*Fetal and Neonatal Physiology, 2-Volume Set* Cambridge University Press

Forlagetets beskrivelse: This two-volume book comprises an up-to-date reference text on fetal and neonatal physiology. It contains 190 chapters written by experts in each field which provide essential background information as well as contemporary viewpoints and research.

The purpose of this second edition is to bring current information to readers and to enlarge the original scope with a more comprehensive approach. It is targeted to fellows, nurses, and other personnel training in fetal and neonatal medicine as well as to established investigators. Overall, the volumes accomplish their purpose. The topics are appropriately divided and indexed and nearly all of the chapters can be read at a single sitting. The illustrations are good, but their impact would have been improved by using more

color. Chapters related to my specialty were well written and highly readable. These included placental development, developmental hematopoiesis, and developmental immunobiology. Disappointingly, immune relationships between the mother and baby during pregnancy, now a matter of considerable interest to fetal and neonatal physiologists, are not discussed. Nor were interactions between the immune, endocrine, and nervous systems highlighted. Although the book suffers

from the previously mentioned problems and other minor deficiencies, it is nonetheless a notable achievement and is likely to be a standard volume on the shelves of novice and experienced physiologists.

*A Comprehensive Approach to the Art of Physical Examination, Fifth Edition*

Lippincott Williams & Wilkins

Pediatric Resuscitation is reviewed in this issue of *Pediatric Clinics of North America*, guest edited by Drs. Steve Schexnayder and Arno Zaritsky. Authorities in the field have come together to pen articles on Background and Epidemiology; CPR - Why the New Emphasis?; Airway Management; Arrhythmias, Cardioversion, and Defibrillation; Vascular Access and Medications; Medical Emergency Teams; Teamwork in Resuscitation; Resuscitation Education; Outcome Following Cardiac Arrest; Extracorporeal Life Support during CPR; Post-resuscitation Care; and Future Directions.

*A Self-Assessment Guide* Kendall Hunt

Providing a comprehensive yet concise guide for trainee doctors, neonatal nurses and midwives, *Essential Neonatal Medicine* continues to be an indispensable resource

that combines the depth and breadth of a textbook with the efficiency of a revision guide. Extensively updated and full-colour throughout, this edition includes new chapters on neonatal transport and palliative care, as well as further content on pathophysiology and embryology, quality improvement and risk management, infection control, and non-invasive ventilation. With an improved artwork programme and a new glossary of terms, *Essential Neonatal Medicine* is ideal for all trainee health professionals new to neonatology, or looking for a comprehensive aid to support them.

*Merenstein & Gardner's Handbook of Neonatal Intensive Care - E-Book* Amer Academy of Pediatrics

CD includes: full text plus dramatic footage of actual resuscitation events, laryngoscopic view of the airway, digitized animation, review questions, and learner-directed interactive video scenarios.

**A Primary Care Approach** Jones & Bartlett Pub

*Physical Assessment of the Newborn*, 5th Edition, is a comprehensive text with a wealth of detailed information on the assessment of the newborn. This valuable

and essential resource illustrates the principles and skills needed to gather assessment data systematically and accurately, and also provides a knowledge base for interpretation of this data.

Coverage addresses: gestational assessment, neurologic assessment, neonatal history, assessment of the dysmorphic infant, and systemic evaluation of individual body systems, as well as key information on behavioral and pain assessment, including the use of specific tools with various groups ranging from term to extremely preterm infants. Numerous tables, figures, illustrations, and photos, many of them in full color, are a major strength that enhances the book's usefulness as a clinical resource. The text is an excellent teaching tool and resource for anyone who performs newborn examinations including nurses, neonatal and pediatric nurse practitioners, nurse-midwives, physicians and therapists. It can also serve as a core text for any program preparing individuals for advanced practice roles in neonatal care. **KEY FEATURES:** An authoritative and renowned text that comprehensively addresses all key aspects of newborn assessment

Provides a well-ordered evaluation of individual body systems. Assists the practitioner in identifying infant state, behavioral clues, and signs of pain, facilitating individualized care. Comprehensively addresses the tremendous range of variation among newborns of different gestational ages. The content is amplified by numerous photos and illustrations, many in full color. Includes Power Point slides and an Image Bank.

