Cost Management: A Strategic Emphasis, by Blocher/Stout/Juras/Smith is dedicated to answering the question: Why Cost Management? It answers this question by providing cost-management tools and techniques needed to support an organization's competitiveness, improve its performance, and help the organization accomplish its strategy. The text is written to help students understand the broader role of cost accounting in helping an organization succeed - and not just the measurement of costs. While the text does include coverage of traditional costing topics (e.g., job-order costing, process costing, service-department cost allocations, and accounting for joint and by-products), its primary strength is the linkage of these topics, as well as more contemporary topics, to an organization's strategy. And with Connect, an easy-to-use homework and learning management solution that embeds learning science and award-winning adaptive tools to improve student outcomes, instructors receive a course solution that includes high quality content and assessment paired with assignments that help students build the skills they need to succeed.

This book, meant for students preparing for Group 1 of CA Intermediate is unique. It consists of: • Complete coverage of Theory • All formulas and formats • Practice problems for each chapter This book is most effective after initial learning. A student can revise the subject a number of times before the exam in a very short time. With the excuse of making the books more concise, the theory is usually presented in bullet points only. However, in this book, suitable narrations, example and explanation assisted by charts and diagrams are given to help you revise theory effectively. This makes it easier to remember what you learn. The formats, formulas and carefully handpicked revision problems to assist the students are part of

this book to make this a complete revision kit.

Cost and Management Accounting II [CBCS CU] McGraw-Hill Education

This handbook is intended primarily for practitioners such as accountants, auditors, financial analysts, business managers, and chief executives. The primary focus of this book is on techniques and concepts of cost and management accounting for strategic business decisions. In order to survive in the changing business environment, organizations should rethink their strategic philosophy and the role of management accounting. Management accounting systems exist to help managers make economic decisions. In preparing and assessing their strategic plans, organizations need information on many areas of their business environment. Management accounting is also in a process of change. While some businesses continue to use conventional methods of costing, performance measurement and cost analysis, increasing numbers are adopting activity based cost allocation system, strategic oriented investment decisions models, and multiple performance measures such as the Balanced Scorecard. This handbook focuses on both conventional and contemporary issues in cost and management accounting. It presents an intriguing combination of 20 chapters, separated for presentation purpose into seven themes, dealing respectively with: organizational planning and controls; costing for business decisions; pricing decisions; capital budgeting decisions; performance measurement and benchmarking; contemporary management accounting tools; and management accounting for the public sector. All chapters in this handbook provide both retrospective and modern views and commentaries by knowledgeable scholars in the field, who are able to offer unique insights on the changing role of cost and management accounting in today's businesses.
