adorno, Benjamin, Marcuse, Löwenthal, and Kracauer in our troubled times. Without forcing a unified argument, they range over a wide variety of topics, from the uncertain founding of the School to its mixed reception of psychoanalysis, from

Benjamin's ruminations on stamp collecting to the ironies in the reception of Marcuse's *One-Dimensional Man*, from Löwenthal's role in Weimar's Jewish Renaissance to Horkheimer's involvement in the writing of the first history of the Frankfurt School. Of special note are their responses to visual issues such as the emancipation of color in modern art, the Jewish prohibition on images, the relationship between cinema and the public sphere, and the implications of a celebrated Family of Man photographic exhibition. The collection ends with two essays tracing the still metastasizing demonization of the Frankfurt School by the so-called Alt Right as the source of "cultural Marxism" and "political correctness," which has gained alarming international resonance and led to violence by radical right-wing fanatics.

From Finding to Making SAGE

This book traces a dialectic relationship between "politics" and "antipolitics," the first, as used here, being akin to philosophy as an activity of open inquiry, plural democracy, and truth-finding, and the latter in the realm of ideology, technocracy, and presupposed certainties.

It returns back to the emergence of a New Left movement in the 1960s in order to follow the history of this relationship since then. It addresses contemporary debates by looking to the fall of the Berlin Wall and the Soviet Bloc, and asking in the wake of that: what is a revolution? Finally, it draws on these analyses to examine the age of terrorism after the tragedy of September 11, 2001, and resounds with a call to pursue democracy and real politics in the face of new forms of antipolitics.

"Martin Jay is one of the most influential intellectual historians in contemporary America, and here he shows once again a willingness to tackle the 'big issues' in the Western cultural tradition.... A remarkable history of ideas about the nature of human experience."—Lloyd Kramer, author of *Threshold of a New World* "A magisterial study of one of the most elusive, contested, and pervasively important concepts of the Western philosophical tradition. Ranging from epistemology and aesthetics to the philosophy of history, religion, and politics, *Songs of Experience* brilliantly traces the major lines of theory and debate. Insightful, rich, and

masterfully narrated, Jay's book sings with that well-tempered voice of erudition, synthetic intelligence, and generous grace that has become his enviable trademark."—Richard Shusterman, author of *Pragmatist Aesthetics* "This illuminating, provocative volume consolidates Martin Jay's standing as our leading modern intellectual historian. Ranging sure-footedly from ancient to postmodern discourse, Jay offers finely balanced readings of thinkers who have wrestled with the elusive concept of experience. Because Jay respects—and presents so clearly and sympathetically—positions different from his own, *Songs of Experience* gives readers the resources necessary to embrace or resist his own bold interpretations of philosophers from Kant and Burke through Dilthey and Dewey to Foucault and Rorty. This book will prove as indispensable to intellectual historians as the idea of experience itself."—James T. Kloppenberg, author of *The Virtues of Liberalism*

Thinking About Politics After 9/11

Georg Lukács stands as a towering figure in the areas of critical theory, literary

criticism, aesthetics, ethical theory and the philosophy of Marxism and German Idealism. Yet, despite his influence throughout the twentieth century, his contributions to the humanities and theoretical social sciences are marked by neglect. What has been lost is a crucial thinker in the tradition of critical theory, but also, by extension, a crucial set of ideas that can be used to shed new light on the major problems of contemporary society. This book reconsiders Lukács' intellectual contributions in the light of recent intellectual developments in political theory, aesthetics, ethical theory, and social and cultural theory. An international team of contributors contend that Lukács' ideas and theoretical contributions have much to offer the theoretical paucity of the present. Ultimately the book reintegrates Lukács as a central thinker, not only in the tradition of critical theory, but also as a major theorist and critic of modernity, of capitalism, and of new trends in political theory, cultural criticism and legal theory. *Songs of Experience* Univ of California Press
From Finding to Making offers the first

detailed discussion of the relationship between Marxism and pragmatism. These two philosophies of praxis are not incompatible, and an analysis of their relation helps one to better understand both. Establishing a transatlantic theoretical dialogue, this book discusses similarities and differences between these philosophies. It is an interdisciplinary study that brings together philosophy, American and European intellectual history, and literary studies. Schulenberg's book shows that if we seek to continue the unfinished project of establishing a genuinely postmetaphysical culture, the attempt to elucidate the dialectics of Marxism and pragmatism is a good starting point. The book offers detailed discussions of Sidney Hook, Georg Lukács, Theodor W. Adorno, Fredric Jameson, W.E.B. Du Bois, John Dewey, Richard Rorty, and Jacques Rancière. Adorno University of Wisconsin Press
Taking its title from John Keats, *My Silver Planet* contends that the problem of elite poetry's relation to popular culture bears the indelible mark of its turbulent incorporation of vernacular poetry—a legacy shaped by nostalgia, contempt, and

fraudulence. Daniel Tiffany reactivates and fundamentally redefines the concept of kitsch, freeing it from modernist misapprehension and ridicule, by tracing its origin to poetry's alienation from the emergent category of literature. Tiffany excavates the forgotten history of poetry's relation to kitsch, beginning with the exuberant revival of archaic (and often spurious) ballads in Britain in the early eighteenth century. In these controversial events of poetic imposture, Tiffany identifies a submerged pact—in opposition to the bourgeois values of literature—between elite and vernacular poetries. Tiffany argues that the ballad revival—the earliest explicit formation of what we now call popular culture—sparked a perilous but seemingly irresistible flirtation (among elite audiences) with poetic forgery that endures today in the ambiguity of the kitsch artifact: Is it real or fake, art or kitsch? He goes on to trace the genealogy of kitsch in texts ranging from nursery rhymes and poetic melodrama to the lyric commodities of Baudelaire. He scrutinizes the fascist "paradise" inscribed in Ezra Pound's *Cantos* as well as the avant-garde poetry of the New York School

and its debt to pop and "plastic" art. By exposing and elaborating the historical poetics of kitsch, *My Silver Planet* transforms our sense of kitsch as a category of material culture.

Marxism After Modernity is concerned with the ways in which Marxist theory has responded to the major social, economic and technological transformations of capitalism which have occurred in the late twentieth and early twenty-first centuries.

The past decade has witnessed a resurgence of interest in Marxism both within and without the academy. Marxian frameworks, concepts and categories continue to be narratively relevant to the features and events of contemporary capitalism. Most crucially, an attention to shifting cultural conditions has lead contemporary researchers to re-confront some classical and essential Marxist concepts, as well as elaborating new critical frameworks for the analysis of

capitalism today. The SAGE Handbook of Marxism showcases this cutting-edge of today's Marxism. It advances the debate with essays that rigorously map and renew the concepts that have provided the groundwork and main currents for Marxist theory, and showcases interventions that set the agenda for Marxist research in the 21st century. A rigorous and challenging collection of scholarship, this book contains a stunning range of contributions from contemporary academics, writers and theorists from around the world and across disciplines, invaluable to scholars and graduate students alike. Part 1: Reworking the critique of political economy Part 2: Forms of domination, subjects of struggle Part 3: Political perspectives Part 4: Philosophical dimensions Part 5: Land and existence Part 6: Domains Part 7: Inquiries and debates