Nrp American Academy of Pediatrics New 8th Edition! Innovative resource for interactive, simulation-based teaching and learning. The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to health care professionals who care for newborns at the time of delivery. NRP Essentials and NRP Advanced The NRP, 8th edition, introduces a new educational methodology to better meet the needs of health care professionals who manage the newly born baby. New in the

8th edition Key Points at the beginning of each lesson. Quick Response (QR) codes that enable the reader to view short videos about the topics on their mobile device. Lesson Review Questions grouped together at the end of each lesson. Quality Improvement Opportunities and Frequently Asked Questions in each lesson. New sections in Lesson 10 (Special Considerations) about resuscitation of the newborn with a myelomeningocele or an abdominal wall defect. Three Supplemental Lessons (Improving Resuscitation Team Performance, Resuscitation Outside the Delivery Room, and Bringing Quality Improvement to Your Resuscitation Team) that allow NRP users to enhance their resuscitation knowledge and performance.

*Red Book 2021* Amer Academy of Pediatrics

This concise, evidence-based board review book, organized according to the ABA keyword list, covers all the fundamental concepts needed to pass written and recertification board examinations. Each chapter begins with a case scenario or clinical problem from everyday practice, followed by concise discussion and clinical

review questions and answers. Discussion progresses logically from preoperative assessment and intraoperative management to postoperative pain management, enhancing the reader's knowledge and honing diagnostic and clinical management skills. New guidelines and recently developed standards of care are also covered. Serving as a companion to the popular textbook *Essential Clinical Anesthesia*, this resourceful work reflects the clinical experiences of anesthesia experts at Harvard Medical School as well as individually known national experts in the field of anesthesiology. This practical review is an invaluable resource for anesthesiologists in training and practice, whether studying for board exams or as part of continuing education and ABA recertification.

**Principles and Practices** W B Saunders Company

For more than 45 years, Avery & MacDonald's *Neonatology* has been the premier text on the pathophysiology and management of both preterm and full-term neonates, trusted by neonatologists, neonatology fellows, pediatricians, neonatal nurse practitioners, and ob/gyn

practitioners worldwide. Continuing the tradition of excellence established by Drs. Gordon B. Avery and Mhairi G. MacDonald, this fully revised eighth edition features three new lead editors, numerous new chapters, reorganized and updated content, and an increased focus on global neonatology.

*Textbook of Neonatal Resuscitation*  
Elsevier Health Sciences

This guide has been developed jointly by the American Academy of Pediatrics and the American College of Obstetricians and Gynecologists, and is designed for use by all personnel involved in the care of pregnant women, their fetuses, and their neonates.

[OSCEs for the MRCOG Part 2: A Self-Assessment Guide, 2nd Edition](#) Elsevier  
New 7th Edition! Powerful resource for interactive, simulation-based teaching and learning! The Neonatal Resuscitation Program (NRP) is an educational program jointly sponsored by the American Academy of Pediatrics (AAP) and the American Heart Association (AHA). The course is designed to teach an evidence-based approach to resuscitation of the newborn to hospital staff who care for

newborns at the time of delivery. New in the 7th edition! Text updated to reflect the 2015 AAP/AHA Guidelines for Cardiopulmonary Resuscitation and Emergency Cardiovascular Care of the Neonate Two new chapters added covering post-resuscitation care and preparing for resuscitation 140+ new full-color photographs replacing most line drawings

**Fetal Heart Monitoring** Lippincott Williams & Wilkins

The AAP's authoritative guide on preventing, recognizing, and treating more than 200 childhood infectious diseases. Developed by the AAP's Committee on Infectious Diseases as well as the expertise of the CDC, the FDA, and hundreds of physician contributors.

*Comprehensive Perinatal & Pediatric Respiratory Care* W.B. Saunders Company  
The clinical practice of anesthesia has undergone many advances in the past few years, making this the perfect time for a new state-of-the-art anesthesia textbook for practitioners and trainees. The goal of this book is to provide a modern, clinically focused textbook giving rapid access to comprehensive, succinct knowledge from

experts in the field. All clinical topics of relevance to anesthesiology are organized into 29 sections consisting of more than 180 chapters. The print version contains 166 chapters that cover all of the essential clinical topics, while an additional 17 chapters on subjects of interest to the more advanced practitioner can be freely accessed at [www.cambridge.org/vacanti](http://www.cambridge.org/vacanti). Newer techniques such as ultrasound nerve blocks, robotic surgery and transesophageal echocardiography are included, and numerous illustrations and tables assist the reader in rapidly assimilating key information. This authoritative text is edited by distinguished Harvard Medical School faculty, with contributors from many of the leading academic anesthesiology departments in the United States and an introduction from Dr S. R. Mallampati. This book is your essential companion when preparing for board review and recertification exams and in your daily clinical practice.

