Strong's Concordance has been a basic tool for researching specific words and topics for over 100 years. AMG Publishers began more than 25 years ago to publish word study materials based on Strong's numbering system. Now, AMG Publishers has combined the meat of their word study materials with Strong's Concordance to form Strong's Complete Word Study Concordance: Expanded Edition. AMG's word studies are added right into Strong's dictionaries, giving you extended definitions of key Hebrew and Greek words. These amplified definitions are important advances for students who use Strong's Concordance as a research tool to discover the meanings of Greek and Hebrew words. Book jacket.

Both compounds and multi-word expressions are complex lexical units, made up of at least two constituents. The most basic

difference is that the former are morphological objects and the latter result from syntactic processes. However, the exact demarcation between compounds and multi-word expressions differs greatly from language to language and is often a matter of debate in and across languages. Similarly debated is whether and how these two different kinds of units complement or compete with each other. The volume presents an overview of compounds and multi-word expressions in a variety of European languages. Central questions that are discussed for each language concern the formal distinction between compounds and multi-word expressions, their formation and their status in lexicon and grammar. The volume contains chapters on German, English, Dutch, French, Italian, Spanish, Greek, Russian, Polish, Finnish, and Hungarian as well as a contrastive overview with a focus on German. It brings together insights from word-formation theory, phraseology and theory of grammar and aims to contribute to the understanding of the lexicon, both from a language-specific and cross-linguistic perspective.

An ancient Roman history text, translated by Charles Yonge, and written by the Greek philosopher Philo of Alexandria. The Embassy to Gaius was a meeting between Gaius Caligula, the then Roman Emperor, and a large contingent of Jews. They wished to overturn Gaius' plans to have a huge statue of Zeus installed in the temple. Gaius' hatred of the Jews is legendary. This book is important because it helps to understand the relations between Jews and Romans in the first century A.D.

If you're looking for practical information to answer all your "How?" "What?" and "Why?" questions about money, this book is for you. Dave Ramsey's Complete Guide to Money covers the A to Z of Dave's money teaching, including how to budget, save, dump debt, and invest. You'll also learn all about insurance, mortgage options, marketing, bargain hunting and the most important element of all—giving. This is the handbook of Financial Peace University. If you've already been through Dave's nine-week

class, you won't find much new information in this book. This book collects a lot of what he's been teaching in FPU classes for 20 years, so if you've been through class, you've already heard it! It also covers the Baby Steps Dave wrote about in *The Total Money Makeover*, and trust us—the Baby Steps haven't changed a bit. So if you've already memorized everything Dave's ever said about money, you probably don't need this book. But if you're new to this stuff or just want the all-in-one resource for your bookshelf, this is it!

Borneo, the third largest island in the world, is still sparsely populated, but it has a remarkable ethnic diversity. This book examines that diversity - in economic and social life, political organization, religion, worldview and material culture - and shows that, beneath these variations, there are common social and cultural features that can be traced back to the Austronesian-speaking migrants who first settled the island about 4,500 years ago. The processes of historical differentiation from these common roots are considered by describing local human adaptations to the environment, and the external influences on the Bornean peoples, from places as far away as China, India, the Middle East and Europe. Besides its cultural diversity and the historical reasons for it, there are two dominant themes in the literature on Borneo: first, European popular images of the island and its peoples, which tend to dwell on exotic customs and practices, such as headhunting and piracy; and, second, the pervasive influence of the rainforest on Bornean ways of life. The book provides a comprehensive view of traditional Bornean societies and cultures, setting its seemingly exotic institutions in their proper context, and documenting the recent challenge to traditional ways of life posed by modernization, the commercialization of agriculture, logging and forest clearance, resettlement and land development.

Micah LeMon had one slight problem when he started bartending nearly twenty years ago: he had no idea what he was doing. Mixology, he came to understand, is based on principles that are

indispensable but not widely known. In *The Imbible*, LeMon shares the knowledge he has gained over two decades, so that even beginning bartenders can execute classic cocktails--and riff on those classics to create originals of their own. A good cocktail is never a random concoction. LeMon introduces readers to the principal components of every drink--spirit, sweet, and sour or bitter--and explains the role each plays in bringing balance to a beverage. Choosing two archetypes--the shaken Daiquiri and the stirred Manhattan—he shows how bartenders craft delicious variations by beginning with a good foundation and creatively substituting like ingredients. Lavishly illustrated in color and laid out in an inviting and practical way, *The Imbible* also provides a thorough overview of the bartender's essential tools and techniques and includes recipes for over forty drinks--from well executed classics to original creations exclusive to this book. Both a lesson for beginners and a master class for more experienced bartenders, LeMon's book opens the door to endless variations without losing sight of the true goal--to make a delicious cocktail.

