Beginning AutoCAD 2005 is a course based on learning and practising the essentials of 2D drawing using AutoCAD. Bob McFarlane's hands-on approach is uniquely suited to independent

learning and use on courses. The focus on 2D drawing in one book, ensures the reader gets a thorough grounding in the subject, with a greater depth of coverage than tends to be available from general introductions to AutoCAD. As a result, this book provides a true, step-by-step, detailed exploration of the AutoCAD functions required at each stage of producing a 2D drawing - an approach often not found in the many software reference guides available. The emphasis on learning through doing makes this book ideal for anyone involved in engineering, construction or architecture - where the focus is on productivity and

practical skills. The author has also matched the coverage to the requirements of City and Guilds, Edexcel (BTEC) and SQA syllabuses. New features in AutoCAD 2005 are covered in this book including: Drafting Tools; Drawing Management; Drawing Output; Plot and Publish Tools; Productivity Tools; Sheet Set Manager, and Tool Palette Enhancements. The result is a useful refresher course for anyone using AutoCAD at this level, and those upgrading to the new software release. The course is also designed to be fully relevant to anyone using other recent releases, including AutoCAD 2004. Bob McFarlane is Curriculum Manager for CAD and New Media

at Motherwell College, Scotland, and an Autodesk Educational Developer.

Southern Homes and Plan Books showcases the architectural legacy and design philosophy of Leila Ross Wilburn (1885–1967), a legacy that includes hundreds of houses in a variety of popular house styles, from bungalows to ranch houses, built using Wilburn's plan books during the first six decades of the

twentieth century. Wilburn opened her own firm in Atlanta in 1908 and practiced until her death in 1967. She published nine plan books that offered mail order house designs to contractors, builders, and prospective homeowners and allowed them the ease of choosing a preconceived design and construction plan. Sarah J. Boykin and Susan M. Hunter provide a survey of the southern homes built from Wilburn's plan books, examining Wilburn's architectural legacy and her achievements as a plan book architect. The book provides beautiful photographs of houses built from her plans, along with

illustrations from the plan books themselves and other related documents from the time. Readers can thus see how her designs were realized as individual houses and also how they influenced the development of some of the Atlanta area's beloved historical neighborhoods, most notably Druid Hills, Morningside, Virginia-Highland, and Candler Park, as well as the McDonough-Adams-Kings Highway (MAK) Historic District in Decatur. Today, Wilburn's houses are enjoyed as appealing, historic homes and represent some of the richest examples of southern vernacular architecture to emerge from the plan book tradition.
