Policies for a Carbon-Neutral Industry in  
the Netherlands Scale and ScopeThe  
Dynamics of Industrial Capitalism  
Publishes in-depth articles on labor  
subjects, current labor statistics,  
information about current labor contracts,  
and book reviews.  
Finished broadwoven fabric production.  
MA-22S OECD Publishing  
"Scale and Scope concentrates on patterns  
of industrial growth and competitiveness  
in three leading industrial nations -- the  
United States, Germany, and Great  
Britain."--Page 2 of cover.

Industrial Process Plant Construction  
Estimating and Man-Hour Analysis focuses  
on industrial process plants and enables  
the estimator to apply statistical  
applications, estimate data tables, and  
estimate sheets to use methods for  
collecting, organizing, summarizing,  
presenting, and analyzing historical man-  
hour data. The book begins with an  
introduction devoted to labor, productivity  
measurement, collection of historical data,  
verification of data, estimating methods,  
and factors affecting construction labor

productivity and impacts of data. It goes  
on to explore construction statistics and  
mathematical spreadsheets, followed by  
detailed scopes of work ranging from coal-  
fired power plants to oil refineries and  
solar plants, among others. Man-hour  
schedules based on historical data  
collected from past installations in  
industrial process plants are also included  
as well as a detailed glossary, Excel and  
mathematical formulas, area and volume  
formulas, metric/standard conversions,  
and boiler man-hour tables. Industrial  
Process Plant Construction Estimating and  
Man-Hour Analysis aids industrial project  
managers, estimators, and engineers with  
the level of detail and practical utility for  
today's industrial operations and is an  
ideal resource for those involved in