Thermosoftening Plastics are polymers that can be manipulated into different shapes when they are hot, and the shape sets when it cools. If we were to reheat the polymer again, we could re-shape it once again. Modern thermosoftening plastics soften at temperatures anywhere between 65 oC and 200 oC. In this state, they can be moulded in a number of ways. They differ from thermoset plastics in that they can be returned to this plastic state by reheating. They are then fully recyclable because thermosoftening plastics do not have covalent bonds between neighbouring polymer molecules. Methods of shaping the softened plastic include: injection moulding, rotational moulding, extrusion, vacuum forming, and compression moulding. The scope of this book covers three areas of thermosoftening plastics, thermoplastic materials, and their characterization. The following tests are covered in the book: thermal analysis (differential scanning calorimetry, heat deflection temperature test), optical properties tests (fluorescence spectroscopy, UV spectroscopy), and mechanical properties tests (thermogravimetry, rheometry, short term tensile test).

The Florida Everglades ecosystem is recognised world-wide as a

significant wetland whose natural processes have been altered and remain threatened. State and Federal US agencies face critical decisions about the course of conservation and restoration efforts. Synthesising nearly ten years of laboratory and field research of the Duke University Wetland Center, this book provides the long-term integrated scientific studies needed to understand the functioning of this region. Background information about the current and historical ecological conditions of the region set the context for reports of long-term research projects, while a series of gradient studies determine the effects of hydrology and nutrient changes. Subsequent sections present models for predicting responses to various conditions and analyse the studies and models, focusing on management and restoration of the Everglades.

Gateways to Empire: Quebec and New Amsterdam to 1664 by Daniel Weeks is the first comprehensive comparative study of the North American fur-trading colonies New France and New Netherland. Weeks traces the evolution of Quebec and New Amsterdam from hubs for trade with the Indians to gateways for European settlement.

The Cutting Edge of Nordic Larp Knutpunkt

Until about 1870 the Sa'dan-toraja of Sulawesi had little contact with the outside world. Several factors, of which the introduction of the coffee-growing and the coffee trade was chronologically one of the first, have changed their life as a megalithic people enmeshed in mythology and ritual drastically. The conversion of nearly half the population to Christianity after 1945 brought a particularly profound change in Sa'dan-Toraja society. Old customs, in particular as regards funerary rites, have a tenacious life, however. In autochthonous Toraja culture rituals are the main focus of attention. They are divided into ceremonies of the East and those of the West. The former, associated with sunrise and life, comprise feasts of the living; yellow and white are the colours belonging to these joyous festivals. The West is associated with sunset, death and darkness; the main colour connected with it is black. So death rituals are referred to a "night ceremonies". In time these death feasts grew more and more complicated, finally

overshadowing the festivals of the East.

A comprehensive dictionary of the meaning and derivation of scientific bird names. Many scientific bird names describe a bird's habits, habitat, distribution or a plumage feature, while others are named after their discoverers or in honour of prominent ornithologists. This extraordinary work of reference lists the generic and specific name for almost every species of bird in the world and gives its meaning and derivation. In the case of eponyms brief biographical details are provided for each of the personalities commemorated in the scientific names. This fascinating book is an outstanding source of information which will both educate and inform, and may even help to understand birds better.

Symposiacs By Plutarch Plutarch (Lucius Mestrius Plutarchus), was a Greek historian, biographer, and essayist, known primarily for his Parallel Lives and Moralia. He is considered today to be a Middle Platonist. He was born to a prominent family in Chaeronea, Boeotia, a town about twenty miles east of Delphi. Symposiacs is one of Plutarch's less known essays. Has it happens to many works of antiquity like this one, small pieces of the book are missing. Unfortunately because of that, some "questions" made in the Symposiacs are forever missing an answer. We are delighted to publish this classic book as part of our extensive Classic Library

collection. Many of the books in our collection have been out of print for decades, and therefore have not been accessible to the general public. The aim of our publishing program is to facilitate rapid access to this vast reservoir of literature, and our view is that this is a significant literary work, which deserves to be brought back into print after many decades. The contents of the vast majority of titles in the Classic Library have been scanned from the original works. To ensure a high quality product, each title has been meticulously hand curated by our staff. Our philosophy has been guided by a desire to provide the reader with a book that is as close as possible to ownership of the original work. We hope that you will enjoy this wonderful classic work, and that for you it becomes an enriching experience.