*Keywords, Questions and Answers for the Boards* John Wiley & Sons

The new 6th edition textbook with accompanying DVD reflects the 2010

American Academy of Pediatrics and American Heart Association Guidelines for Neonatal Resuscitation. This textbook with extensively updated Neonatal Resuscitation Program materials represent a shift in approach to the education process, eliminating the slide and lecture format and emphasizing a hands-on, interactive, simulation-based learning environment.

OSCEs for the MRCOG Part 2 is a thorough and practical self-assessment guide that will prove invaluable as you prepare for your MRCOG Part 2 oral examination. Based on the latest changes to the MRCOG syllabus Written by MRCOG examiners Ideal for revision and cramming, with marking schemes provided for you to work through OSCEs for the MRCOG Part 2 is designed to fully prepare you for your OSCE. This new edition will concentrate your theoretical and practical knowledge of obstetrics and gynaecology as recommended in the syllabus for the MRCOG Part 2 examination.

Essential Neonatal Medicine Elsevier Health Sciences

Quick, one-stop guide to neonatal resuscitation (NRP) steps. Great take-along for students in training. Size: 4" x 6"  
*MacDonald's Atlas of Procedures in Neonatology* Cengage Learning Detailed, step-by-step instructions and abundant full-color illustrations make MacDonald's Atlas of Procedures in

Neonatology, Sixth Edition, an indispensable resource in the neonatal intensive care nursery. This unique reference uses a practical outline format to present clear, easy-to-follow information on indications, preparation, technique, precautions, and how to avoid potential complications. New chapters, new procedural content, and new videos bring you fully up to date with current practice in the NICU.

**Pediatric Anesthesia** Hareesh

This special multimedia product of the new 6th edition Textbook of Neonatal Resuscitation includes the textbook with its accompanying DVD and the eBook version.

*Physical Assessment of the Newborn* W B Saunders Company

Extensive and up-to-date resource on the full range of gynaecological cancers; practically-focused and essential for the MRCOG examination.

Pediatric Resuscitation Cambridge University Press

Textbook of Neonatal Resuscitation

Textbook of Neonatal Resuscitation

American Academy of Pediatrics

Perfect as a resource in the field or for

exam preparation, this authoritative reference from the Association of Women's Health, Obstetric, and Neonatal Nurses (AWHONN) includes in-depth coverage of the most common neonatal disorders and their management. The concise outline format highlights the essentials of each condition including definition, etiology, pathophysiology, signs and symptoms, diagnostic tests, treatments, and outcomes to help you find important information quickly. This new edition also features an increased focus on evidence-based practice, new CAMTS and AAMS guidelines, new techniques for PICC placement, and changes to the Neonatal Resuscitation Program. All necessary information to prepare for the neonatal intensive care nursing certification examination is included. Concise outline format provides access to important nursing considerations associated with the management of the most common conditions in the neonate. Text provides a collaborative effort between the three

most authoritative associations in neonatal intensive care nursing - AWHONN, AACN, and NANN. Information on families, ethics, legal issues, research, case management, and the transition to home acknowledge the full scope of neonatal nursing practice. NEW! CAMTS and AAMS guidelines, techniques for PICC placement, and changes to the Neonatal Resuscitation Program are just a few of the updates that reveal the importance the new edition places on safety practices and procedures. NEW! Updated chapter on Patient Safety includes selected improvement strategies and resources for neonatal nurses to build a patient safety toolkit, discusses TeamSTEPPS (Team Strategies and Tools to Enhance Performance and Patient Safety), and recognizes human issues, such as shift work and fatigue. NEW! Increased focus on evidence-based practice for preterm infants, medications, and antepartum-intrapartum complications sets the standard for

neonatal nursing practice. NEW! Strategies to promote inclusionary care better reflect nursing care today by focusing on family-centered care, comprehensive perinatal records, health care teams in the NICU, and best practices in the care of the late preterm infant. NEW! Comprehensively revised chapter on Immunology identifies risk factors for infection associated with term and preterm infants, distinguishes clinical symptoms and therapies associated with TORCHES CLAP spectrum infections, and includes prevention strategies for hospital-acquired infections. NEW! Thoroughly updated content and references reflect currency and technologic advances. NEW! Refocused chapter on Developmental Care guides the nurse to use assessment within the context of the environment and situation to initiate interventions in the moment or use patterns of responses for developing plans of care and presents core measures on evaluating developmental care practices in the NICU.
